### **Rezensionen — Analyses — Reviews.**

**Goodwin, L. & Duggan, A.: A New Tropical Hygiene.** 148 pp. ill.  
— London: George Allen & Unwin Ltd. 1960. Fr. 3.75.

Es ist neuartig und angenehm frisch in seiner ganzen Konzeption, das handliche, reich und sinnfällig illustrierte Büchlein von GOODWIN und DUGGAN. Heutzutage braucht es ja mehr denn je solche Anleitungen zu praktisch betriebener Tropenhygiene. Wie ich kürzlich auf einer Reise feststellen konnte, fängt diese «New Tropical Hygiene» auch bereits an, in Lehrinstituten Ostafrikas mit Erfolg benutzt zu werden. Sie wendet sich übrigens sozusagen an beide, Lehrer und Studenten, und kann ebensogut von Europäern wie von Afrikanern verstanden werden. Dem Dozenten gibt das Büchlein das Gerippe für den Kurs, den er aufbauen soll, und dem Schüler bietet es eine konzentrierte, leicht übersehbare Zusammenfassung. Es ist für die untere Stufe geschrieben, von der aus z. B. in Uganda, Kenya oder Tanganyika nach 12 oder sogar nur 10 oder 8 Jahren Schulbildung «Rural Medical Aids» oder «Medical Assistants» ausgebildet werden. Die Autoren, die selber Ostafrika kennen und dort bei der täglichen Arbeit mit afrikanischen Laboratoriumsgehilfen in Berührung gekommen sind, gehen jedenfalls von jenen Verhältnissen aus. Nun ist aber der Text klar und einfach gehalten, und die Illustrationen von MORRISON sind so allgemein einleuchtend, daß das Buch überall, wo in der Tropenzone Englisch verstanden wird, Eingang finden und beste Dienste leisten kann.

Der Inhalt zerfällt in zwei Hauptteile. Im ersten wird der normale, gesunde Organismus beschrieben, wobei für sämtliche Organsysteme, wie Skelett, Muskulatur, Darmkanal, Kreislaufsystem, Blut, Lunge, Leber usw., treffende
