**Pests of Crops in Warm Climates
and their Control**

by R. WYNIGER

A new revised and enlarged

Appendix

will be published in January 1968

It was intended to revise the appendix volume of this book periodically and to reprint it at intervals so as to keep it always up-to-date as new progress is made in this field. *Now the second revised and enlarged edition is ready.*

Since the publication of the 1st edition of "Appendix to Pests of Crops in Warm Climates and their Control" in 1962, many new synthetic-organic compounds for general use specialized Pest Control have been developed and marketed.

The "Table of Active Ingredients" in the present edition has been compiled correspondingly and brought up-to-date. Moreover, chemosterilants, activators or synergists, repellents and rodenticides are included.

The Active Ingredients are numbered as in the 1st edition, with some exceptions. The names or synonyms of new compounds are in alphabetical order and given a decimal figure. While the sections "Precautions" and "Mixing Tables" have not been altered, the section "First Aid Measures" has been in parts.

Control methods and methods of application resulting from the rapid development of new substances with new properties have been taken into consideration as far as possible in the main section entitled "Recommendations for Control Measures".

The new appendix shall appear in January 1968 and will be available for a price of 50 Swiss francs.

The total price of the Handbook including the new appendix will then be 210 Swiss francs.
