

Zeitschrift: Acta Tropica
Herausgeber: Schweizerisches Tropeninstitut (Basel)
Band: 25 (1968)
Heft: 1

Bibliographie: Bibliographie

Nutzungsbedingungen

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

Conditions d'utilisation

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. [En savoir plus](#)

Terms of use

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. Publishing images in print and online publications, as well as on social media channels or websites, is only permitted with the prior consent of the rights holders. [Find out more](#)

Rezensionen — Analyses — Reviews

Lehrbuch der Tropenkrankheiten. Hrsg. von E. G. Nauck und Mitarbeiter. 3., überarbeitete Auflage. 472 pp. ill. — Stuttgart: Georg Thieme Verlag, 1967, DM 69.—.

Daß dieses im deutschen Sprachgebiet einzig dastehende Lehrbuch, welches 1956 in erster und 1962 in zweiter Auflage erschienen ist, nun schon nach fünf weiteren Jahren seine dritte Auflage erlebt, spricht schon genug für die Wertschätzung, die es nicht nur regional, sondern über die ganze Welt hin gesehen genießt. Es verdient diese auch in hohem Maße, denn schon die erste Konzeption erwies sich mit ihrem trotz aller Knappheit so reichhaltigen, klug gesichteten Text als eine der wertvollsten neueren Leistungen auf dem Gebiet der tropenmedizinischen Literatur. Aber der Autor und seine tüchtigen Mitarbeiter am Hamburger Tropeninstitut haben sich mit diesem Anfangserfolg nicht zufriedengegeben. Dies bewies schon die zweite und nun erst recht die dritte Auflage. Sie ist einerseits unter Ausmerzung gewisser Mängel mit viel Sachkenntnis völlig überarbeitet, in wohltuender Weise vereinheitlicht und tatsächlich auf den letzten Stand gebracht worden. Andererseits verdienen aber auch die zahlreichen, nicht unbedeutlichen Ergänzungen besondere Erwähnung. Sie betreffen ganz allgemein die Therapie, gewisse Abbildungen und dann im besonderen die bedeutend verlängerten Listen der Virus- und der durch Pilze verursachten Krankheiten sowie der in den Tropen so besonders hervorstechenden Hämoglobinopathien. Hier ist also in aller Stille mit deutscher Gründlichkeit eine ungeheure, verdienstvolle Arbeit geleistet worden zum Nutzen aller interessierten Kreise vom Studenten über den Dozenten zum Arzt und Forscher. Ein Buch also, das sich immer wieder selbst empfiehlt. Wir können Herrn Nauck und seinen Kollegen nur herzlich für diese Leistung gratulieren. R. GEIGY, Basel
