Tropical Diseases Research Series

Published on behalf of the
UNDP / WORLD BANK / WHO
Special Programme for Research and Training in Tropical Diseases

The series will deal with current outstanding problems in research related to the control of major infectious tropical diseases. It is intended to attract scientists working in other disciplines to the problems and opportunities for research which are offered by the infective agents of concern to the Programme, and to acquaint those already working on these organisms with new awareness for investigation which advances in other biomedical sciences may offer.

The Special Programme is a goal-oriented research and training programme with two objectives: (1) Research and development to obtain new and improved tool for the control of major tropical diseases, and (2) Strengthening of the research capability of the tropical countries.
