

**Zeitschrift:** Archives des sciences et compte rendu des séances de la Société  
**Herausgeber:** Société de Physique et d'Histoire Naturelle de Genève  
**Band:** 42 (1989)  
**Heft:** 1: Archives des Sciences

**Artikel:** Polarity : from dipoles to biopolarization  
**Autor:** Turian, Gilbert

**Inhaltsverzeichnis**

**DOI:** <https://doi.org/10.5169/seals-740080>

### **Nutzungsbedingungen**

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

### **Conditions d'utilisation**

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. [En savoir plus](#)

### **Terms of use**

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. Publishing images in print and online publications, as well as on social media channels or websites, is only permitted with the prior consent of the rights holders. [Find out more](#)

TABLE OF CONTENTS	7
-------------------	---

INTRODUCTION	13
--------------	----

### I. ATOMIC POLARIZATIONS

<b>A. Origins</b> .....	17
<b>B. Symmetry — polarity</b> .....	18
<b>C. Electric bipolarization</b> .....	19
1. Electric charges .....	19
2. Electric dipoles .....	21
3. Polarized conductivity .....	22
<b>D. Magnetic polarization</b> .....	25
1. Cosmological level .....	25
2. Magnetic fields .....	25
3. Magnetic monopoles .....	26
4. Spin polarizations .....	27
<b>E. Light polarization</b> .....	30

### II. MOLECULAR DIPOLES AND CHIRALS

<b>A. Electric dipole moments</b> .....	33
<b>B. Mineral dipoles</b> .....	34
1. Dipolar water .....	34
2. Other mineral dipoles .....	38
<b>C. Organic dipoles</b> .....	38
1. Single molecules .....	39
a) Small molecules .....	39
b) Fatty acids .....	39
c) Amino acids and amines .....	40
2. Multiple molecules (polar chains) .....	41
<b>D. Chiral molecules</b> .....	43

### III. MACROMOLECULAR POLARITIES

<b>A. Free macromolecules</b> .....	49
1. Nucleic acids .....	49
a) Deoxyribonucleic acid (DNA) .....	49
a <sup>1</sup> Structure .....	49

a <sup>2</sup> Replication .....	52
a <sup>3</sup> Transcription .....	52
a <sup>4</sup> Mutations .....	54
a <sup>5</sup> Gene conversions .....	56
b) Ribonucleic acid (RNA) .....	56
2. Proteins .....	58
3. Lipids .....	62
4. Polysaccharides .....	64
5. Enzymes .....	64
6. Antigens-antibodies .....	66
7. Synthetic polymers .....	67
<b>B. Aggregates</b> .....	68
1. Crystals-quasicrystals .....	68
2. Viral assemblies .....	69
a) Spatial symmetry .....	69
b) Polar elongative assembly .....	70
c) Polar viral morphopoiesis .....	70

#### IV. SUBCELLULAR POLARIZATIONS

<b>A. Protoplasm and cytosol</b> .....	72
1. From the protoplasm to the cytoplasm .....	72
2. Cytosol .....	72
<b>B. Surface membranes</b> .....	73
1. Primitive membranes .....	73
2. Plasma membrane .....	75
a) Biochemical properties .....	75
b) Structural polarity and recognition systems .....	79
c) Energy transduction .....	82
d) Electric potentials .....	85
e) Action potentials .....	90
f) Synaptic membranes .....	93
<b>C. Endomembranar and vesicular systems</b> .....	95
1. Endoplasmic reticulum .....	95
2. Golgi apparatus .....	97
3. Intracellular vesicles .....	100
<b>D. Organelles</b> .....	103
1. Lysosomes and peroxisomes .....	103
2. Mitochondria .....	103
3. Chloroplasts and phototransducing membranes .....	108

<b>E. Cytoskeletal components</b> .....	111
1. Microfilaments-actin .....	112
2. Microfilaments-myosin .....	113
3. Microtubules-tubulins .....	118
<b>F. Nuclei and mitotic figures</b> .....	123
1. Interphasic and mitotic structures .....	123
2. Polewards chromosome movements .....	125

## V. POLAR CELL MOVEMENTS

<b>A. Cytoplasmic movements</b> .....	129
<b>B. Cell movements</b> .....	130
1. Cilia-flagella .....	130
2. Gliding movements .....	132
3. Amoeboid motion (transient polarity) .....	133
4. Amoeba-flagellate reversible transformation .....	137
5. Taxis .....	139
a) Chemotaxis .....	139
b) Phototaxis .....	142
6. Structural basis of directionality .....	144

## VI. POLAR CELL GROWTH

<b>Polar cell growth</b> .....	147
<b>A. Monopolar</b> .....	149
1. Outgrowth (emergence) .....	149
a) Spherical buds .....	149
a <sup>1</sup> Bacterial budding .....	149
a <sup>2</sup> Yeast budding .....	150
b) Cylindrical germ tubes .....	154
b <sup>1</sup> Fungal spores .....	155
b <sup>2</sup> Algal eggs .....	157
b <sup>3</sup> Moss and fern spores .....	160
b <sup>3'</sup> Mosses .....	160
b <sup>3''</sup> Ferns .....	160
b <sup>4</sup> Pollen grains .....	161
c) Spherical/cylindrical alternative = dimorphism .....	161
2. Tip growth .....	163
a) Prokaryotic microhyphae .....	164

b)	Fungal hyphae .....	165
c)	Algal rhizoids and filaments .....	168
d)	Protonema (mosses) .....	172
e)	Prothallia (primary fern stage) .....	173
f)	Pollen tubes .....	174
g)	Root hairs .....	175
h)	Insect bristles .....	176
i)	Animal neurites .....	176
<b>B.</b>	<b>Bipolar growth (equipolar, homopolar)</b> .....	181
a)	Bacterial elongation .....	182
b)	Yeast elongation .....	183
c)	Yeast double budding .....	184
d)	Fungal double germ tubes .....	184
e)	Algal cells elongation .....	184
f)	Higher plant elongating cells .....	185
<b>C.</b>	<b>Multipolar</b> .....	187
a)	Apiculate yeast buddings .....	187
b)	Fungal germ "multitubes" .....	187
c)	Desmidial algae (multiradiate pattern) .....	188

## VII. POLARIZED CELL DIFFERENTIATION

	<b>Polarized cell differentiation</b> .....	189
<b>A.</b>	<b>Intercalary differentiations</b> .....	190
1.	Bacterial endospores .....	190
2.	Cyanobacterial heterocysts .....	191
<b>B.</b>	<b>Apical differentiations</b> .....	192
1.	Monopolar patterns .....	192
a)	Fungal exosporulation .....	192
a <sup>1</sup>	Conidia .....	193
a <sup>2</sup>	Sporangia .....	194
a <sup>3</sup>	Basidiospores .....	194
b)	Algal exosporulation .....	195
2.	Bipolar patterns .....	195
a)	Mating types .....	195
b)	Sexual disjunction .....	197
<b>C.</b>	<b>Apico-basal differentiations — Heterobipolar axiation</b> .....	200
1.	Caulobacterial cells (flagellate-stalk poles) .....	201
2.	Fungal cells (rhizoid-hyphal poles) .....	204
3.	Algal cells .....	204

a) Eggs (rhizoid-thallic poles) .....	204
b) Stalks (rhizoid-cap poles) .....	207
4. Cryptogamic spores (rhizoid-thallic poles) .....	208
5. Higher plant cells .....	210
a) Eggs .....	210
b) Epidermal cells .....	210
6. Higher animal cells .....	211
a) Eggs (animal-vegetal) poles .....	211
a <sup>1</sup> Echinoderms (sea urchins) .....	212
a <sup>2</sup> Molluscs and Worms (Annelids and Nematodes) .....	213
a <sup>3</sup> Insects .....	213
a <sup>4</sup> Ascidian-Tunicates .....	215
a <sup>5</sup> Amphibians .....	216
a <sup>6</sup> Fishes, Reptiles and Birds .....	217
a <sup>7</sup> Mammals .....	218
b) Epithelia (apical-basolateral poles) .....	218

### VIII. MORPHOGENETIC POLARIZATIONS

<b>A. Plants</b> .....	222
1. Embryonic polarity .....	224
2. Organismic polarities .....	225
a) Mushrooms .....	225
b) Colonial algae .....	228
c) Green plants .....	229
c <sup>1</sup> Roots .....	230
c <sup>2</sup> Vegetative shoots .....	231
c <sup>3</sup> Shoot-root balance and reversal .....	232
c <sup>4</sup> Polar auxin transport and tropic curvatures .....	235
c <sup>5</sup> Flowering shoots .....	238
<b>B. Animals</b> .....	239
1. Monoaxial patterns (antero-posterior (A/P) polarities) .....	241
a) Mycetozoa (slime molds) .....	241
b) Protozoa .....	244
c) Hydrozoa .....	246
2. Biaxial patterns (A/P + dorso-ventral (D/V) polarities) .....	250
a) Worms .....	250
b) Molluscs .....	252
c) Echinoderms .....	253
d) Insects .....	256
