# Annex to the consolidated financial statements for 2000

## Principles of consolidation

### → General

The accounting principles applied to these consolidated financial statements meet the requirements of Swiss Company Law and the Swiss Accounting and Reporting Recommendations (ARR), and give a true and fair picture of the consolidated annual accounts.

Valuation took place using historical costs. There was no change in the application of the consolidation and valuation rules from the previous year.

### → Closing date

The reporting year is 12 months for all companies. With the exception of the electrical power utility Rapperswil-Auenstein AG (close of accounts: 30 September), the fiscal year is identical to the calendar year.

### → Scope of consolidation

The consolidated financial statements include the annual accounts of Swiss Federal Railways (SBB) and those interests in which the SBB directly or indirectly hold the majority of voting shares.

The 100% holding in AlpTransit Gotthard AG is not consolidated but is included by application of the equity method because – based on a special agreement between the Swiss Confederation and SBB AG – the federal government has a controlling interest. The uniform management criterion therefore does not apply.

The companies in the scope of consolidation are listed on page 26.

### → Consolidation method

For all companies in which SBB AG has a direct or indirect holding of more than 50%, the method of full consolidation is applied. Assets, liabilities, expenses and income are accounted for at 100%. Interests of third-party shareholders in the equity capital and in profit are shown separately.

Equity has been consolidated in accordance with the Anglo-Saxon purchase method. Intra-group assets, liabilities, expenses and income have been offset against each other. Interim profits on intra-group accounts not yet realised by sales to third parties have been eliminated in consolidation.

Associated companies in which SBB AG has holdings of between 20% and 50% have been included according to the equity method.

### → Minority interests

Stated minority interests in the group's equity capital correspond to the third-party holdings in the equity capital of the respective companies established on the basis of the shareholder structure currently applicable.

### → Conversion of foreign currencies

With the exception of S-Rail Europe GmbH, Singen, founded at the end of December 1999, all group companies prepare their annual accounts in Swiss francs (CHF). Balance sheets and statements of profit and loss are converted at the exchange rate on the reference date. Exchange rate differences are offset against the group reserves and are not reflected in the results. Gains or losses arising at group companies from transactions in foreign currencies are stated in the profit and loss account.

The following rates of exchange were applied in these financial statements:

	31.12.2000	31.12.1999
EUR	1.52	1.60
USD	1.64	1.59

### → Goodwill

On initial consolidation of a company, its assets and liabilities are revalued according to uniform principles (fair value). The difference between the resulting equity capital and the historical cost (goodwill) is capitalised as an asset and is normally written off on a linear basis over 5 years. There is no goodwill from acquisitions up to 31 December 2000 requiring capitalisation as assets.

# Annex to the consolidated financial statements for 2000

## Valuation principles applicable to the consolidated accounts

### → General

The consolidated financial statements are based on the annual accounts of the group companies, prepared according to uniform valuation principles. The valuation and reporting principles correspond to the ARR accounting standards, with the following exceptions:

– An expert report prepared by external consultants to assess the energy operation in the context of the opening balance of SBB AG identified the need for special depreciations on production plants and for global provisions. The existence of a new SBB energy strategy in the liberalised electricity market environment is a requirement for determining the corresponding value adjustments and provisions. This has been accomplished in the year under review. The necessary adjustments to the balance sheet (taking the form of a supplement to the opening balance, which will not have a bearing on the SBB profit and loss account) can only be posted in 2001 after the final amounts have been established by the federal government.

– An expert report prepared by external consultants identified the need for the SBB to set aside provisions for site decontamination amounting to CHF 393 million as at 1 January 1999. In view of major uncertainties regarding the size of these provisions, it was agreed with the federal government that the total amount of the provisions should not be entered in the opening balance sheet but that provisions of CHF 110 million for cleanup costs in the years 1999 to 2002 be entered. Further costs from the year 2003 onwards will be assumed by the fed-

eral government under the performance agreement.

### → Current assets

**Liquid funds** are composed of cash, balances on postal and bank accounts, and financial investments that can be realised in a short time.

**Securities** are in principle stated at their year-end market value.

**Trade accounts receivable and other receivables** are stated at their nominal value, less economically-necessary value adjustments. Actual credit risks are shown individually while a global value adjustment has been made for latent credit risks.

### → Fixed assets

**Materials and spare parts** are almost exclusively for the group's own use. They have therefore been entered as fixed assets at purchase or manufacturing cost, observing the principle of the lower of cost and market value. Manufacturing cost has been calculated on the basis solely of the material costs and the direct costs of manufacture, i.e. without adding overheads. Value adjustments are made for slow-moving goods and items with reduced marketability. Discounts claimed have been credited to the financial result.

**Financial assets** include holdings in associated companies in which 20% of voting rights are held, taken into the balance according to the equity method, and the other unconsolidated holdings shown at historical cost less the necessary economic depreciation. In addition, the financial assets contain long-term receivables from third parties, unconsolidated holdings and shareholders. These are shown at their nominal value less value adjustments for actual credit risks.

**Fixed assets** have been valued at the cost of purchase or manufacture, less the necessary depreciation. Linear depreciation has been applied to the anticipated useful life of the items. The presumed service life, i.e. depreciation period of the tangible assets, is as follows (in years):

Technical, electrical and mechanical installations	15-25
Tools, furniture, instruments	10
IT/telecom	4-10
Vehicles	
Locomotives and power cars	25
Passenger cars and freight wagons	20
Service wagons	30
Road and other vehicles	10-25
Railway installations	20-50
Site development, supply and disposal installations	15-25
Hydraulic engineering structures	80
Buildings	50-75

# Annex to the consolidated financial statements for 2000

Leasing contracts which serve the same commercial purpose as the purchase of a tangible asset (financial lease) are capitalised as tangible assets and depreciated over the same useful life as similar assets. Leasing liabilities are shown under financial liabilities. Profits from sale and lease-back transactions (financial lease) are deferred and written back over the contract period.

**Assets under construction** comprise the accrued overall costs of a project. Non-capitalisable portions of costs are taken into account with corresponding depreciation until completion of the project.

**Intangible assets** comprise non-material items (water rights, rights of way, other rights and software) purchased. Linear depreciation has been applied over the corresponding useful life.

## → Current liabilities and long-term debt

Contributions to the **staff provident institutions** are made in accordance with the requirements of the BVG (Swiss pension fund law). All significant group provident institutions operate on the defined benefit principle. Benefits payable to qualifying members of staff are normally calculated as a percentage of the presumed salary in the years immediately preceding retirement, and depend on the number of years of service.

Staff welfare at the SBB Group is, in principle, the responsibility of the SBB Pension Fund, an independent institution since 1 January 1999. However, around 70 employees of subsidiaries have contracts with other provident institutions.

The federal government plans to repay the following amounts to eliminate the SBB Pension Fund's actuarial reserve deficit, which amounted to CHF 5,156 million when it became independent: CHF 1,000 million p.a. in 1999 and 2000, and 3,156 million in 2001. As a result of these repayments, liabilities of the same amount will arise for SBB AG. These in turn will be written off by 2004 on a linear basis by way of waivers of claims by the federal government. With the exception of the interest expenses for the SBB Pension Fund's actuarial reserve deficit, none of the refinancing transactions have a bearing on the profit and loss account. A corresponding provision has been made for this deficit in the consolidated financial statements in compliance with ARR requirements. Calculation of the deficit is based upon an actuarial calculation using the "projected unit credit" method. This actuarial calculation is made annually.

**The other provisions** have been created and written back in accordance with principles of business management.

**Deferred taxes**, which relate solely to holdings, as SBB AG is exempt from taxes, take account of all effects on earnings taxes arising from the requirements of commercial or local law or from the internal valuation principles of the group. The provisions have been created according to the "comprehensive liability" method and continuously adapted to any changes in local tax laws.

In accordance with the prudence principle, tax-relevant loss carryovers and anticipated tax credit advices are not taken into consideration.

## → Derivatives

The SBB's financial strategy is geared to risk minimisation. Derivatives are therefore used exclusively for hedging underlying transactions. Events affecting the earnings situation are tracked continuously in the accounts. For risk management purposes, off-balance sheet transactions are valued regularly.

## Notes to the consolidated financial statements

### 0 Changes to the scope of consolidation

Since 31<sup>st</sup> December 1999, the scope of consolidation has changed as follows:

#### Additions:

- SBB Cargo AG, Berne: In July, SBB AG acquired a 100% interest in this newly founded company.
- SBB RE AG, Vaduz: In October 2000, SBB AG acquired a 100% interest in this newly founded company.

#### Disposals:

- SBB AG has disposed of 30% of its holding in RailAway AG, Lucerne.

<b>Total personnel costs</b>	<b>2 863.8</b>	<b>2 795.6</b>

In last year's annual report, the cost of social insurance included interest on the actuarial reserve deficit of the SBB Pension Fund amounting to CHF 200.7 million, in addition to ordinary contributions to staff provident institutions. This interest is now shown under financial expenditure for both years (cf. note 11).

<b>Total other operating costs</b>	<b>1 232.1</b>	<b>993.1</b>

SBB AG introduced a comprehensive risk finance and insurance programme on 1<sup>st</sup> January 2000, which won the European Risk Management Award. Disaster risks are insured with third parties and electrical interference claims are self-insured. All claims are entered into the new program systematically and deferred on an actuarial basis. Provisions for uncompleted claims are thus formed. This system changeover has resulted in a one-off increase of CHF 45 million in insurance reserves in the year under review.

The formation of the provision for rolling stock maintenance restructuring costs (cf. note 25) was charged to other operating expenditure.

The expenses listed under flat rate VAT / input tax reduction, shown separately in the previous year, are mainly attributable to the regulations negotiated for public transport operators. Instead of making an across-the-board reduction for input taxes, SBB AG pays 2.7% turnover tax on the payments it receives. As the tax payable is contained in these amounts, this arrangement does not influence the profit and loss account of SBB AG.

<b>Total extraordinary profit and loss</b>	<b>-2.5</b>	<b>-126.0</b>

Extraordinary income includes the write-back of the provision for electricity supply costs (CHF 65 m), the write-back of provisions no longer required and out-of-period income.

Extraordinary expenditure is predominantly attributable to the formation of the provision for replacement of the SBB AG telephone system (CHF 19 m, see note 22) and other out-of-period expenditure.

"Project Chance" reflects expenditure undertaken by SBB AG for retraining staff made redundant due to rationalisation or restructuring.

<b>Total short-term provisions</b>	<b>70.4</b>	<b>111.0</b>

The reduction in short-term provisions is mainly attributable to the write-back of the provision for electricity supply (cf. note 9). The SBB telephone system will be replaced in 2001. Replacement also covers parts of the system which have not yet reached the end of their useful life. The resultant residual book value write-off will be covered by the provision formed in the year under review (cf. note 9). An additional CHF 100 million has been shown in the long-term provisions for environmental clean-up costs (cf. note 25).

<b>Total</b>	<b>6 938.1</b>	<b>6 072.6</b>

Investments in Rail 2000 are financed by loans from the major rail projects fund. The interest rates payable on interest-bearing loans are between 2.75% and 3.75%.

The refinancing of the SBB Pension Fund is mirrored in the decrease in liabilities to staff provident institutions. The federal government has waived CHF 850 million of its credit balance with the SBB (cf. note 16) in accordance with the refinancing plan.

The provision for rolling stock maintenance covers additional expenditure on vehicle overhaul arising from statutory obligations (e.g. environmental protection). The restructuring costs of the joint venture will accrue in the next 1 to 3 years. In the year under review, measures to clean up contaminated sites were initiated, and the related costs will only be debited to the provisions with effect from the 2001 financial statements. The provision for rolling stock maintenance restructuring costs has been formed by debiting other operating expenses in the year under review (cf. note 7). The other provisions relate mainly to earnings from the sale of cable-laying rights and from US leasing transactions (CHF 131.3 m), provisions for the decommissioning of infrastructure (CHF 33.3 m) and other commercially-necessary provisions.

## Staff provident scheme

The medium and long-term actuarial parameters used for calculating the contributions to the staff provident institutions in accordance with ARR 16 can be summed up as follows:

	2000 %	1999 %

## 28 Related parties

The federal government holds 100% of the equity in SBB AG. In the year under review, SBB AG received CHF 1,741.3 million in PSO grants from its shareholder. These break down as follows:

	2000 CHF m	1999 CHF m
Infrastructure maintenance grant	729.0	711.0
Infrastructure operating grant	587.0	562.0
Grants for regional passenger traffic	350.2	400.7

<b>Total</b>	<b>1 741.3</b>	<b>1 798.7</b>

Concerning the liabilities towards the shareholder, we refer to the table and note 24.

## 29 Financial instruments

To hedge the commitments from the US leasing transactions, various investments in securities with fixed values at maturity were effected. The discounted value of USD 203.7 million stated in the balance sheet compares with a present market value of USD 218.4 million.

To hedge the foreign currency risks, the following derivatives were outstanding as at the balance sheet date:

## 30 Segment report

SBB's commercial activity consists mainly of performing rail-related transport and infrastructure services. SBB AG itself correspondingly dominates segmental reporting. The performance of the group companies figure in the accounts mainly as SBB AG inputs and are thus not considered in consolidation. Business activities are focused mainly on Switzerland, which is regarded as a single geographical entity for the purposes of segmental reporting. We therefore refer to the segment report in the Notes to the SBB AG financial statements (cf. page 10 of the Notes to the financial statements of SBB AG).

## 31 Events after the balance sheet date

Every member of the SBB Pension Fund who retired before 1<sup>st</sup> January 1999 has a statutory right to the same treatment as members of the federal government pension fund. A similar rule also fundamentally applies to those who first received a pension between 1<sup>st</sup> January 1999 and 1<sup>st</sup> January 2001, at least until the Federal Personnel Act comes into force on 1<sup>st</sup> January 2001. The SBB Pension Fund can only pay cost-of-living increases to pensioners if its finances and earnings permit. Because the capital required as cover, and the reserves for fluctuating annual requirements of the pension fund have not yet reached the fixed level, the obligation to pay such cost-of-living increases to the aforementioned beneficiaries has to be borne by the employer. No allowance was made for this situation when the opening balance of SBB AG was drawn up as at 1<sup>st</sup> January 1999. Corresponding negotiations between SBB AG and the Federal Finance Administration commenced at the end of 2000.

# Report of the group auditor

## → Report of the group auditor to the General Meeting of Swiss Federal Railways SBB, Berne

As auditor of the group, we have audited the consolidated financial statements (balance sheet, income statement, statement of cash flows and notes) of Swiss Federal Railways SBB for the year ended December 31, 2000.

These consolidated financial statements are the responsibility of the Board of Directors. Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We confirm that we meet the legal requirements concerning professional qualification and independence.

Our audit was conducted in accordance with auditing standards promulgated by the Swiss profession, which require that an audit be planned and performed to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement. We have examined on a test basis evidence supporting the amounts and disclosures in the consolidated financial statements. We have also assessed the accounting principles used, significant estimates made and the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements give a true and fair view of the financial position, the results of operations and the cash flows in accordance with the Accounting and Reporting Recommendations (ARR) and comply with Swiss law under the following restrictions:

– An external expert opinion containing an assessment of the energy sector in connection with the opening balance sheet of SBB AG as at January 1, 1999 discovered the need for special depreciation on production facilities and an overall provision. Both can only be determined on condition that SBB has defined a new energy strategy with regard to a liberalized energy market. Said strategy has been defined during 2000. The special depreciation and the overall provision can be booked in 2001 (after the Federal authorities have agreed to the amounts) as an adjustment to the opening balance sheet and will be charged – without being recognised in the profit & loss statement of SBB – to the Federal authorities.

– An external expert opinion established the need for a special provision for existing environmental pollution costs of CHF 393 million as at January 1, 1999. Because of the great uncertainties surrounding this special provision an agreement was reached with the Federal authorities to the effect that a full reserve would not be set up in the opening balance sheet but a special provi-

sion of CHF 110 million entered for necessary improvement costs in the years 1999 to 2002. Further costs were accepted by the Federal authorities under the performance agreement applicable from the year 2003.

Despite the above restrictions, we recommend that the consolidated financial statements submitted to you be approved since the financial consequences of the insufficient provisions will be covered by the Federal authorities.

We also wish to draw your attention to the fact that the 100 % investment in AlpTransit Gotthard AG has not been consolidated, but is accounted for under the equity method. On the basis of a special agreement between the Swiss Confederation and the SBB, the Federal authorities have a dominant influence over this investment. The requirements of a common management are therefore not met.

Grants/subsidy for piggyback services and train paths for intermodal traffic	75.1	125.0
<b>Total Grants</b>	<b>620.8</b>	<b>682.9</b>

While passenger kilometres on regional services rose by 123 million, the regional passenger service grant declined by CHF 12.2 million. The grant per passenger kilometre on the SBB network fell from 11.38 CHF in 1999 to 10.25 CHF in 2000.

Unlike the previous year, substantial parts of the subsidies for piggyback services have been paid directly to the transport operator.

Operating grants	587.0	562.0
<b>Total federal government grants for infrastructure</b>	<b>1 316.0</b>	<b>1 273.0</b>

The maintenance grant covers depreciation of existing infrastructure and non-capitalisable investments in new infrastructure.

<b>5 Personnel costs</b>		
Wages and salaries	2 440.7	2 415.7
Social insurance costs	364.6	330.8
Other personnel costs	50.8	43.1
<b>Total personnel costs</b>	<b>2 856.1</b>	<b>2 789.6</b>

The increase is attributable to the rise in the balance of holiday, overtime and annual working hours not taken in connection with the introduction of the 39-hour week, which has been fully deferred for the first time, and to the 1% rise in wages and salaries paid as a cost-of-living increase.

In last year's annual report, the cost of social insurance included interest on the actuarial reserve deficit of the SBB Pension Fund amounting to CHF 200.7 million, in addition to ordinary contributions to staff provident institutions. This interest is now shown under financial expenditure for both years (cf. note 8).

<b>Total other operating costs</b>	<b>1 317.6</b>	<b>1 046.7</b>

All the freight vehicles were contributed to SBB Cargo AG on its establishment against the background of the planned SBB / FS joint venture. Since 1<sup>st</sup> August 2000, SBB AG has therefore had to lease these vehicles back from SBB Cargo AG to perform its services. This has entailed an increase of CHF 29.1 million in vehicle costs. SBB AG depreciation costs have been reduced accordingly.

SBB AG introduced a comprehensive risk finance and insurance programme on 1<sup>st</sup> January 2000, which won the European Risk Management Award. Disaster risks are insured with third parties and electrical interference claims are self-insured. All claims are entered into the new programme systematically and deferred on an actuarial basis. Provisions for uncompleted claims are thus formed. This system changeover has resulted in a one-off increase of CHF 45 million in insurance reserves in the year under review.

The expenses shown against VAT / input tax reduction were shown separately in the previous year. They are mainly attributable to the VAT rules negotiated for public transport operators. Instead of making an across-the-board reduction for input taxes, SBB AG pays 2.7% turnover tax on the grants it receives. As the tax payable is contained in these amounts, this arrangement does not influence the SBB AG profit and loss account.

A provision of CHF 56 million has been created for restructuring and realigning rolling stock maintenance.

Increases in holdings are primarily attributable to the establishment of SBB Cargo AG. The equity of this company was paid up principally by a contribution in kind of fixed assets (predominantly rolling stock) and holdings.

Disposals of holdings arose firstly from the above-mentioned contribution in kind (Chemol Logistics AG, S-Rail Europe GmbH, Hupac SA and ICF Intercontainer-Interfrigo) to SBB Cargo AG and secondly from the sale of holdings (e.g. Elca Informatique SA and CNL-City-Night-Line AG).

The decrease in long-term receivables from the shareholder are due to the payment arrangements agreed in connection with the refinancing of the SBB AG Pension Fund deficit (cf. note 16).

Deferrals for travel documents relate mainly to the General Abonnement, Half-Fare Card and point-to-point season tickets. They do not extend to individual tickets. Unlike the previous year, interest on the SBB Pension Fund actuarial reserve deficit was charged with a value date in the subsequent year. This entailed a corresponding increase in deferred interest expenses. As already mentioned in note 5, the introduction of the 39-hour week and the deferral of the balance of the annual hours worked for the first time have led to a massive increase in the deferrals for holidays and overtime.

The EUROFIMA loans are shown on the balance sheet under liabilities to banks.

Leasing liabilities have increased because the interest payable on leasing contracts has been partly capitalised.

The refinancing of the SBB Pension Fund's actuarial reserve deficit is mirrored in the decrease in liabilities to staff provident institutions. In accordance with the refinancing plan, the federal government has waived CHF 850 million of its credit balance due from SBB AG. A detailed schedule of the liabilities to the federal government as shareholder will be found in the group annual report.

Notes on the provisions for employee benefit plans are contained in the consolidated financial statements.

The provision for rolling stock maintenance covers additional expenditure on vehicle overhaul arising from statutory obligations (e.g. environmental protection). The restructuring costs of the joint venture will accrue in the next 1 to 3 years. The measures for cleaning up existing environmental pollution have been continued in the year under review. The expenses occurring have been charged to short-term provisions. The other provisions relate mainly to earnings from the sale of cable-laying rights and from US leasing transactions (CHF 131.3 million), provisions for the decommissioning of infrastructure (CHF 33.3 million) and other commercially-necessary provisions.

**18 Unappropriated profit**

The unappropriated profit of CHF 266.5 million, consisting of the annual profit of CHF 146.2 million and profit of CHF 120.3 million carried forward includes any reserve under article 64 of the Railways Act (EBG).

**19 Related parties**

In the year 2000, the fees amounted to CHF 0.76 million for the Board of Directors, and 2.6 million for the salaries of the Group Management.

## 21 Events after the balance sheet date

Every member of the SBB Pension Fund who retired before 1<sup>st</sup> January 1999 has a statutory right to the same treatment as members of the federal government pension fund. A similar rule also fundamentally applies to those who first received a pension between 1<sup>st</sup> January 1999 and 1<sup>st</sup> January 2001, at least until the Federal Personnel Act comes into force, i.e. until 1<sup>st</sup> January 2001.

The SBB Pension Fund can only pay cost-of-living increases to pensioners if its finances and earnings permit. Since the capital required as cover, and the reserves for fluctuating annual requirements have not yet reached the amounts fixed, the obligation to pay such cost-of-living increases to the aforementioned beneficiaries must thus be borne by the employer.

No allowance was made for this situation when the opening balance of SBB AG was drawn up as at 1<sup>st</sup> January 1999. Corresponding negotiations between SBB AG and the Federal Finance Administration commenced at the end of 2000.

## 22 Segment report

Unlike the previous year, the segment report on the balance sheet and statement of profit and loss has been shown under the headings of traffic, infrastructure and central divisions. The results of the central divisions have also been classified appropriately, i.e. distributed among the operating result, extraordinary profit and loss and financial profit. The figures from the previous year have been adjusted accordingly. The reconstruction of the divisionalisation in regard to financing leads to considerable shifts among the profit and loss accounts of the individual divisions (e.g. displacement of the responsibility for the staff savings account from infrastructure to central division).

# Report of the statutory auditors

## → Report of the statutory auditors to the General Meeting of Swiss Federal Railways SBB, Berne

As statutory auditors, we have audited the accounting records and the financial statements (balance sheet, income statement, statement of cash flows and notes) of Swiss Federal Railways SBB for the year ended December 31, 2000.

These financial statements are the responsibility of the Board of Directors. Our responsibility is to express an opinion on these financial statements based on our audit. We confirm that we meet the legal requirements concerning professional qualification and independence.

Our audit was conducted in accordance with auditing standards promulgated by the Swiss profession, which require that an audit be planned and performed to obtain reasonable assurance about whether the financial statements are free from material misstatement. We have examined on a test basis evidence supporting the amounts and disclosures in the financial statements. We have also assessed the accounting principles used, significant estimates made and the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the accounting records and financial statements comply with the law and the results of operations and the cash flows in

accordance with the Accounting and Reporting Recommendations (ARR) and comply, as well as the proposed appropriation of available earnings, with Swiss law and the company's articles of incorporation under the following restrictions:

– An external expert opinion containing an assessment of the energy sector in connection with the opening balance sheet of SBB AG as at January 1, 1999 discovered the need for special depreciation on production facilities and an overall provision. Both can only be determined on condition that SBB has defined a new energy strategy with regard to a liberalized energy market. Said strategy has been defined during 2000. The special depreciation and the overall provision can be booked in 2001 (after the Federal authorities have agreed to the amounts) as an adjustment to the opening balance sheet and will be charged - without being recognised in the profit & loss statement of SBB - to the Federal authorities.

– An external expert opinion established the need for a special provision for existing environmental pollution costs of CHF 393 million as at January 1, 1999. Because of the great uncertainties surrounding this special provision an agreement was reached with the Federal authorities to the effect that a full reserve would not be set up in the opening balance sheet but a special provision of CHF 110 million entered for necessary improvement costs in the years 1999 to 2002. Further

costs were accepted by the Federal authorities under the performance agreement applicable from the year 2003.

Despite the above restrictions, we recommend that the financial statements submitted to you be approved since the financial consequences of the insufficient provisions will be covered by the Federal authorities.

We further draw your attention to the fact that the Federal Transport Office – supervisory authority according to art 70 of the Swiss Railway Act (Eisenbahngesetz) – has approved, in a letter dated April 26, 2001, the financial statements 2000 with the following qualification: The operational costs and performance calculation according to art 12 of the ordinance of accounts (REVO) has not yet been established. The final distribution of profit and the establishment of provisions according to art 64 of the Swiss Railway Act (Eisenbahngesetz) will depend on this calculation.
