INVENTÁRIO

A presente lista representa as 46 espécies de Odonata documentadas na Reserva Biológica de Pedra Talhada. A nomenclatura segue a International Commission on Zoological Nomenclature (ICZN - <http://iczn.org>). Estas espécies são agrupadas por **Subordem**, (classificação phylogenética), em seguida, em ordem alfabética por **Família**, **Gênero** e **espécie**, finalmente. Apesar da ocorrência de todas essas espécies, nem todas as fotos são provenientes de indivíduos fotografados na Reserva Biológica de Pedra Talhada mas também de outras localidades do nordeste do Brasil, estando representadas por (*). Isso foi feito para possibilitar uma melhor representatividade das ilustrações das espécies que ocorrem na região.
