3. Two IABSE Colloquia in 1986

Organization of the Design Process

City Hall: Symbol of the City of Frankfurt

**Frankfurt, Fed. Rep. of Germany
May 12–14, 1986**

In cooperation with the
IABSE Group of the Fed. Rep. of Germany
Deutscher Beton-Verein
Deutscher Stahlbau-Verband

and in association with
Verband Beratender Ingenieure
Verband Unabhängiger Beratender Ingenieurfirmen

Thin-Walled Metal Structures in Buildings

**Stockholm, Sweden
June 9–12, 1986**

In cooperation with the
Swedish Group of IABSE
Swedish Institute of Steel Construction
European Convention for Constructional Steelwork

4. Tenth International Congress of the FIP

New Delhi, India, 16 – 21 February 1986

The Tenth Quadrennial Congress of the Fédération Internationale de la Précontrainte (FIP) will be an event of special significance, for it will be the first such congress to be held in Asia.

It is appropriate that India, as a leading user of structural concrete in the Eastern hemisphere, should be the host for the Tenth FIP Congress.

The Congress, which will be held at New Delhi from 16 – 20 February, 1986 is being organised by the Institution of Engineers (India), in cooperation with FIP.

A very relevant theme, «Structural Concrete in The Developing World», has been selected by FIP for this Congress. The technical sessions will provide a forum for exchanging ideas and for discussing new and innovative practices in structural concrete across the developing world which includes both the so called developing countries and the industrialised nations, which are also still developing. These sessions will highlight recent developments in the industrialised West, as well as the experience of many countries in Asia, Africa and South

America which have witnessed spectacular progress in the field.

The «Concrete '86» exhibition will be held concurrently with the congress, and will provide a forum for furthering the development of the structural engineering profession.

Separate programmes are being organised for delegates and persons accompanying them, as well as social events in the evenings. In addition, there will be pre-congress and post-congress tours which will serve as an introduction to the rich cultural traditions of this country. These tours will also include visits to civil engineering projects of interest to the delegates.
