Durability of Structures

**Report of the IABSE Symposium Lisbon
September 1989**

Too little attention is devoted to the durability of structures during their design and construction. The economical and financial consequences of such a behaviour will then come up in a very surprising manner and often much sooner than expected. The Symposium Report contains 140 technical contributions from specialists who propose solutions in the following fields:

- General Durability Aspects from Preliminary Design to Demolition
- Influence of Material Properties on the Durability of Structures
- Durability Aspects in Design, Detailing and Construction
- Durability Aspects in Maintenance, Repairs, Rehabilitations and Alterations

2 volumes 57/1 and 57/2 with 140 contributions, of which 109 in English, 12 in French and 19 in German. Summaries of all articles in English, French and German. 955 pages and numerous illustrations. ISBN 3-85748-057-9. Price for IABSE members: SFr. 126.-, price for non members SFr. 189.-.

Expert Systems in Civil Engineering

**Report of the IABSE Colloquium Bergamo
October 1989**

Civil engineers have developed expert systems and knowledge based solutions, corresponding to the needs of the profession. This development and the possibilities and experience gained by the application of expert systems are described. The colloquium report contains contributions to the following chapters:

- Expert System Technologies
- Expert System for Operation, Maintenance and Damage Assessments of Structures
- Expert Systems for Design and Construction
- Expert Systems for Codes and in other Areas of Civil Engineering

38 contributions in English. Summaries of all articles in English, French and German. 432 pages with numerous illustrations. ISBN 3-85748-058-0. Price for IABSE members: SFr. 72.-, price for non members: SFr. 108.-.
