TECHINT

Engineers & Contractors

The following is an outline of primary fields of past and present activities:

- Design, supply and construction of Public Utilities:
Bridges, Highways and Roads
Tunnels, Airports, Ports
Hydroelectric and Thermoelectric Power Plants
High Voltage Transmission Lines and Substations
Water and Waste Treatment Plants;
Hospitals, Education Centres and Welfare Institutions
- Systems Engineering and Computer Services.
- Planning, design, procurement,
construction, start-up and management of:
Iron and Steel Plants, Pipe Mills, Foundries and
Direct Reduction Plants;
Refineries, Petrochemical and Chemical Plants
Oil and Gas Lines, Pumping Stations, Tank Farms
Marine Installations.

Santa Rita (Brazil) Cement Plant

The Wild NA2 handles everything.

It's the Universal Automatic Level.

A single instrument for a wide variety of tasks: the Wild NA2 Universal Automatic Level gives the right solution in every case.

It's precise – the compensator sets the line of sight to $\pm 0.3''$. It's sure – the push button provides an instant check on the functioning of the compensator. And it's powerful – the erect-image telescope with large objective and high magnification gives accurate readings.

There is also the model NAK2. This has a glass circle which is read to 0.1' for measuring angles, setting out, and tacheometric levelling.

The accessories are outstanding. With the GPM3 Parallel Plate Micrometer, readings are taken digitally to 0.1 mm, and by estimation to 0.01 mm. Foot and inch versions are available. The NA2 with micrometer is perfect for precise levelling, deformation measurements and optical tooling. For plumbing or defining vertical planes, just slip on the objective pentaprism. And for laser levelling and alignment tasks, connect up the GLO Laser Eyepiece. Of course there are other accessories such as the short focussing lens and autocollimation eyepiece.

Why not write for brochure G1 180e? Find out how the NA2 handles all levelling work, quickly, reliably and precisely.
