### **Nutzungsbedingungen**

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

### **Conditions d'utilisation**

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. [En savoir plus](#)

### **Terms of use**

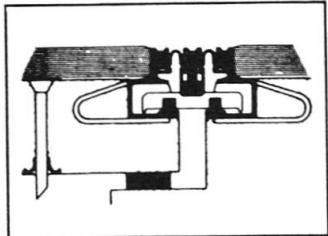

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. Publishing images in print and online publications, as well as on social media channels or websites, is only permitted with the prior consent of the rights holders. [Find out more](#)

**Step by step into the future.**

**With Wild instruments into the informatics-age.**

Anyone who has decided to buy a Wild DISTOMAT DI4, DI4L, DI5 or DI20 can now benefit from a further development.

In a DI4, DI4L or DI5, you not only have the smallest infra-red distancer, and in the DI20 the most accurate DISTOMAT with the greatest range, but also the first module of an informatics-age instrument system.

Fit the DISTOMAT on the T2000. The Wild T2000 informatics theodolite supplies it with power, controls it electronically and instantly displays angles and distances, heights and coordinates, paired in various convenient ways.

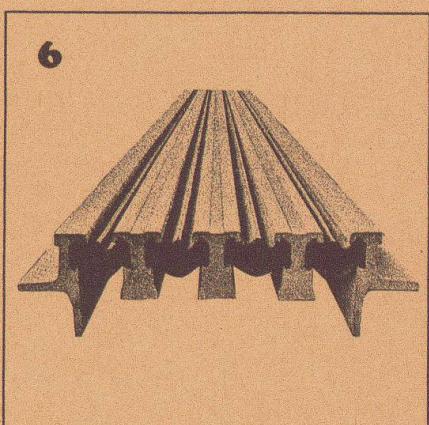

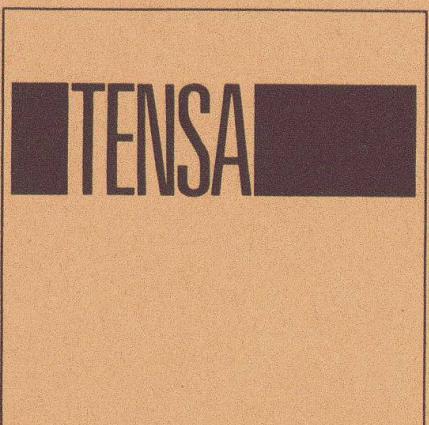

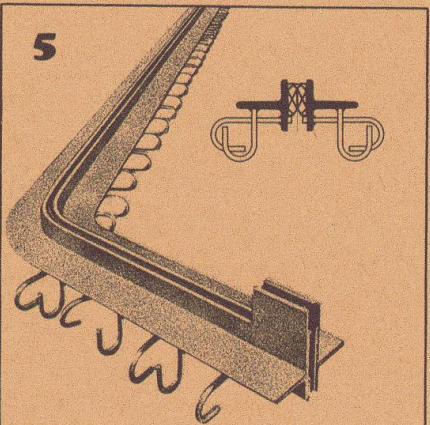

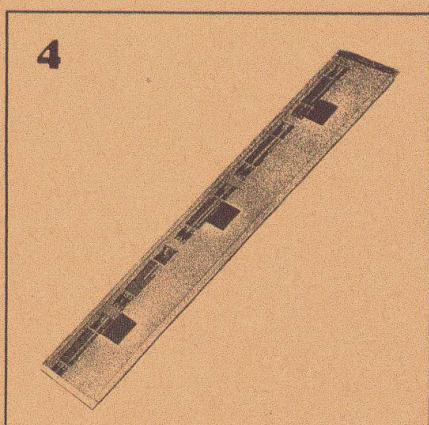

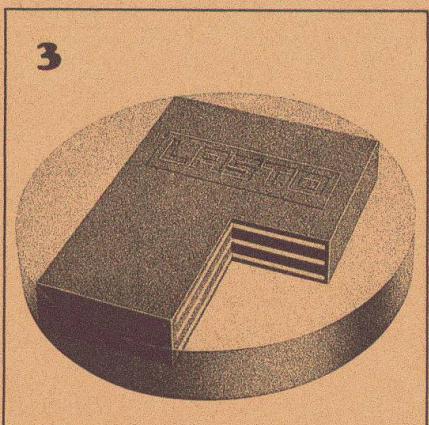

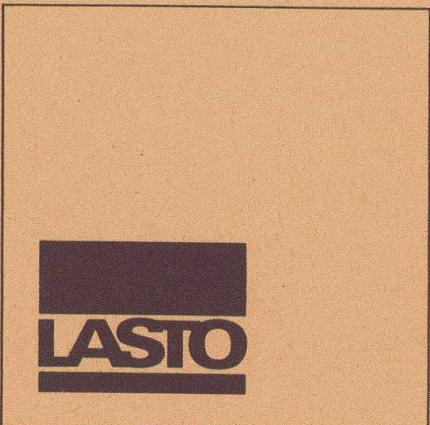

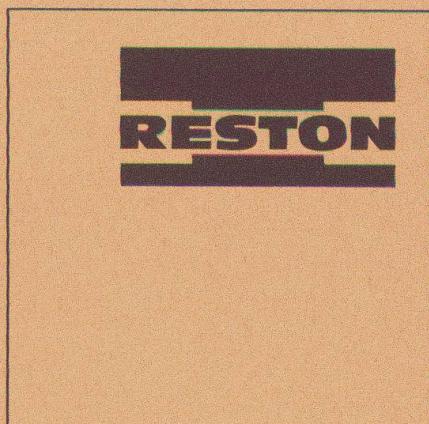

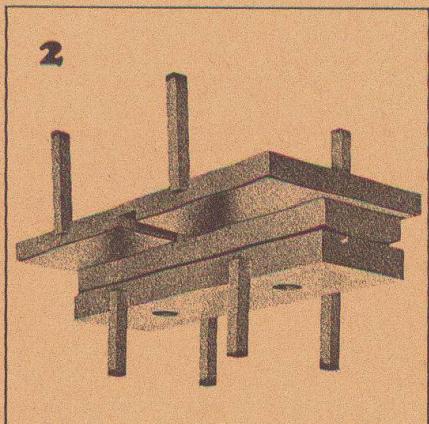

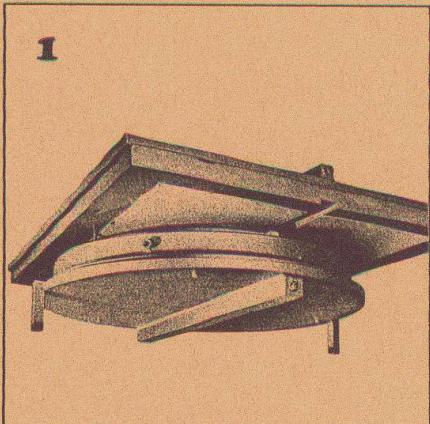

With tracking, setting-out and traverse programs, the T2000/DISTOMAT combination is a high-performance, high-precision field-survey system.

Add the user-programmable GRE3 data terminal and you have a data-acquisition and data-handling system that makes the vast capabilities of the informatics age available to you. ■

**1**  
**RESTON Pot Sliding Bearings**  
are highly suitable for installation in bridge structures. They feature a low-profile design, low weight and high loading capacity.

**2**  
**RESTON Linear Tilting and Sliding Bearings**  
are a combination of normal linear tilting bearings and PTFE sliding bearings and are suitable for installation in bridge structures.

PROCEQ SA  
Riesbachstrasse 57  
CH-8034 Zurich

**3**  
**LASTO-BLOCK Bearings**  
are suitable for building, civil engineering and bridge construction applications. Their simple form allows easy installation.

**4**  
**LASTO-STRIP Bearings for Buildings**  
were especially developed for building constructions. They are particularly suitable for movement compensation between concrete slabs and load-supporting walls and prevent structural cracking.

**5**  
**TENSA-ACME Roadway Construction Joints**  
are highly suitable for installation in traffic levels (parking lots, bridges, airport areas etc.). Dilatation up to 60 mm.

**6**  
**TENSA-LASTIC Roadway Construction Joints**  
meet all the requirements that can be made in bridge engineering of a modern joint design. They are rugged and watertight. Dilatation range 60 mm and bigger.
