Nutzungsbedingungen

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

Conditions d'utilisation

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. [En savoir plus](#)

Terms of use

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. Publishing images in print and online publications, as well as on social media channels or websites, is only permitted with the prior consent of the rights holders. [Find out more](#)

Bucheingänge

STEPHEN S. SHATZ, **Profinite Groups, Arithmetic, and Geometry.** Annals of Mathematics Studies Nr. 67. Princeton University Press and University of Tokyo Press 1972, 252 pp. \$ 8.50.

I. Profinite groups – II. Cohomology of profinite groups – III. Cohomological Dimension – IV. Galois cohomology and field theory – V. Local class field theory – VI. Duality.

R. A. ANDERSON, **Symposium of Infinite Dimensional Topology,** Annals of Mathematics Studies Nr. 69. Princeton University Press and University of Tokyo Press 1972, 300 pp., \$ 9.00.

Contributions of: G. Glaeser, A. Granas, D. W. Henderson, R. B. Holmes, R. C. James, G. St. Jones, R. J. Knill, N. H. Kuiper, J. Leray, J. Lindenstrauss, E. H. Rothe, R. Y. T. Wong.

JOHN MILNOR, **Introduction to Algebraic K-Theory.** Annals of Mathematics Studies Nr. 72. Princeton University Press and University of Tokyo Press 1972, 184 pp., \$ 6.25.

Preface and Guide to the Literature. 1. Projective Modules and K_0A – 2. Constructing Projective Modules – 3. The Whitehead Group K_1A – 4. The Exact Sequence Associated with an Ideal – 5. Steinberg Groups and the Functor K_2 – 6. Extending the Exact Sequences – 7. The Case of a Commutative Banach Algebra – 8. The Product $K_1A \otimes K_1A \rightarrow K_2A$ – 9. Computations in the Steinberg Group – 10. Computation of K_2Z – 11. Matsumoto's Computation of K_2 of a Field – 12. Proof of Matsumoto's Theorem – 13. More about Dedekind Domains – 14. The Transfer Homomorphism – 15. Power Norm Residue Symbols – 16. Number Fields. – Appendix: Continuous Steinberg Symbols.

G. O. OKIKIOLU, **Aspects of the Theory of Bounded Integral Operators in L^p -Spaces.** Academic Press, London – New York 1971, 522 p. £ 10.00, \$ 29.00.

1. Normed Linear Spaces: Banach Spaces and Hilbert Spaces – 2. The Lebesgue Integral – 3. L^p -Spaces – 4. Inequalities for Integral Operators – 5. Special Techniques: Interpolation Theorems and Rearrangements – 6. Fourier Transforms and Related Integral Operators – 7. The Hilbert Transform and Singular Integrals – 8. Special Topics: Equivalent Functional Relations; Vector-valued Functions; Semi-groups of Operators.

FRANZ VETTIGER, **Algorithmen und Rechenautomaten im Schulunterricht.** 112 S. Fr. 13.80. Räber Verlag, Luzern und Stuttgart 1971. Einzelschriften zur Gestaltung des mathematisch-physischen Unterrichtes, Heft 7.

1. Algorithmen – 2. Rechenautomaten – 3. Programmierung von Rechenautomaten – 4. Einfache Programme aus der numerischen Mathematik.

F. HIRZEBRUCH, LARS HÖRMANDER, JOHN MILNOR, JEAN-PIERRE SERRE, and I. M. SINGER, **Prospects in Mathematics,** Annals of Mathematics Studies Number 70. Princeton University Press and University of Tokyo Press 1971. \$ 6.00.

F. HIRZEBRUCH: Reminiscences and Recreations. – L. HÖRMANDER: The Calculus of Integral Operators. – J. MILNOR: Symmetric Inner Products in Characteristic 2. – J.-P. SERRE: Cohomologie des Groupes Discrets. – I. M. SINGER: Future Extensions of Index Theory and Elliptic Operators.

BARRY SIMON, **Quantum Mechanics for Hamiltonians Defined as Quadratic Forms.** Princeton Series in Physics. Princeton University Press 1971.

I. The Rollnik Condition – II. The Hamiltonian – III. Bound States – IV. Time-Dependent Scattering Theory – V. Time-Independent Scattering Theory – VI. Analytic Scattering Theory – VII. Multiparticle Systems. – Appendix.

ELIAS M. STEIN and GUIDO WEISS, **Introduction to Fourier Analysis on Euclidean Spaces.** Princeton Mathematical Series Nr. 32. 296 pp. Princeton University Press 1971.

I. The Fourier Transform – II. Boundary Values of Harmonic Functions – III. The Theory of H^p Spaces on Tubes – IV. Symmetry Properties of the Fourier Transform – V. Interpolation of Operators – VI. Singular Integrals and Systems of Conjugate Harmonic Functions – VII. Multiple Fourier Series.

HENRY B. LAUFER, Normal Two-Dimensional Singularities. *Annals of Mathematics Studies Number 71.* Princeton University Press 1971, \$7.00

I. Resolution of Plane Curve Singularities – II. Resolution of Singularities of Two-Dimensional Analytic Spaces – III. Normalization of Two-Dimensional Analytic Spaces – IV. Exceptional Sets – V. Minimal Resolutions – VI. Equivalence of Embeddings – VII. The Local Ring Structure.

FRITZ RUDOLF GUENTSCH und H.-J. SCHNEIDER, Einführung in die Programmierung digitaler Rechenautomaten. Dritte, völlig neu bearbeitete Auflage, 320 Seiten DM 58,-, Walter de Gruyter, Berlin - New York 1972.

1. Einführung – 2. Programmstruktur – 3. Maschinenprogrammierung (TR 440) – 4. Assemblierer – 5. Ergänzung zu ALGOL 60 – 6. Problemorientierte Programmiersprachen – 7. Kompilierer – 8. Maschinenorientierte Formulierung von Unterprogrammen – 9. Simultanarbeit – 10. Betriebssysteme.

HARALD CRAMÉR, Structural and Statistical Problems for a Class of Stochastic Processes. The first Samuel Stanley Wilks lecture at Princeton University, March 17, 1971. Princeton University Press 1971, \$ 1.50.

Hindustan Publishing Corpn. (India) 17 U.B. Jawahar Nagar DELHI-7: International Monographs on Advanced Mathematics and Physics.

A. O. GEL'FOND, Calculus of Finite Differences (Authorized English translation of the third Russian edition). 452 pp., October 1971, US\$10.00.

Introduction – I. The Interpolation Problem – II. Newton's Series – III. Construction of an Entire Function with Specified Elements – IV. The Summation of Functions. Bernoulli's Numbers and Polynomials – V. Finite Difference Equations.

L. A. LUSTERNIK and V. J. SOBOLEY, Elements of Functional Analysis (Authorized English translation revised and corrected edition) 322 pp., October 1971, US\$ 8.00.

I. Metric Spaces – II. Linear Spaces and Linear Operators – III. Linear Functionals – IV. Completely Continuous Operators – V. Elements of Spectral Theory of Self-Adjoint Operators on Hilbert Spaces – VI. Some Problems of Non-Linear Functional Analysis.

P. M. COHN, Free Rings and Their Relations. London Mathematical Society Monographs No. 2. Academic Press. London and New York, 346 pp. 1971, £7.00, \$ 19.50.

0. Preliminaries – 1. Firs (=free ideal rings), semifirs and n -firs – 2. The weak algorithm – 3. Factorization – 4. Rings with a distributive factor lattice – 5. Linear algebra over firs and semifirs – 6. Central elements and subrings – 7. Skew fields of fractions – 8. Principal ideal domains – Appendix.

HANS-JÜRGEN ZIMMERMANN, Netzplantechnik. Slg. Göschen 4011, 156 Seiten mit 83 Abbildungen. Walter de Gruyter, Berlin – New York 1971, DM 7,80.

Stärken und Schwächen der konventionellen Planungsverfahren. – 2. Entwicklung und Grundlagen der Netzplantechnik – 3. Das Aufstellen und die Berechnung von Netzplänen – 4. Zeitliche und kapazitiv Beschränkungen und kostenoptimale Netzpläne – 5. Sonderprobleme der Netzplantechnik.

Computers and Computation, Readings from SCIENTIFIC AMERICAN with Introductions by ROBERT R. FENICHEL and JOSEPH WEIZENBAUM. W. H. Freeman and Company, \$ 4.95.

I. Fundamentals – II. Games, Music, and artificial Intelligence – III. Mathematics of, by, and for Computers – IV. Computer Models of the real World – V. Four Essays on the Uses of the Computer.

MARTIN GARDENER, Martin Gardner's Sixth Book of Mathematical Games from Scientific American. x+262 pp 184 illustrations, 1972, W. H. Freeman and Company. £ 2.90.

Yale Mathematical Monographs, Yale University Press, New Haven and London.

Nr. 1 ROBERT P. LANGLANDS, **Euler Products.** 54 pp., £ 1.45, 1972.

1. Introduction – 2. Some Euler Products – 3. Spherical Functions – 4. The Formula of Gindikin and Karpelevich – 5. A Review of Eisenstein Series – 6. Examples.

Nr. 2 ELIAS M. STEIN, **Analytic Continuation of Group Representations,** 36 pp., £ 1.45, 1972.

1. Introduction – 2. $SL(2, C)$ – 3. The Intertwining Operators – 4. The Reflections – 5. The Other Complex Classical Groups.

Nr. 3 MICHAEL ARTIN, **Algebraic Spaces,** 40 pp., £ 1.45, 1972.

1. Algebraic Functions – 2. Algebraic Spaces – 3. Construction Techniques – 4. Modifications – References.

Nr. 4 JOHN STALLINGS, **Group Theory and Three-Dimensional Manifolds,** 66 pp., 1972, £ 1.45.

1. Background and Significance of Three-Dimensional Manifolds – 2. Three-Dimensional Manifolds – 3. Combinatorial Group Theory – 4. The Theory of Ends – 5. Conclusions. – References.

GEORGE GRÄTZER, Lattice Theory, First Concepts and Distributive Lattices, xv + 212 pages, 58 illustrations, 1972. W. H. Freeman and Company, San Francisco, £ 4.00, \$ 9.00.

1. First Concepts – 2. Distributive Lattices – 3. Distributive Lattices with Pseudocomplementation.

Pubblicazione dell'Istituto Nazionale di Alta Matematica: **Symposia Mathematica, Volume VII.** Academic Press London and New York 1971, 584 pp., £ 10.50.

I. Problemi di Evoluzione, 11–14 Maggio 1970 – II. Equazioni Ipoellittiche e Spazi Funzionali, 25–28 Gennaio 1971.

HARTMUT EHRIG, Michael Pfender und Studenten der Mathematik und Informatik: Kategorien und Automaten. deGruyter Lehrbuch 170 Seiten, 1972. DM 24,- Walter de Gruyter, Berlin – New York.

Inhalt: Kategorien – 2. Automaten – 3. Limites in Kategorien – 4. Universelle Konstruktionen von Automaten – 5. Funktoren, Limites und Adjungierte Funktoren – 6. Schaltoperationen und Zerlegungen.

Université de Grenoble – Summer School of Theoretical Physics – Les Houches 1970, **Statistical Mechanics and Quantum Field Theory,** edited by C. DeWITT and R. STORA. Gordon and Breach

Contents: J. GLIMM, A. JAFFE: Quantum Field Theory Models – O. E. LANFORD III: Selected topics in Functional Analysis – D. RUELLE: Equilibrium Statistical Mechanics of Infinite Systems – R. B. GRIFFITHS: Phase Transitions – E. H. LIEB: Models in Statistical Mechanics – J. GINIBRE: Some Applications of Functional Integration in Statistical Mechanics – K. HEPP: Renormalization Theory – H. EPSTEIN, V. GLASER: Le Rôle de la Localité dans la Renormalisation Perturbative en Théorie Quantique des Champs.

R. P. GILLESPIE, **Solving Problems in Advanced Calculus I.** 156 S. 1972, Oliver & Boyd, Edinburgh, £ 1.50.
