## II. HEADQUARTERS ACTIVITIES

### SUPPORT FOR ACTIVITIES THROUGHOUT THE WORLD

#### Function and structure of Operations Department

As mentioned in the 1978 Annual Report (page 47), the task of the Operations Department is essentially to conduct the operations which the ICRC undertakes in the field for victims of conflicts or of related situations, pursuant to decisions of the Assembly or, more generally, of the Executive Board. It also proposes action to the Executive Board.

A new "support service" was set up in 1979, the "Liaison with National Societies and Governments" (LNSG). The main aim of this service is to improve the exchange of information between the ICRC and the National Societies relating to current operations and the possibility of obtaining personnel and material or financial assistance from the National Societies.

#### Relief Division

The tables given on pages 60, 61 and 62 illustrate the ICRC relief activities in 1979. Forty-five countries received 30,040 tons of supplies to a total value of 55 million Swiss francs. This amount includes specially financed actions and material aid donated by the EEC and the Swiss Confederation.

The specially financed actions undertaken by the ICRC with the support of governments, National Societies and various organizations amounted to 33.7 million Swiss francs for a total of 22,360 tons of supplies. These were forwarded to areas concerned, either by the ICRC or by the donors themselves, under ICRC supervision.

In addition to this, aid was given by the EEC and the Swiss Confederation. Thanks to agreements concluded with them, 17 countries received food aid to a value of 21.3 million Swiss francs (i.e. 7,680 tons of supplies).

Assistance to "political" detainees and their families amounted to 509,550 Swiss francs (not including the aid given to detainees and families coming under the "specially financed actions").

Finally, twelve National Societies received financial aid from the ICRC for a total value of 307,120 Swiss francs.

## Medical Division

The steps taken in 1978 to increase the efficiency of the Medical Division in emergency actions have born fruit, both for the despatching of medicine and the use of personnel provided by National Societies.

In 1979 the Medical Division sent 511 doctors and paramedical personnel in the field, 388 of whom were provided by the National Societies. In the ICRC depots standard packages were prepared (medicine, bandaging material, etc.) to a value of about 2 million Swiss francs and these enabled prompt action to be taken during emergencies in the field.

Action for the benefit of the war-disabled has been expanded and the pilot projects of Debré Zeit in Ethiopia (see page 24), and Humabo in Angola (see page 19), have been worthwhile experiences. They have opened new horizons in artificial limb production by a technique suited to local conditions.

## Detention Service

The Detention Service maintains the central captivity records up-to-date. This is done by classifying information given by delegates after their visits to places of detention. It also collects documents from various organizations concerned with penitentiary problems. In 1979 it recorded more than 3,780 visits to persons deprived of freedom.

The Detention Service processes all reports on visits to detainees before they are sent, in strict confidence, to the respective authorities. Historical research connected with captivity carried out by this Service last year enabled it to supply information to various institutions conducting studies on detention of persons captured during the Second World War.

In 1979 the Head of the Detention Service made several surveys for and of the operations carried out in Africa. He also participated in choosing and training future delegates to visit prisons (course on the methods of visiting), and during seminars and conferences he dealt with certain problems relating to detention and the prevention of torture.

Telecommunication Service

Six new radio stations were brought into operation in 1979 by the ICRC: in Teheran on 20 February, in San Salvador on 15 October, and four in Thailand, i.e. at Bangkok on 27 October, Aranyaprathet on 29 October, Sa Kaeo on 30 October and Kamput in December.

Three local stations serving as radiotelephonic links were set up in El Arish (Egypt) in August, in Leon (Nicaragua) in July (closed down in August), and in Moundou (Chad) in October.

ICRC radio stations and planes maintained contact during operations in Chad, Rhodesia, Thailand and elsewhere.

The number of VHF connections (short range portable or fixed transmitting-receiving sets) have continued to increase. Networks have been set up in the Lebanon, Rhodesia, Israel and Thailand. Sets were operated in Chad and Zambia. By 31 December about one hundred VHF sets and 50 HF (long range transmitting-receiving sets) were in the field.

*(The World Administration Radio Conference and the 1979 TELECOM exhibition are dealt with on pages 69 and 82.)*

At the end of 1979 the ICRC radiocommunication network could be illustrated as follows:
