INTRODUCTION

Le document de travail présenté ici constitue la première partie d'une révision de la bibliographie sur les Limoniidae de la zone paléarctique. Son but est de faire le point sur les connaissances systématiques et faunistiques de la famille et il offre une liste exhaustive des publications sur le sujet.

Cette première partie se concentre sur les publications de 1900 à 1982 pour la zone ouest-paléarctique, définie d'après OOSTERBROEK, 1978. La liste des articles couvre l'ensemble de la famille; par contre, le dépouillement par espèce ne comprend ici que la sous-famille des Limoniinae.

Les publications d'ALEXANDER sur la zone considérée ne sont pas contenues dans ce travail, ayant déjà été indexées par OOSTERBROEK & al. 1980. Nous avons par contre recensé celles de SAVTSHENKO, bien que la plupart d'entre elles concernent la zone est-paléarctique. L'œuvre de cet auteur est en effet indispensable à une approche moderne de la systématique des Limoniidae.

Les catalogues suivants n'ont pas été exploités au niveau des espèces, bien qu'étant compris dans la liste des publications:

COE & al. 1950

KERTESZ, 1902

KERTESZ & al. 1903

KLOET & al. 1976

MENDL, 1978 a

NIELSEN, 1967

STARY, 1970

TJEDER, 1955 b

Remarques

Liste des publications

Les publications sont citées dans l'ordre alphabétique (chronologiquement pour un même auteur). Les articles donnant des renseignements faunistiques sur un pays précis portent après le titre, entre [], le sigle du pays concerné.

INTRODUCTION

This working document represents the first part of a revision of the bibliography for the Limoniidae of the palaeartic region. Its object is to take stock of the systematic and faunistic data on the family, and it provides an exhaustive list of the publications on the subject.

This first part concentrates on the publications from 1900 to 1982 for the western palearctic region, as defined by OOSTERBROEK, 1978. The list of articles covers the family as a whole; on the other hand, the examination according to species is only concerned here with the subfamily of the Limoniinae.

ALEXANDER's publications on the region in question are not included in the present work, since they have already been indexed by OOSTERBROEK & al. 1980. We have, however, taken into account SAVTSHENKO's, although most of them concern the eastern palearctic region. SAVTSHENKO's work is indeed indispensable for a modern approach to the systematics of the Limoniidae.

The following catalogues have not been made use of as far as species are concerned, although they are included in the list of publications:

COE & al. 1950

KERTESZ, 1902

KERTESZ & al. 1903

KLOET & al. 1976

MENDL, 1978 a

NIELSEN, 1967

STARY, 1970

TJEDER, 1955 b

Comments

List of publications

The publications are given in alphabetical order (chronologically for each author). The articles providing faunistic information on one particular country are marked with the

Liste des espèces citées

Les espèces et les auteurs sont cités dans l'ordre alphabétique. En plus des citations simples (nom de l'espèce sans symbole), certaines indications ont été mises en évidence (nom de l'espèce suivi par un des symboles suivants):

A : dessin de l'aile
C : clé de détermination
D : description de l'espèce
DG : description du genre
GF : dessin du genitalia femelle
GM : dessin du genitalia mâle
L : description de la larve (avec ou sans dessins), indications sur la biologie de l'espèce
OD : description originale

Les espèces sensu..., entre [] dans la liste des espèces, étant souvent de fausses déterminations, ne sont pas reprises dans l'ordre alphabétique, ni dans la liste des espèces, ni dans celle des références, sauf dans quelques cas (illustrations de genitalia, citations nombreuses, etc.). Dans la liste des références, les var. sont citées sous le nom de l'espèce.

Distribution des Limoniinae ouest-paléarctiques

Etablie sur la base de la bibliographie.

Liste synonymique des Limoniinae de la zone paléarctique ouest

Tous les Limoniinae recensés jusqu'à présent dans la zone considérée sont reportés sur cette liste, dans l'ordre alphabétique. Les bonnes espèces figurent au premier rang, tandis que les synonymes sont placés en retrait. Les synonymes concernant une espèce donnée sont précédés par = et la suivent immédiatement. Ils sont repris dans la liste alphabétique, avec l'indication du "senior synonym".

symbol of the country concerned between [], after the title.

List of species included

The species and the authors are listed in alphabetical order. In addition to simple references (name of the species without symbol), certain details have been indicated (name of the species followed by one of the following symbols):

A : drawing of the wing
C : key for determination
D : description of the species
DG : description of the genus
GF : drawing of the female genitalia
GM : drawing of the male genitalia
L : description of the larva (with or without drawings) details of species' biology
OD : original description

The species sensu ..., mostly misidentifications, in [] on the list of species, are not listed alphabetically neither in list of species nor in list of references, except for any cases (figures of genitalia, numerous citations, etc.). In the list of references, var. are cited under the name of species.

Distribution of the western palaeartic Limoniinae

Established on the basis of the bibliography.

Synonymical list of the western palaeartic Limoniinae

All the Limoniinae registered up till now in the region in question appear in this list, in alphabetical order. The good species are shown first, while the synonyms are given beside. The synonyms concerning any one given species are preceded by = and follow it immediately. They are taken up again in the alphabetical list, with the mention of senior synonym.

Note

Depuis 1982, de nouvelles publications ont paru, et de nouvelles espèces ont été décrites. Ces adjonctions, ainsi que quelques modifications et compléments au présent travail, seront publiées avec l'analyse bibliographique des autres sous-familles des Limoniidae (Pediciinae, Hexatominae et Eriopterinae).

Note

Since 1982, new publications have appeared, and new species have been described. These additions, along with some modifications and complements to the present work, will be published with the bibliographical analysis of the other subfamilies of the Limoniidae (Pediciinae, Hexatominae, Eriopterinae).
