Herausgeber: Commission Internationale de l'Enseignement Mathématique
Band: 21 (1975)

Rubrik: BULLETIN BIBLIOGRAPHIQUE

Nutzungsbedingungen

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

Conditions d'utilisation

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. [En savoir plus](#)

Terms of use

The ETH Library is the provider of the digitised journals. It does not own any copyrights to the journals and is not responsible for their content. The rights usually lie with the publishers or the external rights holders. Publishing images in print and online publications, as well as on social media channels or websites, is only permitted with the prior consent of the rights holders. [Find out more](#)

BULLETIN BIBLIOGRAPHIQUE

Mathematical Methods in Queueing Theory. — Proceedings of a Conference at Western Michigan University, May 10-12, 1973. — Edited by A. B. Clarke. — Lecture notes in economics and mathematical systems, 98. — Un volume broché, $16,5 \times 24$, de 374 pages, avec figures. — Prix: DM 28.00. — Springer Verlag, Berlin/Heidelberg/New York, 1974.

Contient 18 articles de: Marcel F. Neuts, R. L. Disney and W. P. Cherry, J. Keilson, G. F. Newell, N. U. Prabhu, L. Taacs, T. P. Bagchi and J. G. C. Templeton, U. N. Bhat, C. M. Harris, R. Loulou, S. R. Neal and A. Kuczura, M. J. Sobel, S. Stidham, and N. U. Prabhu, V. L. Wallace, W. Whitt, D. J. Daley, P. Purdue, S. G. Mohanty.

Waclaw SIERPINSKI. — **Œuvres choisies.** — Tome 1. — Bibliographie, théorie des nombres et analyse mathématique. — Publié par les soins de Stanislaw Hartman et Andrzej Schinzel. — Un volume relié, $17,5 \times 24,5$, de 300 pages, avec portrait et figures. — Warszawa, PWN — Editions scientifiques de Pologne, 1974.

Kazimierz Kuratowski: Waclaw Sierpinski. — Liste des publications de Waclaw Sierpinski. — *Théorie des nombres*: Andrzej Schinzel, les travaux de W. Sierpinski sur la théorie des nombres. — Suivi de 10 articles de l'auteur. — *Analyse mathématique*: Stanislaw Hartman, les travaux de W. Sierpinski sur l'analyse. — Suivi de 10 articles de l'auteur.

Proceedings of the second international conference on the theory of groups. — Australian National University, August 13-24, 1973. — Edited by M. F. Newman. — Lecture notes in mathematics, 372. — Un volume broché, $16,5 \times 24,5$, de 740 pages, avec figures. — Prix: DM 48,50. — Springer Verlag, Berlin/Heidelberg/New York 1974.

Contient 73 articles en anglais, 2 articles en allemand et 1 en français.

Bruno de FINETTI. — **Die Kunst des Sehens in der Mathematik.** — Aus dem Italienischen übersetzt von Lulu Bechtolsheim. — Italienische Originalausgabe: Il « saper vedere » in matematica. — Wissenschaft und Kultur, 28. — Un volume relié, $19,5 \times 22,5$, de 91 pages, avec figures. — Prix: FS 28.00. — Birkhäuser Verlag, Basel/Stuttgart, 1974.

Dix-huit chapitres suivis de: « Übungen und Probleme » et « Didaktische Bemerkung für den Lehrer ».

Wolfgang FRANZ. — **Topologie.** — Bd. II: Algebraische Topologie. — 2. verbesserte Auflage. — Sammlung Göschen, 7182. — Un volume broché, de 154 pages, avec figures. — Prix: DM 14.80. — W. de Gruyter, Berlin/New York, 1974.

Simplizialkomplexe: Geometrie des Simplizialkomplexes: Homologie- und Kohomologiegruppen. — *Kettenkomplexe und ihre Anwendungen*: Allgemeine Theorie; Freie Kettenkomplexe. — *Zellkomplexe, Invarianz*: Zellkomplexe; Invarianz der Homologiegruppen. — *Ausbau der Theorie*: Produkte in Polyedern; Mannigfaltigkeiten; Der Homologierung einer Mannigfaltigkeit.

Albert BADRIKIAN; Simone CHEVET. — **Mesures cylindriques, espaces de Wiener et fonctions aléatoires gaussiennes.** — Lecture notes in mathematics, 379. — Un volume broché, $16,5 \times 24$, de x, 383 pages. — Prix: DM 32.00. — Springer, Berlin/Heidelberg/New York, 1974.

Mesure de Wiener. — Mesures cylindriques dont l'image est une mesure de Radon. — Conditions géométriques de concentration cylindrique. — Trajectoires des processus linéaires associés aux mesures de Radon. — Application à la mesure cyclique gaussienne normale sur un Hilbert. — Quelques exemples d'ensembles bornés et d'ensembles de continuité. — G. B. ensembles, G. C. ensembles, épaisseur mixte et ε -entropie. — Compléments sur les probabilités de Radon gaussiennes.

Théories de l'information. — Actes des rencontres de Marseille-Luminy, 5 au 7 juin 1973. — Edité par J. Kampé de Fériet et C. F. Picard. — Lecture notes in mathematics, 398. — Un volume broché, $16,5 \times 24$, de 201 pages, avec figures. — Prix: DM 23.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 14 exposés de J. Kampé de Fériet, C. Langrand, J. Losfeld, H. Nguyen-Trung, J. Sallantin, C. Bertoluzza et M. Schneider, W. Hengartner et R. Theodorescu, N. Aggarwal, M. Deza, S. Petolla et C. Picard, B. Bouchon, G. Petolla, Y. Cesari, D. Tou-nissoux.

Functional analysis and its applications. — International conference, Madras, 1973. — Ed. by H. G. Garnir, K. R. Unni and J. H. Williamson. — Lecture notes in mathematics, 399. — Un volume broché, $16,5 \times 24$, de 586 pages, avec figures. — Prix: DM 44.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 42 exposés de C. A. Akemann, R. A. Alo and André De Korvin, J. T. Burnham, L. Collatz, J. G. Dhombres, Ph. A. Dionne, M. M. Dzhrbashyan, Le Baron O. Ferguson, J. P. Ferrier, S. H. Fesmire, G. Freud, D. Gaier, H. G. Garnir, B. R. Gelbaum, A. Giroux, J. Gobert, R. R. Goldberg, K. N. Gowrisankaran, P. Hess, T. Husain, S. Igari, J. P. Kahane, G. N. Keshava-Murthy and K. R. Unni, L. D. Kudryavtsev, P. Leonard, F. T. Maksudov and S. A. Veliev, A. Lallios, B. Montador, C. W. Mullins, C. W. Mullins, B. SZ.-Nagy, E. T. Poulsen, T. J. Rivlin, K. Scherer, J. Schmets, I. J. Schoenberg, B. Sendov, A. M. Siddiqi, K. R. Unni, K. R. Unni, V. Walter, S. G. Wayment, J. H. Williamson.

Michel WALDSCHMIDT. — **Nombres transcendants.** — Lecture notes in mathematics, 402. — Un volume broché, $16,5 \times 24$, de VIII, 277 pages, avec figure. — Prix: DM 25.00. — Springer, Berlin/Heidelberg/New York, 1974.

Préliminaires. — La méthode de Schneider. — La méthode de Gel'fond. — Type de transcendance. — Un critère de transcendance. — Zéros de polynômes exponentiels. — Propriétés d'indépendance algébrique de la fonction exponentielle. — La méthode de Baker. — *Appendice*: Théorèmes locaux.

Michael Francis ATIYAH. — **Elliptic operators and compact groups.** — Lecture notes in mathematics, 401. — Un volume broché, $16,5 \times 24$, de 93 pages. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Transversally elliptic operators. — The index of transversally elliptic operators. — The excision and multiplicative properties. — The naturality of the index and the localization theorem. — The index homomorphism for $G = S^1$. — The operators j_{\pm} for $G = S^1$. — Toral actions with finite isotropy groups. — The index homomorphism for $G = T^n$. — The cohomology formula. — Applications.

A crash course on Kleinian groups. — Lectures given at a special session at the January 1974 meeting of the American Mathematical Society at San Francisco. — Edited by Lipman Bers and Irwin Kra. — Lecture notes in mathematics, 400. — Un volume broché, $16,5 \times 24$, de 130 pages, — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 8 articles de: Lipman Bers, C. J. Earle, F. P. Gardiner, I. Kra, H. L. Royden, W. Abikoff, B. Maskit, A. Marden. — *Appendices*: The curvature of Teichmüller space, par H. Masur; Some unsolved problems, par W. Abikoff.

Laurent SCHWARTZ. — **Radon measures on arbitrary topological spaces and cylindrical measures.** — Tata Institute of fundamental research studies in mathematics, 6. — Un volume relié, $17 \times 25,5$, de XII, 393 pages. — Prix: \$17.00. — Oxford University Press, London, 1973.

Part I: Radon measures: main properties and operations; Polish, Lusin, Suslin and Radon spaces. — *Part II*: Equivalent topologies; Cylindrical measures; Cylindrical measures and Hilbert-Schmidt operators; Cylindrical measures and nuclear spaces; Cylindrical measures and probability theory. — Gauss measures. — *Appendix*: Complements on narrow convergence.

Graphs and combinatorics. — Proceedings of the Capital conference on graph theory and combinatorics at the George Washington University, June 18-22, 1973. — Edited by Ruth A. Bari and Frank Harary. — Lecture notes in mathematics, 406. — Un volume broché, $16,5 \times 24$, de VIII, 355 pages, avec figures. — Prix: DM 30.00. — Springer, Berlin/Heidelberg/New York, 1974.

Part I: Invited papers. 6 exposés de F. Harary, R. C. Read, A. J. Schwenk. — *Part II: Contributed papers; expository review articles.* 4 exposés de S. A. Burr, P. C. Kainen, C. C. Lindner, A. J. Schwenk. — *Part III: Contributed papers; new results on graphs and combinatorics.* 19 exposés de M. O. Albertson, B. A. Anderson, R. A. Bari, F. T. Boesch, S. Chen, and J. A. M. McHugh, T. G. Boreham, I. Z. Bouwer and R. W. Frucht, T. H. Brylawski, Fan Chung, V. Chvatal, A. Schwenk, S. Goodman, S. Hedetniemi, D. W. Hall, P. Hell, J. P. Hutchinson, S. Kundu, M. J. Lipman, J. Q. Longyear, F. S. Roberts, P. K. Stockmeyer, D. P. Sumner.

Keith J. DEVLIN; Håvard JOHNSBRÅTEN. — **The Souslin problem.** — Lecture notes in mathematics, 405. — Un volume broché, $16,5 \times 24$, de VIII, 132 pages. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Preliminaries. — Souslin's hypothesis. — The combinatorial property. — Homogeneous Souslin trees and lines. — Rigid Souslin trees and lines. — Martin's axiom and

the consistency of SH . — Towards Con ($ZFC+CH+SH$): a false start. — Iterated forcing Jensen style. — How Jensen Killed a Souslin tree. — Con $ZFC \rightarrow$ Con ($ZFC+CH+SH$). — *Appendix*: Iterated Souslin forcing and $\mathcal{P}(w)$.

Pierre BERTHELOT. — **Cohomologie cristalline des schémas de caractéristique $p > 0$** . — Lecture notes in mathematics, 407. — Un volume broché, $16,5 \times 24$, 604 pages, avec figures. — Prix: DM 44.00. — Springer, Berlin/Heidelberg/New York, 1974.

Idéaux à puissances divisées. — Calcul différentiel. — Généralités sur le topos cristallin d'un schéma. — Cristaux. — Cohomologie cristalline et cohomologie de De Rham. — Classe de cohomologie associée à un cycle non singulier. — Dualité de Poincaré et rationalité de la fonction zêta. — *Appendice*: Cohomologie cristalline sur une base quelconque.

Classification of algebraic varieties and compact complex manifolds. — Edited by H. Popp. — Lecture notes in mathematics, 412. — Un volume broché, $16,5 \times 24$, de 333 pages, avec figures. — Prix: DM 30.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 13 exposés de W. Barth, and A. Van de Ven, W. D. Geyer, H. Grauert, F. Hirzebruch, J. Lipman, B. Moishezon, J. P. Murre, Y. Namikawa, F. Oort, H. Popp, W. Schmid, T. Shioda and N. Mitani, K. Ueno.

Combinatorial mathematics. — Proceedings of the Second Australian conference. — Edited by D. A. Holton. — Lecture notes in mathematics, 403. — Un volume broché, $16,5 \times 24$, de 148 pages, avec figures. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 19 exposés de M. A. Adena, D. A. Holton and P. A. Kelly, K. K. H. Butler, D. D. Grant, D. A. Holton, L. Janos, O. H. Kegel and A. Schleirmacher, C. Little, P. J. Lorimer, K. L. McAvaney, I. A. Peckham, A. Rahilly, L. Roberts, A. Penford Street, and E. G. Whitehead Jr, G. Szekeres, D. E. Taylor, J. S. Wallis, W. D. Wallis, A. Werner and R. J. Baxter.

Théorie du potentiel et analyse harmonique. — Edité par Jacques Faraut. — Lecture notes in mathematics, 404. — Un volume broché, $16,5 \times 24$, de 245 pages. — Prix: DM 25.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 12 exposés de C. Berg, J. Bliedtner, H. Chebli, G. Choquet et J. Deny, G. Forst, Y. Guivarc'h et J. P. Conze, K. Harzallah, C. Herz, F. Hirsch, M. P. Malliavin et P. Malliavin, R. Takahashi, F. Hirsch et J. P. Roth.

John WERMER. — **Potential theory**. — Lecture notes in mathematics, 408. — Un volume broché, $16,5 \times 24$, de 146 pages, avec figures. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Electrostatics. — Poisson's equation. — Fundamental solutions. — Capacity. — Energy. — Existence of the equilibrium potential. — Maximum principle for potentials. — Uniqueness of the equilibrium potential. — The cone condition. — Singularities of bounded harmonic functions. — Green's function. — The Kelvin transform. — Perron's method. — Barriers. — Kellogg's theorem. — The Riesz decomposition theorem. — Applications of the Riesz decomposition.

Fonctions de plusieurs variables complexes. — Séminaire François Norguet, octobre 1970-décembre 1973. — Edité par François Norguet. — Lecture notes in mathematics, 409. — Un volume broché, $16,5 \times 24$, de xiii, 612 pages, avec figures. — Prix: DM 47.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 30 exposés de F. Norguet, D. Barlet, Le Dung Trang, F. Norguet, F. Norguet, G. Roos, P. Schapira, A. Andreotti, A. Andreotti, C. Stadler, Le Dung Trang, W. Stoll et A. Andreotti, I. Lieb, A. Andreotti, J.-M. Kantor, Le Dung Trang, N. Kuhlmann, J.-P. Ramis, D. Cheniot, R. Gérard, G. Gordon, B. Klares, B. Klares, G. Wagschal, F. Kmety, J.-J. Risler, M. Loday-Richaud, A. Galligo, U.-C. Grima, J.-J. Risler.

Hypergraph seminar, Ohio state university, 1972. — Edited by Claude Berge and Dijen Ray-Chaudhuri. — Lecture notes in mathematics, 411. — Un volume broché, $16,5 \times 24$, de 287 pages, avec figures. — Prix: DM 28.00. — Springer, Berlin/Heidelberg/New York, 1974.

Part I: General hypergraphs. 18 exposés de C. Berge, C. Berge and M. Simonovits, J. C. Bermond, R. Bonnet and P. Erdős, V. Chvatal, W. H. Cunningham, P. Erdős, V. Faber, J. C. Fournier, P. Hansan and M. Las Vergnas, M. Las Vergnas, L. Lovasz, J. C. Meyer, R. Rado, M. Simonovits, F. Sterboul. — *Part II: Graphs, matroids, designs.* 7 exposés de V. Chvatal and L. Lovasz, T. A. Dowling and D. G. Kelly, P. Erdős, T. Helgason, W. Pulleyblank and Jack Edmonds, W. T. Tutte, R. M. Wilson. — *Part III: Unsolved problems.*

Michel BRUNEAU. — **Variation totale d'une fonction.** — Lecture notes in mathematics, 413. — Un volume broché, $16,5 \times 24$, de 322 pages, avec figures. — Prix: DM 30.00. — Springer, Berlin/Heidelberg/New York, 1974.

Fonctions à p -variation bornée. — Fonctions p -fines et points extrêmes. — Fonctions p , α -fines et nombres mal approchés. — Mesures de Carathéodory et mesures de Besicovitch. — Variation totale d'une fonction. — Une généralisation du théorème de décomposition de Lebesgue. — Sur les nombres dérivés d'une fonction. — *Annexe I: Remarques diverses.* — *Annexe II: Fonctions p , α -fines et suites adaptées.* — *Annexe III: Exemples de fonctions p , α -fines.* — *Annexe IV: Variation d'une fonction sur un compact.*

Elie M. DICK. — **Current information sources in mathematics.** — An annotated guide to books and periodicals, 1960-1972. — Un volume relié, 16×24 , de x, 281 pages. — Prix: \$12.50. — Libraries Unlimited, Inc., Littleton, Colo., 1973.

General elementary mathematics. — Algebra and trigonometry. — Calculus, analytic geometry, and vector analysis. — History, biography, and reprints of classics. — Set theory, logic, and foundations. — Combinatorial and graph theory. — Theory of numbers. — General abstract algebra. — Linear and multilinear algebra and matrix theory. — Algebraic structures and ordered algebraic structures. — Group theory and generalizations. — Category theory and homological algebra. — Topological groups and Lie theory — Topology. — Topology and geometry of manifolds. — Geometry. — Real analysis. — Measure and integration. — Complex analysis. — Potential theory. — Special functions. — Functional analysis. — Differential and integral equations. — Fourier analysis and harmonic analysis. — Integral transforms and operational calculus. — Calculus of variations. — Numerical analysis. — Computer science. — Probability and statistics. — Bibliographies. — Dictionaries. — Tables. — Miscellaneous. — Periodicals. — Directories and guides. — Professional organizations and government agencies. A selected list of publishers.

Paul R. HALMOS. — **Lectures on Boolean algebras.** — Reprint of the 1963 edition, corrected and revised. — Un volume broché, $15 \times 22,5$, de 147 pages, avec figures. — Prix: DM 9.70. — Springer, Berlin/Heidelberg/New York, 1974.

Boolean rings. — Boolean algebras. — Fields of sets. — Regular open sets. — Elementary relations. — Order. — Infinite operations. — Subalgebras. — Homomorphisms. — Free algebras. — Ideals and filters. — The homomorphism theorem. — Boolean σ -algebras. — The countable chain condition. — Measure algebras. — Atoms. — Boolean spaces. — The representation theorem. — Duality for ideals. — Duality for homomorphisms. — Completion. — Boolean σ -spaces. — The representation of σ -algebras. — Boolean measure spaces. — Incomplete algebras. — Products of algebras. — Sums of algebras. — Isomorphisms of factors. — Isomorphisms of countable factors. — Retracts. — Projective algebras. — Injective algebras.

Collected papers of G. H. Hardy including joint papers with J. E. Littlewood and other. — Vol. VI. — Edited by L. S. Bosanquet. — Un volume relié, 19×25 , de 854 pages, avec portrait et figures. — Prix: £14.50. — Clarendon Press, Oxford, 1974.

Contient 52 articles sur la théorie des séries, publiés entre 1904 et 1945.

Frank W. ANDERSON; Kent R. FULLER. — **Rings and categories of modules.** — Graduate texts in mathematics, 13. — Un volume broché, $15,5 \times 23,5$, de VIII, 339 pages, avec figures. — Prix: DM 36.30. — Springer, New York/Heidelberg/Berlin, 1974.

Rings, modules and homomorphisms. — Direct sums and products. — Finiteness conditions for modules. — Classical ring-structure theorems. — Functions between module categories. — Equivalence and duality for module categories. — Injective modules, projective modules and their decompositions.

Ferdinand GONSETH. — **Les mathématiques et la réalité.** — Essai sur la méthode axiomatique. — Nouveau tirage. — Un volume broché, $14,5 \times 22,5$, de IX, 386 pages, avec figure. — Prix: FF 50.00. — A. Blanchard, Paris, 1974.

Explications préliminaires: les buts et les vues de l'auteur. — Le paradoxe du langage. — La construction de la réalité. — Le double visage de l'abstrait. — L'autonomie de l'abstrait. — La nature du nombre entier. — Jugements sur la logique. — La physique de l'objet quelconque. — La physique intuitive des qualités; l'objet aristotélicien. — Les types. — Théorie du vrai et du faux. — « Tous » et « l'un ou l'autre ». — La méthode axiomatique. — Les antinomies. — Les structures. — Expliquer et définir. — Dédire et démontrer. — Conclusion.

W. V. VASCONCELOS. — **Divisor theory in module categories.** — North-Holland Mathematics studies, 14. — Notas de matematica, 53. — Un volume broché, $16,5 \times 24$, de VII, 120 pages, avec figures. — Prix: \$7.75. — North Holland, Amsterdam/Oxford, American Elsevier, New York, 1974.

Local algebra. — Homology of local rings. — Divisorial ideals. — Spherical modules and divisors. — I -divisors.

Marvin Jay GREENBERG. — **Euclidean and non-Euclidean geometries.** — Development and history. — Un volume relié, $17,5 \times 24$, de XI, 304 pages, avec figures. — Prix: £5.20. — W. H. Freeman, 1974.

Euclid's geometry. — Logic. — Hilbert's axioms. — Neutral geometry. — History of the parallel postulate. — The discovery of non-Euclidean geometry. — Independence of the parallel postulate. — Philosophical implications. — *Appendix A*: Further results in hyperbolic geometry. — *Appendix B*: Elliptic and other Riemannian geometries.

F. GONSETH. — **Les fondements des mathématiques.** — De la géométrie d'Euclide à la relativité générale et à l'intuitionisme. — Nouveau tirage. — Un volume broché, $16,5 \times 25,5$, de xiv, 243 pages, avec figures. — Prix: FF 45.00. — A. Blanchard, Paris (1926), 1974.

Les notions fondamentales de la géométrie. — L'axiomatique de l'espace euclidien. — Le continu. — De la compatibilité et de l'indépendance des axiomes d'un système. — La construction des continua. — Les géométries non-euclidiennes. — La théorie et l'expérience. — Le temps et la relativité. — La notion de mouvement et la relativité générale. — Les mathématiques et la logique.

Kai Lai CHUNG. — **Elementary probability theory with stochastic processes.** — Under graduate texts in mathematics. — Un volume relié, 16×24 , de 325 pages, avec figures. — \$12.00. — Springer, New York/Heidelberg/Berlin, 1974.

Set. — Probability. — Counting. — Random variables. — Borel fields and general random variables. — Conditioning and independence. — Mean, variance and transforms. — Poisson and normal distributions. Stirlings's formula and DeMoivre-Laplace's theorem. — From random walks to Markov chains. — Martingale.

Sterling K. BERBERIAN. — **Lectures in functional analysis and operator theory.** — Graduate texts in mathematics, 15. — Un volume relié, 16×24 , de v, 345 pages. — Prix: \$15.70. — Springer, New York/Heidelberg/Berlin, 1974.

Topological groups. — Topological vector spaces. — Convexity. — Normed spaces. — Banach spaces. — Hilbert spaces. — Category. — Banach algebras. — C^* -Algebras. — Miscellaneous applications.

E. OELJEKLAUS; R. REMMERT. — **Lineare Algebra I.** — Heidelberger Taschenbücher, 150. — Un volume broché, $13,5 \times 20,5$, de xv, 279 pages, avec figures. — Prix: \$8.10. — Springer, Berlin/Heidelberg/New York, 1974.

Mengen und Abbildungen (Nomenklatur). — Algebraische Strukturen. — Elementare Modultheorie. — Theorie endlich erzeugbarer Moduln. — Linear Abbildungen und Matrizen. — Determinanten. — *Supplement*: Noethersche, artinsche, halbeinfache Moduln.

Wolfgang WALTER. — **Einführung in die Theorie der Distributionen.** — Un volume broché, 14×21 , de viii, 211 pages, avec figures. — Bibliographisches Institut Mannheim/Wien/Zürich, 1974.

Funktionen der Klasse C^∞ . Der Grundraum \mathcal{D} . — Funktionen als Funktionale. Distributionen. — Das Rechnen mit Distributionen. — Konvergenz und Differentiation bei Distributionen. — Partielle Ableitungen. — Integration. Gewöhnliche Differentialgleichungen. — Das direkte Produkt. — Die Faltung. — Anwendung der Faltung auf partielle Differentialgleichungen. — Fourier-Reihen. — Die Fourier-Transformation. — Fourier-Transformation (Fortsetzung). — Der Satz von Paley-Wiener. — Sobolev-Räume.

Klaus DEIMLING. — **Nichtlineare Gleichungen und Abbildungsgrade.** — Hochschultext. — Un volume broché, $16,5 \times 24$, de VIII, 131 pages, avec figure. — Prix: \$6.90. — Springer, Berlin/Heidelberg/New York, 1974.

Hilfsmittel aus Topologie und Funktionalanalysis. — Der Abbildungsgrad von Brouwer. — Der Leray-Schauder-Grad. — Fixpunkte kompakter Operatoren. — Der Leray-Schauder-Grad in lokalkonvexen Räumen. — Abbildungsgrad und Projektionsmethoden.

A. H. STROUD. — **Numerical quadrature and solution of ordinary differential equations.** — A textbook for a beginning course in numerical analysis. — Applied mathematical sciences, 10. — Un volume broché, $26 \times 17,5$, de XI, 338 pages, avec figures. — Prix: \$9.50. — Springer, Berlin/Heidelberg/New York, 1974.

Background information. — Interpolation. — Quadrature. — Initial value problems for ordinary differential equations. — *Appendix A*: Tables of orthogonal polynomials. — *Appendix B*: Tables of Peano error constants for various quadrature formulas. — *Appendix C*: Tables of quadrature formulas.

Günter EWALD. — **Geometrie.** — Eine Einführung für Studenten und Lehrer. — Moderne Mathematik in elementarer Darstellung, 14. — Un volume broché, $15,5 \times 23$, de 201 pages, avec figures. — Prix: DM 26.00. — Vandenhoeck & Ruprecht, 1974.

Metrische Ebenen und Bewegungen. — Ordnung und Kongruenz. — Affine Ebenen und Koordinaten. — *Anhang*: Kant und Einstein; Endliche Bewegungsgruppen. — Endliche erzeugte Gruppen. — Parkettierungen. — Einführung von Koordinaten in euklidischen Ebenen. — Formeln für Spiegelungen und Senkrechtstehen. — Geordnete Körper und geordnete affine Ebenen.

C. J. A. EVELYN; G. B. MONEY-COUTTS; J. A. TYRRELL. — **The seven circles theorem and other new theorems.** — Un volume relié, $19,5 \times 25$, de VIII, 68 pages, avec figures. — Prix: £2.80. — Stacey International, London, 1974.

Projective addition of vectors and the dual theory. — Extensions of Pascal's and Brianchon's theorems. — Chains of circles.

Christian BLATTER. — **Analysis I.** — Heidelberger Taschenbücher, 151. — Un volume broché, $13,5 \times 20,5$, de XII, 204 pages, avec figures. — Prix: DM 14.80. — Springer, Berlin/Heidelberg/New York, 1974.

Grundbegriffe. — Die axiome von \mathbf{R} . — Natürliche, ganze und rationale Zahlen. — Vervollständigung von \mathbf{Q} . — Komplexe Zahlen und Vektoren. — Folgen. — Reihen. — Stetige Funktionen. — Die Exponentialfunktion. — Differentialrechnung I. — Differentialrechnung II.

Christian BLATTER. — **Analysis II.** — Heidelberger Taschenbücher, 152. — Un volume broché, $13,5 \times 20,5$, de XII, 180 pages, avec figures. — Prix: DM 14.80. — Springer, Berlin/Heidelberg/New York, 1974.

Das Riemannsche Integral. — Integralrechnung. — Integration der rationalen Funktionen. — Kurven. — Ebene Kurven. — Funktionenfolgen. — Potenzreihen. — Die Ableitung einer Funktion $f: \mathbf{R}^m \rightarrow \mathbf{R}^n$. — Mehrdimensionale Differentialrechnung.

Christian BLATTER. — **Analysis III.** — Heidelberger Taschenbücher, 153. — Un volume broché, $13,5 \times 20,5$, de XII, 184 pages, avec figures. — Prix: DM 14.80. — Springer, Berlin/Heidelberg/New York, 1974.

Hauptsätze der mehrdimensionalen Differentialrechnung. — „Flächen“ im \mathbf{R}^n . — Das Jordansche Mass im \mathbf{R}^m . — Mehrfache Integrale. — Variablentransformation bei mehrfachen Integralen. — Flächen im \mathbf{R}^3 . — Vektorfelder. — Die Greensche Formel für ebene Bereiche. — Der Satz von Stokes. — Der Satz von Gauss.

W. W. COMFORT; S. NEGREPONTIS. — **The theory of ultrafilters.** — Die Grundlehren der mathematischen Wissenschaften, 211. — Un volume relié, $16,5 \times 24$, de x, 482 pages. — Prix: DM 98.00. — Springer, Berlin/Heidelberg/New York, 1974.

Set theory. — Topology and Boolean algebras. — Intersection systems and families of large oscillation. — The general theory of Jonsson classes. — The Jonsson class of ordered sets. — The Jonsson class of Boolean algebras. — Basic facts on ultrafilters. — Large cardinals. — The Rudin-Keisler order on Types of ultrafilters. — Good ultrafilters. — Elementary types. — Families of almost disjoint sets. — Saturation of ultraproducts. — Topology of spaces of ultrafilters. — Spaces homeomorphic to $(2^{\mathbb{N}})_{\alpha}$. — Ultrafilters on ω .

B. L. VAN DER WAERDEN. — **Group theory and quantum mechanics.** — Die Grundlehren der mathematischen Wissenschaften, 214. — Un volume relié, $16,5 \times 24$, de 211 pages, avec figures. — Prix: DM 56.00. — Springer, Berlin/Heidelberg/New York, 1974.

Fundamental notions of quantum mechanics. — Groups and their representations. — Translations, rotations and Lorentz transformations. — The spinning electron. — The group of permutations and the exclusion principle. — Molecule spectra.

W. A. WOLOVICH. — **Linear multivariable systems.** — Applied mathematical sciences, 11. — Un volume broché, $17 \times 25,5$, de VIII, 358 pages, avec figures. — Prix: \$9.50. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Mathematical preliminaries. — The state space. — Frequency domain representations. — Differential operator representations. — Linear state variable feedback. — Frequency domain compensation. — Design objectives.

M. ROSENBLATT. — **Random processes.** — 2nd edition. Graduate texts in mathematics, 17. — Un volume relié, 16×24 , de x, 228 pages, avec figures. — Prix: DM 31.40. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Basic notions for finite and denumerable state models. — Markov chains. — Probability spaces with an infinite number of sample points. — Stationary processes. — Markov processes. — Weakly stationary processes and random harmonic analysis. — Martingales. — Additional topics.

David WINTER. — **The structure of fields.** — Graduate texts in mathematics, 16. — Un volume relié, 16×24 , de XII, 205 pages, avec figures. — Prix: DM 33.30. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Some elementary field theory. — The structure of algebraic extensions. — Classical Galois theory. — Algebraic function fields. — Modern Galois theory. —

Tori and the structure of radical extensions. — *Appendices* : Set theory; Tensor products; Witt vectors; Algebras; Coalgebras; Bialgebras.

Numerische Behandlung von Eigenwertaufgaben. — Tagung über Numerische Behandlung von Eigenwertaufgaben vom 19. bis 24. November 1972. — Tagungsleiter: L. Collatz und K. P. Hadeler. — International series of numerical mathematics, 24. — Un volume relié, $17 \times 24,5$, de 142 pages, avec figures. — Prix: FS 35.00. — Birkhäuser Verlag, Basel/Stuttgart, 1974.

Contient 12 exposés de J. Albrecht et U. Dennert, C. Bandle, E. Bohl, W.-J. Beyn und J. Lorenz, L. Elsner, W. Held, H. Krisch, F. Locher, A. Pignedoli, A. Ruhe, R. P. Sperb, B. Wernen, R. Zielke.

Numerische Methoden bei Optimierungsaufgaben, Band 2. — Vortragsauszüge der Tagung über Numerische Methoden bei Optimierungsaufgaben vom 18. bis 24. November 1973 im Mathematischen Forschungsinstitut Oberwolfach (Schwarzwald). — Hrsg. von L. Collatz und W. Wetterling. — International series of numerical mathematics, 23. — Un volume relié, $17 \times 24,5$, de 165 pages, avec figures. — Prix: FS 39.00. — Birkhäuser Verlag, Basel/Stuttgart, 1974.

Contient 12 exposés de B. R. Damsté, B. Fleischmann, W. Förster, K. Glashoff, P. L. Hammer and T. G. Rosenberg, W. Junginger, W. Krabs und N. Weck, J. J. H. Miller, R. Schaback, G. Schuller und J. Stoer, K. Spremann, H. Yanai.

Category seminar. — Proceedings Sydney category theory seminar 1972/1973. — Edited by Gregory M. Kelly. — Lecture notes in mathematics, 420. — Un volume broché, $16,5 \times 24$, de vi, 375 pages, avec figures. — Prix: DM 32.00. — Springer, Berlin/Heidelberg/New York, 1974.

Brian Day : On adjoint-functor factorization; On closed categories of functors II; An embedding theorem for closed categories; Limit spaces and closed span categories. — *G. M. Kelly and Ross Street* : Review of the elements of 2-categories. — *Ross Street* : Fibrations and Yoneda's lemma in a 2-category; Elementary cosmoi. — *G. M. Kelly* : On clubs and doctrines; Doctrinal adjunction; Coherence theorems for lax algebras and for distributive laws.

Valentin POENARU. — **Groupes discrets.** — Lecture notes in mathematics, 421. — Un volume broché, $16,5 \times 24$, de 216 pages, avec figures. — Prix: DM 23.00. — Springer, Berlin/Heidelberg/New York, 1974.

Préliminaires de théorie des groupes. — La théorie des bouts. — Pré-groupes et structures bipolaires. — Calcul de l'algèbre $\mathcal{E}(G)$; le théorème de Stallings sur les groupes à deux bouts. — Le théorème de Stallings sur les groupes à une infinité de bouts. — Variétés de dimensions 3.

Jean-Michel LEMAIRE. — **Algèbres connexes et homologie des espaces de lacets.** — Lecture notes in mathematics, 422. — Un volume broché, $16,5 \times 24$, de xiv, 133 pages, avec figures. — Prix: DM 23.00. — Springer, Berlin/Heidelberg/New York, 1974.

Présentations d'algèbres connexes. — Homologie des algèbres différentielles libres. — Application à la détermination de certaines algèbres de Pontryagin. — Sur certaines algèbres différentielles libres. — La propriété (P_n) . — *Appendice* : Modules sur les algèbres graduées connexes; Séries de Poincaré.

S. S. ABHYANKAR; A. M. SATHAYE. — **Geometric theory of algebraic space curves.** — Lecture notes in mathematics, 423. — Un volume broché, $16,5 \times 24$, de xiv, 302 pages, avec figures. — Prix: DM 28.00. — Springer, Berlin/Heidelberg/New York, 1974.

Local geometry or length. — Projective geometry or homogeneous domains. — Birational geometry or genus. — Affine geometry or filtered domains. — Appendix.

Lionel WEISS; Jacob WOLFOWITZ. — **Maximum probability estimators and related topics.** — Lecture notes in mathematics, 424. — Un volume broché, $16,5 \times 24$, de IV, 106 pages. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Purpose of this monograph. — The maximum likelihood estimator. — The maximum probability estimator. — Maximum probability estimator with a general loss function. — Asymptotic behavior of the likelihood function, asymptotically sufficient statistics. — Efficiency of maximum likelihood estimators. — Testing hypotheses.

I. R. SHAFAREVICH. — **Basic algebraic geometry.** — Die Grundlehren der mathematischen Wissenschaften, 213. — Un volume relié, $16 \times 23,5$, de xv, 439 pages, avec figures. — Prix: DM 98.00. — Springer, Berlin/Heidelberg/New York, 1974.

Part I: Algebraic varieties in a projective space: Fundamental concepts; Local properties; Divisors and differential forms; Intersection indices. — *Part II: Schemes and varieties:* Schemes; Varieties. — *Part III: Algebraic varieties over the field of complex numbers and complex analytic manifolds:* Topology of algebraic varieties; Complex analytic manifolds; uniformization. — Bibliography. — Historical sketch.

A. V. SKOROHOD. — **Integration in Hilbert space.** — Ergebnisse der Mathematik und ihrer Grenzgebiete, 79. — Un volume relié, $16 \times 23,5$, de xii, 177 pages. — Prix: DM 48.00. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Definition of a measure in Hilbert space. — Measurable functions on Hilbert space. — Absolute continuity of measures. — Admissible shifts and quasi-invariant measures. — Some questions of analysis in Hilbert space.

Topics in analysis. — Colloquium on mathematical analysis, Jyväskylä 1970. — Edited by Olli Lehto, I. S. Louhivaara and Rolf Nevanlinna. — Lecture notes in mathematics, 419. — Un volume broché, $16,5 \times 24$, de xiii, 392 pages, avec figures. — Prix: DM 35.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 42 exposés de G. D. Anderson; Căbiria Andreian Cazacu; E. F. Beckenbach; Christer Bennowitz and Ake Pleijel; Lipman Bers; M. Brelot; M. L. Cartwright; Lamberto Cesari; E. F. Collingwood; Kurt Endl; Matts Essen; Gaetano Fichera; Evelyn Frank; W. H. J. Fuchs; Tord Ganelius and Westlund Stig; F. W. Gehring; C. Goulaouic; Helmut Grunsky; Wolfgang Haack; Albert E. Heins; P. Hermann F. Huckemann; Hans Jarchow; R. L. Jeffery; Wilfred Kaplan; Guido Karrer and Roland Mühlethaler; Rolf Leis; Yu. V. Linnik; A. J. Lohwater; Wolfgang Luh; W. A. J. Luxemburg; Morris Marden; Raimo Näkki; Edgar Reich; Ian Richards; Christian G. Simader; R. S. L. Srivastava; Antonio Steiner; Kurt Strebel; Olli Tammi; J. D. Weston; Jörg Winkler.

Localization in group theory and homotopy theory and related topics. — Edited by Peter Hilton. — Lecture notes in mathematics, 418. — Un volume broché, $16,5 \times 24$, de 171 pages, avec figures. — Prix: DM 20.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 18 exposés de D. W. Anderson; M. Arkowitz; M. Bendersky; A. K. Bousfield; M. Curtis; A. Wiederhold, B. Williams; H. Glover, G. Mislin; J. R. Harper; P. Hilton; R. Hoobler, D. L. Rector; J. Meisen; G. Mislin; D. L. Rector, J. Stasheff; J. Roitberg; J. Stasheff; J. Stasheff; C. Wilkerson; A. Zabrodsky.

H. H. KELLER. — **Differential calculus in locally convex spaces.** — Lecture notes in mathematics, 417. — Un volume broché, $16,5 \times 24$, de 143 pages, avec figures. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Spaces of multilinear mappings. — Continuously differentiable functions. — Functions of class C^p . — *Appendix*: Functions of a real variable.

Michael TAYLOR. — **Pseudo differential operators.** — Lecture notes in mathematics, 416. — Un volume broché, $16,5 \times 24$, de iv, 155 pages, avec figures. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Singular integral operators on the circle. — Pseudo differential operators. — Elliptic and hypoelliptic operators. — The initial value problem; Hyperbolic operators. — Elliptic boundary value problems; Petrowsky parabolic operators. — Propagation of singularities; Wave front sets. — The Sharp Garding inequality.

T. KAMBAYASHI; M. MIYANISHI; M. TAKEUCHI. — **Unipotent algebraic groups.** — Lecture notes in mathematics, 414. — Un volume broché, $16,5 \times 24$, de 165 pages, avec figures. — Prix: DM 20.00. — Springer, Berlin/Heidelberg/New York, 1974.

Part I: Notations, conventions and some basic preliminary facts; Forms of vector groups; Groups of Russell type; Decomposition theorems for central extensions of commutative group schemes; Application to the two-dimensional unipotent groups. — Wound unipotent groups. — The question of commutativity for two-dimensional wound unipotent groups. — *Part II*: Forms of the affine line and geometry of the groups of Russell type. — Actions of unipotent group schemes. — The underlying scheme of a unipotent group. — The hyperalgebra of a unipotent group scheme. — *Appendix*: Central extensions of affine group schemes.

Ivar EKELAND. — **La théorie des jeux et ses applications à l'économie mathématique.** — Collection SUP: Le mathématicien, 12. — Un volume broché, 21×14 , de 110 pages, avec figures. — Presses universitaires de France, Paris, 1974.

Introduction. — Jeux non coopératifs. — Jeux coopératifs. — *Appendice*: Ensembles convexes; Séparations des convexes; Fonctions convexes.

Ordinary and partial differential equations. — Proceedings of the conference held at Dundee, Scotland, 26-29 March 1974. — Edited by B. D. Sleeman and I. M. Michael. — Lecture notes in mathematics, 415. — Un volume broché, $16,5 \times 24$, de xvii, 447 pages, avec figures. — Prix: DM 37.00. — Springer, Berlin/Heidelberg/New York, 1974.

Invited lectures: 33 exposés de C. Andreian Cazacu, J. V. Baxley, N. W. Bazley, J. W. Bebernes, H. E. Benzinger, O. Boruvka, B. L. J. Braaksma and H. S. V. de Snoo, P. J. Browne, L. Collatz, A. Devinatz, M. S. P. Eastham, D. E. Edmunds, M. R. Essen, W. N. Everitt and M. Giertz, M. Faierman, I. Fenyö, A. Friedman, P. Habets, W. H. Harris Jr. and D. A. Lutz, P. Hess, D. B. Hinton, I. W. Knowles, K. Kreith, J. B. McLeod, H.-D. Niessen, A. Pleijel, K. Schmitt, G. R. Sell, I. Stakgold, F. Stummel, J. Weidmann,

J. S. W. Wong, A. Zettl. — *Contributed lectures*: 26 exposés de F. M. Arscott, M. F. Barnsley and P. D. Robinson, B. M. Brown and W. D. Evans, E. Brändas and M. Hehenberger, J. Carr and J. Dyson, G. Debney and D. Farnsworth, J. W. de Roeveer, W. N. Everitt, H. I. Freedman, J. D. Gibbon, P. J. Caudrey, R. K. Bullough and J. C. Eilbeck, B. H. Gilding, W. S. Hall, S. G. Halvorsen, D. J. Heath and A. D. Wood, G. Jank, A. Källström and B. D. Sleeman, N. G. Lloyd, S.-O. Londen, K. Nickel, L. A. Peletier, T. Plant, G. F. Roach, J. Toland, U. Trottenberg, P. Volkmann, L. J. Walpole.

Séminaire Pierre Lelong (Analyse) Année 1972-1973. — Lecture notes in mathematics, 410. — Un volume broché, $16,5 \times 24$, de vi, 181 pages, avec figures. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 12 articles de N. Desolneux-Moulis, Ph. Noverraz, Y. Hervier, J. Litwin, M. Sibony, J. Litwin, L. Gruman, J.-P. Ferrier, P. Lelong, P. Mazet, H. Skoda, P. Krée.

Fritz OBERHETTINGER. — **Tables of Mellin transforms.** — Un volume broché, $15,5 \times 23$, de 275 pages, tables. — Prix: DM 34.00. — Springer, Berlin/Heidelberg/New York, 1974.

Part I. Mellin transforms: General formulas; Algebraic functions and powers of arbitrary order; Exponential functions; Logarithmic functions; Trigonometric functions; Hyperbolic functions; The Gamma function and related functions; Legendre functions; Orthogonal polynomials; Bessel functions; Modified Bessel function; Functions related to Bessel function; Whittaker functions and special cases; Elliptic integrals and elliptic functions; Hypergeometric functions. — *Part II. Inverse Mellin transforms*: General formulas; Algebraic functions and powers of arbitrary order; Exponential and logarithmic functions; Trigonometric and hyperbolic functions; The Gamma function and related functions; Orthogonal polynomials and Legendre functions; Bessel functions and related functions; Whittaker functions and special cases.

Paul R. HALMOS. — **Finite-dimensional vector spaces.** — Undergraduate texts in mathematics. — Reprint of the 1958 2nd ed. published by Van Nostrand, Princeton, N. J., in series: The University series in undergraduate mathematics. — Un volume relié, 16×24 , de viii, 200 pages. — Prix: DM 19.00. — Springer, Berlin/Heidelberg/New York, 1974.

Spaces. — Transformations. — Orthogonality. — Analysis. — *Appendix*: Hilbert space.

Paul R. HALMOS. — **Measure theory.** — Graduate texts in mathematics, 18. — Reprint of the 1950 ed. published by Van Nostrand, New York, in series: The University series in higher mathematics. — Un volume relié, $16,5 \times 24$, de xi, 304 pages. — Prix: DM 26.90. — Springer, Berlin/Heidelberg/New York, 1974.

Sets and classes. — Measures and outer measures. — Extension of measures. — Measurable functions. — Integration. — General set functions. — Product spaces. — Transformations and functions. — Probability. — Locally compact spaces. — Haar measure. — Measure and topology in groups.

Constructive and computational methods for differential and integral equations. — Symposium, Indiana University, February 17-20, 1974. — Edited by D. L. Colton and R. P. Gilbert. — Lecture notes in mathematics, 430. — Un volume broché, $16,5 \times 24$, de vi, 476 pages, avec figures. — Prix: DM 37.00. — Springer, Berlin/Heidelberg/New York, 1974.

Contient 19 exposés par: P. M. Anselone, A. G. Gibbs, J. F. G. Auchmuty, Y. F. Chang, David L. Colton, Todd Dupont, S. C. Eisenstat, M. H. Schultz, A. H. Sherman, Ruben J. Espinosa, R. Pertsch Gilbert, G. C. Hsiao, R. P. Gilbert, P. Linz, R. P. Gilbert, R. J. Weinacht, J. T. King, D. G. Korn, Z. Nashed, E. Newberger, R. E. O'Malley, Jr., B. E. Rhoades, W. Walter, W. Wendland, R. Wilhelmson.

Leslie COHN. — **Analytic theory of the Harish-Chandra C-function.** — Lecture notes in mathematics, 429. — Un volume broché, $16,5 \times 24$, de 154 pages. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — The C -ring. — Certain polynomial functions on \bar{N} . — An application of the Campbell-Hausdorff formula. — The "fundamental theorem of calculus" on \bar{N} . — Some estimates. — The representation q . — The differential equations satisfied by $e^{i\nu-p(H(\bar{n}))}$. — The differential equations on \bar{N} satisfied by the cusp form. — Application of the differential equations. — The functions $F_j(\nu|n)(b)$. — The homomorphism $F_j(\nu)$. — Preservation of certain filtrations. — Injectivity of the homomorphism F_j . — Invariance properties of the homomorphism $F_j(\nu)$. — Non-vanishing of certain polynomials. — Algebraic properties of the C -Ring. — The difference equations satisfied by the C -Function. — The critical points of the function $\nu(H(\bar{n}))$. — The asymptotic behaviour of the C -Function. — The uniqueness theorem. — The representation theorems. — Conclusion.

Algebraic and geometrical methods in topology. — Conference on topological methods in algebraic topology, SUNY, Binghamton, October 3-7, 1973. — Edited by L. F. McAuley. — Lecture notes in mathematics, 428. — Un volume broché, $16,5 \times 24$, de xi, 280 pages, avec figures. — Prix: DM 28.00. — Springer, Berlin/Heidelberg/New York, 1974.

Homotopy theory, fibre spaces: 5 exposés par J. D. Stasheff, P. Hilton, J. Harper, C. Wilkerson, D. A. Edwards. — *Category theory*: 1 exposé par P. J. Malraison, Jr. — *Topology and geometry of manifolds*: 4 exposés par J. C. Becker, L. M. Mahony, E. C. Turner, K. Wang. — *Geometric topology, infinite dimensional manifolds*: 2 exposés par T. A. Chapman, R. Geoghegan.

V. G. ROMANOV. — **Integral geometry and inverse problems for hyperbolic equations.** — Springer tracts in natural philosophy, vol. 26. — Un volume relié, 16×24 , de 151 pages, avec figures. — Prix: DM 58.00. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Some problems in integral geometry. — Inverse problems for hyperbolic linear differential equations. — Applications of the linearized inverse kinematic problem to geophysics.

Paul R. CHERNOFF; Jerrold E. MARSDEN. — **Properties of infinite dimensional Hamiltonian systems.** — Lecture notes in mathematics, 425. — Un volume broché, $16,5 \times 24$, de 160 pages. — Prix: DM 20.00. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction. — Symplectic structures and Hamiltonian systems. — Linear Hamiltonian systems. — Some general properties of nonlinear semigroups. Hamiltonian systems. — Lagrangian systems. — Symmetry groups and conservation laws.

Martin L. SILVERSTEIN. — **Symmetric Markov processes.** — Lecture notes in mathematics, 426. — Un volume broché, $16,5 \times 24$, de vi, 287 pages. — Prix: DM 28.00. — Springer, Berlin/Heidelberg/New York, 1974.

General theory: Transience and recurrence; Regular Dirichlet spaces; Some potential theory; Construction of processes; An approximate Markov process; Additive functionals; Balayage; Random time change. — *Decomposition of the Dirichlet form*: Potentials in the wide sense; The Lévy Kernel; The diffusion form; Characterization of κ and J . — *Structure theory*: Preliminary formula; The reflected Dirichlet space; First structure theorem; The recurrent case; Scope of first structure theorem; The enveloping Dirichlet space; Equivalent regular representations; Second structure theorem; Third structure theorem.

Hideki OMORI. — **Infinite dimensional Lie transformation groups.** — Lecture notes in mathematics, 427. — Un volume broché, $16,5 \times 24$, de x, 149 pages, avec figure. — Prix: DM 18.00. — Springer, Berlin/Heidelberg/New York, 1974.

General theory of strong ILB-Lie groups and subgroups. — Groups of diffeomorphisms. — Basic theorems I. — Vector bundles over strong ILB-Lie groups. — Review of the smooth extension theorem and a remark on elliptic operators. — Basic theorems II (Frobenius theorem). — Frobenius theorem on strong ILB-Lie groups. — Miscellaneous examples. — Primitive transformation groups. — Lie algebras of vector fields. — Linear groups and groups of diffeomorphisms.

Paul R. HALMOS. — **Naive set theory.** — Undergraduate texts in mathematics. — Reprint of the 1960 ed. published by Van Nostrand, Princeton, N. J., in series: The University series in undergraduate mathematics. — Un volume relié, $16 \times 23,5$, de vii, 104 pages. — Prix: DM 13,50. — Springer, New York/Heidelberg/Berlin, 1974.

The axiom of extension. — The axiom of specification. — Unordered pairs. — Unions and intersections. — Complements and powers. — Ordered pairs. — Relations. — Functions. — Families. — Inverses and composites. — Numbers. — The Peano axioms. — Arithmetic. — Order. — The axiom of choice. — Zorn's lemma. — Well ordering. — Transfinite recursion. — Ordinal numbers. — Sets of ordinal numbers. — Ordinal arithmetic. — The Schröder-Bernstein theorem. — Countable sets. — Cardinal arithmetic. — Cardinal numbers.

Paul R. HALMOS. — **A Hilbert space problem book.** — Graduate texts in mathematics, 19. — Reprint of the 1967 ed. published by Van Nostrand, Princeton, N. J. in series: The University series in higher mathematics. — Un volume relié, 16×24 , de xvii, 365 pages. — Prix: DM 30,70. — Springer, New York/Heidelberg/Berlin, 1974.

Vectors and spaces. — Weak topology. — Analytic functions. — Infinite matrices. — Boundedness and invertibility. — Multiplication operators. — Operator matrices. — Properties of spectra. — Examples of spectra. — Spectral radius. — Norm topology. — Strong and weak topologies. — Partial isometries. — Unilateral shift. — Compact operators. — Subnormal operators. — Numerical range. — Unitary dilations. — Commutators of operators. — Toeplitz operators.

L. S. PONTRYAGIN. — **Topological groups.** — 2nd edition, translated from the Russian by Arlen Brown. — Un volume broché, 15×23 , de xiv, 543 pages. — Prix: £10.20. — Gordon and Breach, New York/London/Paris, 1966.

Groups. — Topological spaces. — Topological groups. — Topological division rings. — Linear representations of compact topological groups. — Locally compact

commutative groups. — The concept of a Lie group. — The structure of compact groups — Locally isomorphic groups. — Lie groups and Lie algebras. — The structure of compact Lie groups.

Mathematiker über die Mathematik. — Hrsg. von Michael Otte unter Mitwirkung von H. N. Jahnke, Th. Mies und G. Schubring. — Wissenschaft und Öffentlichkeit. — Un volume broché, $13,5 \times 20,5$, de 481 pages, avec portraits et figures. — Prix: DM 24.00. — Springer, Berlin/Heidelberg/New York, 1974.

Mathematische Abstraktion und Erfahrung. — Methoden und Struktur der Mathematik. — Probleme der Anwendung von Mathematik. — Mathematische Wissenschaft und Unterricht.

Helmut H. SCHAEFER. — **Banach lattices and positive operators.** — Die Grundlehren der mathematischen Wissenschaften, 215. — Un volume relié, 17×25 , de xi, 376 pages. — Prix: DM 98.00. — Springer, Berlin/Heidelberg/New York, 1974.

Positive matrices: Linear operators on C^n ; Positive matrices; Mean ergodicity; Stochastic matrices; Doubly stochastic matrices; Irreducible positive matrices; Primitive matrices; Invariant ideals; Markov chains; Bounds for eigenvalues. — *Banach lattices*: Vector lattices over the real field; Ideals, bands, and projections; Maximal and minimal ideals; Vector lattices of finite dimension; Duality of vector lattices; Normed vector lattices; Quasi-interior positive elements; Abstract M -spaces; Abstract L -spaces; Duality of AM - and AL -spaces. The Dunford-Pettis property; Weak convergence of measures; Complexification. — *Ideal and operator theory*: The lattice of closed ideals; Prime ideals; Valuations; Compact spaces of valuations; Representation by continuous functions; The Stone approximation theorem; Mean ergodic semi-groups of operators; Operator invariant ideals; Homomorphisms of vector lattices; Irreducible groups of positive operators; The Halmos-von Neumann theorem; Positive projections. — *Lattices of operators*: The modulus of a linear operator; Preliminaries on tensor products. New characterization of AM - and AL -spaces; Cone absolutely summing and majorizing maps; Banach lattices of operators; Integral linear mappings; Hilbert-Schmidt operators and Hilbert lattices; Tensor products of Banach lattices; Banach lattices of compact maps. Examples; Operators defined by measurable kernels; Compactness of Kernel operators. — *Applications*: An imbedding procedure; Approximation of lattice homomorphisms (Korovkin theory); Banach lattices and cyclic Banach spaces; The peripheral spectrum of positive operators; The peripheral point spectrum of irreducible positive operators; Topological nilpotency of irreducible positive operators; Application to non-positive operators; Mean ergodicity of order contractive semi-groups. The little Riesz theorem.

Robert HERMANN. — **Physical aspects of Lie group theory.** — Collection de la Chaire Aisenstadt. — Un volume relié, $16,5 \times 24$, de 271 pages. — Prix: FF 66,50. — Presses de l'Université de Montréal, Canada, 1974.

Group and Lie algebras. — Generalized functions defined by analytic functions. — Formal aspects of resolvent theory. — Resolvents of operators with discrete spectrum. — Limits of resolvent expansions on Lie groups. — Some general ideas about deformations of groups, spaces and Fourier expansions. — Harmonic analysis of functions on the sphere. — Resolvents of several commuting operators. — The method of stationary phase. — Representations of Heisenberg groups and algebras. — Linear quantum fields. — The geometry of scattering in classical particle mechanics.

Mark KAC. — **Quelques problèmes mathématiques en physique statistique.** — Collection de la Chaire Aisenstadt. — Un volume relié, $16,5 \times 24$, de 80 pages, avec figures. — Prix: FF 49.00. — Presses de l'Université de Montréal, Canada, 1974.

Les transitions de phase pour un modèle unidimensionnel. — Réseau gazeux et modèles sphériques. — Le problème des chaînes désordonnées.

Beiträge zur Analysis 5. — Hrsg. von Rolf Klötzler, Wolfgang Tutschke, Klaus Wiener. — Un volume broché, 17×24 , de 117 pages, avec figures. — Prix: DM 28.00. — Deutscher Verlag der Wissenschaften, Berlin, 1973.

Contient 9 exposés par: R. Klötzler, K. Beckert, G. Fuchs, W. Tutschke, W. Preuss, I. Stephani, L. v. Wolfersdorf, L. Jentsch.

Russell C. WALKER. — **The Stone-Čech compactification.** — Ergebnisse der Mathematik und ihrer Grenzgebiete, 83. — Un volume relié, 16×24 , de x, 322 pages, avec figures. — Prix: DM 74.00. — Springer, Berlin/Heidelberg/New York, 1974.

Development of the Stone-Čech compactification. — Boolean algebras. — On βN and N^* . — Non-homogeneity of growths. — Cellularity of growths. — Mappings of βX to X^* . — βN revisited. — Product theorems. — Local connectedness, continua, and X^* . — βX in categorical perspective.

Progress in statistics. — European Meeting of Statisticians, Budapest (Hungary), 1972. — Edited by J. Gani, K. Sarkadi, I. Vincze. — Colloquia mathematica societatis Janos Bolyai, 9. — 2 volumes reliés, 18×24 , de 453 pages, avec figures. — Prix: \$69.25. — North Holland, Amsterdam/London, 1972.

Vol. 1: 38 exposés par P. Adler, Z. Szabo, R. Ahmad, R. V. Ambarcumjan, C. Andrieu, Bui-Trong-Liêu, C. Langrand, M. Arato, A. Benczúr, P. Bártfai, I. I. Berenblut, G. I. Webb, H. Bergström, J. E. Besag, J. Bibby, F. Burkhardt, L. Osadnik, T. Cacoullous, Ch. Charalambides, C. L. Chiang, P. Clifford, A. Sudbury, D. R. Cox, A. M. Herzberg, M. Csörgö, H. Drygas, G. Enderlein, J. Fritz, P. Gänsler, M. Girault, J. C. Gittins, D. M. Jones, J. Gordesch, B. Gyires, L. Györfi, N. Hadidi, G. Härtler, K. Hinderer, H. Walk, P. Holgate, V. Horálek, M. Iosifescu, M. Jilek, J. Jurečková, D. G. Kendall, J. F. C. Kingman, H. S. Konijn, K. Kovacsics, I. Kramosil. — *Vol. 2*: 43 exposés par R. G. Laha, E. Lukacs, D. V. Lindley, J. Loris-Teghem, P. Mandl, M. Metivier, V. Miké, M. A. Mirzamedov, S. A. Hasimov, S. G. Mohanty, S. Vellore, E. Mohn, I. Holme, R. Volden, V. V. Nalimov, D. Oakes, A. Obretenov, F. Österreicher, W. R. Pabst, V. Paulauskas, A. Perez, J. Pergel, V. V. Poznjakov, J. Radcliffe, T. Rolski, M. Ruda, L. Szeidl, G. Tusnady, L. E. Schwartz, R. Sibson, Z. Šidák, R. S. Silverman, A. Nádas, A. Simonovits, A. N. Širjaev, J. Stene, J. Štěpán, M. Stone, J. M. Stoyanov, D. O. H. Szász, G. J. Székely, W. Y. Tan, I. Guttman, J. Tanko, E. Thorp, R. Whitley, P. Thyregod, J. Tomko, V. Tzonev, K. Urbanik, I. Vincze, K. W. Wachter, T. Williams.

Georgi E. SHILOV. — **An introduction to the theory of linear spaces.** — Translated from the Russian by Richard A. Silverman. — Un volume broché, $13,5 \times 21,5$, de ix, 310 pages, avec figures. — Prix: \$4.00. — Dover Publications, New York, 1974.

Determinants. — Linear spaces. — Systems of linear equations. — Linear functions of a vector argument. — Coordinate transformations. — Bilinear and quadratic forms. — Euclidean spaces. — Orthogonalization and the measurement of volume. — Invariant

subspaces and eigenvectors. — Quadratic forms in a Euclidean space. — Quadric surfaces. — Infinite-dimensional Euclidean spaces.

Robert WEINSTOCK. — **Calculus of variations with applications to physics and engineering.** — Un volume broché, $13,5 \times 21,5$, de x, 326 pages, avec figures. — Prix: \$4.00. — Dover publications, New York, 1974.

Introduction. — Background preliminaries. — Introductory problems. — Isoperimetric problems. — Geometrical optics: Fermat's principle. — Dynamics of particles. — Two independent variables: the vibrating string. — The Sturm-Liouville eigenvalue-eigenfunction problem. — Several independent variables: the vibrating membrane. — Theory of elasticity. — Quantum mechanics. — Electrostatics.

Beiträge zur Analysis 6. — Hrg. von Rolf Klötzler, Wolfgang Tutschke, Klaus Wiener. — Un volume broché, 17×24 , de 168 pages, avec figures. — Prix: DM 28.00. — Deutscher Verlag der Wissenschaften, Berlin, 1974.

Contient 16 exposés de R. Klötzler, H. Beckert, H. Benker, J. Musielak, U. Kosel und K. Wiener, M. Schleiff, D. Göhde, N. Moussa, J. Maul, D. Sosna, L. Jentsch, M. Goebel, R. Klötzler, J. Hirche und W. Langhammer, H. Rudolph.

Leopold SCHMETTERER. — **Introduction to mathematical statistics.** — Translated from the German by Kenneth Wickwire. — Die Grundlehren der mathematischen Wissenschaften, 202. — Un volume relié, $16,5 \times 24$, de vi, 502 pages, avec figures. — Prix: DM 124.00. — Springer, Berlin/Heidelberg/New York, 1974.

Introduction to probability theory. — Elementary sampling theory. — Introduction to the theory of hypothesis testing. — The theory of confidence sets. — Theory of estimation. — Theory of regression and the sampling theory of multidimensional normal distributions. — Introduction to non-parametric theories.

G. J. O. JAMESON. — **Topology and normed spaces.** — Chapman and Hall mathematics series. — Un volume broché, $14 \times 21,5$, de xii, 408 pages. — Prix: £3.80. — Chapman and Hall, London, 1974.

Topology. — Normed linear spaces. — *Appendix 1*: Countability. — *Appendix 2*: Zorn's lemma.

Peter HILTON; Guido MISLIN; Joe ROITBERG. — **Localization of nilpotent groups and spaces.** — North-Holland mathematics studies, 15. — Notas de matematica, 55. — Un volume broché, de $16,5 \times 24$, de x, 156 pages, avec figures. — Prix: Dfl. 28.00. — North Holland/American Elsevier Publishing Co., Amsterdam/Oxford/New York, 1975.

Localization of nilpotent groups: Localization theory of nilpotent groups; Properties of localization in N ; Further properties of localization; Actions of a nilpotent group on an abelian group; Generalized erre classes of groups. — *Localization of homotopy types*: Localization of 1-connected CW -complexes; Nilpotent spaces; Localization of nilpotent complexes; Quasifinite nilpotent spaces; The main (pullback) theorem; Localizing H -spaces; Mixing of homotopy types. — *Applications of localization theory*: Genus and H -spaces; Finite H -spaces, special results; Non-cancellation phenomena.

Waclaw SIERPINSKI. — **Œuvres choisies. tome 2.** — Publ. par les soins de S. Hartman, K. Kuratowski, E. Marczewski, A. Mostowski et A. Schinzel. — Un volume relié, 25×18 , de 780 pages, avec portrait et figures. — Prix: \$35.00. — Editions scientifiques de Pologne, Warszawa, 1975.

Contient les travaux de l'auteur sur la théorie des ensembles et ses applications en plus des travaux des années 1908-1929.

L. E. J. BROUWER: **Collected works.** — Vol. 1: Philosophy and foundations of mathematics. — Edited by A. Heyting. — Un volume relié, $19,5 \times 27$, de xv, 628 pages, avec portrait et figures. — Prix: Dfl. 250.00. — North Holland/American Elsevier Publishing Co., Amsterdam/Oxford/New York, 1975.

Introduction. — *Travaux publiés de 1905 à 1955*, dont 29 en anglais, 34 en allemand et 3 en français. — *Travaux non-publiés*: On the extension of the domain of a function; Discontinuous intuitionistic functions of a real variable; Syllabus of a posthumous manuscript based on the lectures which Brouwer gave at Cambridge, England, in 1946.

Robert M. SWITZER. — **Algebraic topology: homotopy and homology.** — Die Grundlehren der mathematischen Wissenschaften, Band 212. — Un volume relié, $16,5 \times 24$, de xii, 526 pages, avec figures. — Prix: DM 122.00. — Springer, Berlin/Heidelberg/New York, 1975.

Some facts from general topology. — Categories, functors and natural transformations. — Homotopy sets and groups. — Properties of the homotopy groups. — Fibrations. — *CW*-complexes. — Homotopy properties of *CW*-complexes. — Homology and cohomology theories. — Spectra. — Representation theorems. — Ordinary homology theory. — Vector bundles and *K*-theory. — Manifolds and bordism. — Products. — Orientation and duality. — Spectral sequences. — Characteristic classes. — Cohomology operations and homology cooperations. — The Steenrod algebra and its dual. — The Adams spectral sequence and the *e*-invariant. — Calculation of the cobordism groups.

G. W. BLUMAN; J. D. COLE. — **Similarity methods for differential equations.** — Applied mathematical sciences, vol. 13. — Un volume broché, $17 \times 25,5$, de vii, 332 pages, avec figures. — Prix: DM 23.30. — Springer, New York/Heidelberg/Berlin, 1974.

Ordinary differential equations. — Partial differential equations. — *Appendix*: Solution of quasilinear first-order partial differential equations.

L. D. BERKOVITZ. — **Optimal control theory.** — Applied mathematical sciences, vol. 12. — Un volume broché, $17 \times 25,5$, de ix, 304 pages, avec figures. — Prix: DM 23.30. — Springer, New York/Heidelberg/Berlin, 1974.

Examples of control problems. — Formulation of the control problem. — Existence theorems with convexity assumptions. — Existence without convexity. — The maximum principle and some of its applications. — Proof of the maximum principle.

Anatole BECK. — **Continuous flows in the plane.** — With the assistance of Jonathan and Mirit Lewin. — Die Grundlehren der mathematischen Wissenschaften, Band 201. — Un volume relié, $16,5 \times 24$, de xi, 462 pages, avec figures. — Prix: DM 114.00. — Springer, Berlin/Heidelberg/New York, 1974.

Elementary properties of flows. — Special properties of plane flows. — Regular and singular points. — Reparametrization I. — Reparametrization II. — Existence theorems I. — Existence theorems II. — Algebraic combinations of flows I. — Algebraic combinations of flows II. — Fine structure in $G_r(\varphi)$. — Fine structure in $G_s(\varphi)$ I. — Fine structure in $G_s(\varphi)$ II. — *Appendix A*: Topology. — *Appendix B*: The Kurzweil integral. — *Appendix C*: Some properties of the plane.

Entwicklung der Mathematik in der DDR. — Zum 25. Jahrestag der Gründung der Deutschen Demokratischen Republik im Auftrag der Mathematischen Gesellschaft der DDR. — Hrsg. von Horst Sachs. — Un volume relié, 18,5 × 24,5, de xx, 756 pages, avec figures. — Prix: DM 75.00. — Deutscher Verlag der Wissenschaften, Berlin, 1974.

Contient des exposés par divers auteurs sur les thèmes suivants: Mathematische Logik und Grundlagen der Mathematik. — Algebra. — Algebraische Geometrie und kommutative Algebra. — Zahlentheorie. — Geometrie. — Topologie. — Globale Analysis. — Graphentheorie. — Mass- und Integrationstheorie, Ergodentheorie. — Funktionalanalysis. — Nichtlineare Probleme und Monotonietheorie. — Variationsrechnung. — Komplexe Analysis. — Numerische Mathematik. — Differentialgleichungen. — Integralgleichungen. — Operatorenrechnung und Asymptotik. — Thermoelastische Probleme in stückweise homogenen Körpern. — Schwingungstheorie. — Theoretische Strömungsmechanik. — Allgemeine Relativitäts- und Gravitationstheorie. — Wahrscheinlichkeitsrechnung. — Mathematische Statistik. — Mathematische Methoden der Operationsforschung. — Mathematik in Volkswirtschaft und Industrie. — Mathematische Grundlagen der Kybernetik und Rechentechnik. — Mathematische Maschinen. — Mathematische Gesellschaft der Deutschen Demokratischen Republik.

S. BREHMER; H. APELT. — **Analysis I: Folgen, Reihen, Funktionen.** — Mit historischen Anmerkungen von H.-J. Ilgands. — Mathematik für Lehrer, Band 4. — Studienbücherei. — Un volume broché, 16,5 × 23, 207 pages, avec figures. — Prix: DM 14.80. — Deutscher Verlag der Wissenschaften, Berlin, 1974.

Einige grundlegende Begriffsbildungen der Analysis. — Der Grenzwertbegriff.

Control theory, numerical methods and computer systems modelling. — International symposium, Rocquencourt, June 17-21, 1974. — Ed. by A. Bensoussan and J. L. Lions. — Lecture notes in economics and mathematical systems, 107. — Un volume broché, 16,5 × 24, de viii, 757 pages, avec figures. — Prix: DM 53.00. — Springer, Berlin/Heidelberg/New York, 1975.

Théorie du filtrage. — Théorie des jeux. — Contrôle des systèmes distribués stochastiques et des champs aléatoires. — Contrôle stochastique. — Problèmes en temps discret et méthodes numériques. — Contrôle des systèmes à paramètres distribués. — Contrôle de processus de saut et applications aux modèles de systèmes informatiques. — Problèmes de frontière libre et théorie du contrôle. — Applications de la théorie du contrôle en économie, en contrôle de processus industriel et en reconnaissance de formes.

José BARROS-NETO. — **An introduction to the theory of distributions.** — Pure and applied mathematics, a series of monographs and textbooks, 14. — Un volume relié, 16 × 23,5, de ix, 221 pages. — Prix: \$16.00. — Marcel Dekker, New York, 1973.

Locally convex spaces. — Distributions. — Convolutions. — Tempered distributions and their Fourier transforms. — Sobolev spaces. — On some spaces of distributions. — Applications.
