available until the Congress itself. May the next Congress, scheduled for Adelaide, Australia in 1984, build on the success and avoid the weaknesses, of Berkeley!"

Proceedings of the Congress will shortly be available.

3. BULLETIN OF ICMI

A number of reasons account for the late appearance of the 12th issue of the Bulletin, and the Secretary wishes to take this opportunity to apologize for those shortcomings in the publication process for which he must take responsibility. However, a continuing problem is the paucity of material for the Bulletin, so that it is extremely important that the President's appeal for suitable material be heeded. The Executive Committee of ICMI is especially anxious to receive information about initiatives being taken to hold regional conferences devoted to particular aspects of mathematics education. However, relevant personal items would also be welcome.

4. FUTURE ACTIVITIES

Certainly the most important future activities which should be brought to the attention of those interested in mathematics education are:

(i) ICMI Symposium on "What Mathematics Should be Taught in General Education", to be held concurrently with the ICM Congress in Warsaw in August, 1982. This symposium is being organized by Professor Z. Semadeni, of the Matematyczny Instytut PAN, Warsaw, and the joint chairmen of the Programme Committee are Professors Z. Krygowska of Kraków, Poland, and H.-G. Steiner of Bielefeld, West Germany. Considerable attention will be given to the problems of developing countries.

(ii) ICME V, the fifth International Congress on Mathematics Education, to be held in Adelaide, South Australia, in August, 1984. The chairman of the International Program Committee is Dr. M. F. Newman, of the Department of Mathematics of the Australian National University in Canberra.
