Nutzungsbedingungen

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

Conditions d'utilisation

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. $$(**) \quad \Delta_K(t) = \Delta_{\bar{K}}(t)^2(t^{(1-\lambda)/2} + \dots + 1 + \dots + t^{(\lambda-1)/2}) + 2f(t),$$

where $f(t) \in \mathbf{Z}[t, t^{-1}]$ satisfies $f(t) = f(t^{-1})$. Writing

$$f(t) = a_n t^{-n} + \dots + a_0 + \dots + a_n t^n,$$

we see $f(1) \equiv f(-1) \pmod{4}$. Since $\Sigma \rightarrow \Sigma/G$ is a 2-fold cover branched over K , $|\Delta_K(-1)| = |H_1(\Sigma)| = 1$. So $1 = \Delta_K(1) \equiv \Delta_K(-1) \pmod{4}$, and we see $\Delta_K(-1) = 1$. Take equation $(**)$ and plug in $t = 1$ and $t = -1$:

$$\begin{aligned} 1 &= 1 \cdot \lambda + 2 \cdot f(1) \\ 1 &= 1 \cdot (-1)^{(\lambda-1)/2} + 2 \cdot f(-1). \end{aligned}$$

Thus $\lambda \equiv (-1)^{(\lambda-1)/2} \pmod{8}$ so $\lambda \equiv \pm 1 \pmod{8}$.

Applying the high-dimensional version of Murasugi's congruence ones sees that if $G \times H \cong C_2 \times C_2$ acts on a homology q -sphere Σ so that Σ^G is a homology $q-2$ sphere and Σ^H is a circle disjoint from Σ^G , then their linking number λ is congruent to ± 1 modulo 8. This and considerations from L -theory lead us to conjecture that if $G \times H \cong C_2 \times C_2$ acts on a homology q -sphere Σ so that Σ^G is a homology k -sphere and Σ^H is a homology $q-k-1$ -sphere disjoint from Σ^G , then their linking number λ is congruent to ± 1 modulo 8.

Acknowledgements. This work was partially supported by an NSF Postdoctoral Fellowship and an NSF grant. We would like to thank Alejandro Adem for a careful reading of an earlier version of this manuscript.
