Our opponents - the lovely people from Taranaki - have asked us to postpone the competition till March. We agreed. In fact this additional month will give our competitors more time to get fit and ready for the "big battle". It will also give our supporters more room to breathe - so many events are happening in February.

SUPER COMPUTER

A super computer, installed at the Centro Svizzero di Calcolo Scientifico in Manno by Lugano, can perform one billion operations per second. Being one of the fastest computers in Europe, it is 20.000 times more powerful than the average personal computer. However, what we do not know is how long it would take to load all the information into the computer so that it can perform this 'miracle' of one billion operations in one second.
