Digestion facts

Tummy rumbles: When you are hungry, your insides sometimes make strange rumblings and bubblings. As the empty stomach and intestines prepare to digest, they squirm and churn and slurp and slop the juices and gas within. Do you need a word for these gurgling noises? They are called borboryg-mus.

As you eat your meal, you may swallow up to half a litre of air. This air can come up from the stomach as a belch. Also, the digestive processes make gases such as methane. These pockets of air go through the intestines and are pushed out the rear end - and you know the word for these noises...
