Bibliographie für Versicherungsmathematik, Statistik und Datenverarbeitung

Bearbeitet von *E. Zwinggi*, Basel

Mitteilungen der Vereinigung schweizerischer Versicherungsmathematiker

Band 61, 1961

- Nef, W.*: Der Einsatz eines Rechenautomaten im Rahmen einer Universität. S. 25–39.
- Wegmüller, Walter*: Constitution organique et fonctionnement du calculateur électronique BULL GAMMA-AET. S. 41–64.
- Boehm, Carl*: Die Zahl der Vergleichsoperationen beim Mischen auf 3 Bahnen. S. 65–75.
- Leepin, P.*: Simulation von Intelligenz durch Maschinen. S. 77–92.
- Capt, E.*: La méthode de Lidstone et son degré d'approximation. S. 93–103.
- Schaetzle, Theo* und *Deprez, Eric*: Pensionskassen mit variablen Renten. S. 105–124.
- Iff, Paul*: Der Gruppenexcedent in der Feuer-Rückversicherung. S. 125–132.
- Jecklin, H.*: Betrachtungen zum Sterblichkeitsverlauf erhöhter Risiken. S. 133–149.
- Nolfi, P.*: Zur Auffindung optimaler Sterblichkeitsgrundlagen. S. 151–160.
- Rufener, E.*: Hyperbolische Interpolation mit Restglied. S. 161–171.
- Bühlmann, Hans*: Über das Testen von Sterblichkeitshypothesen über anomale Risiken. S. 173–181.
- Ammeter, Hans*: Risikotheoretische Grundlagen der Erfahrungstarifizierung. S. 183 bis 217.
- Meier, Hans-Peter*: Bearbeitung des Witwenrentenfaktors $f^w(xA)$ der Grundlagen für Gruppenversicherungen mit elektronischen Rechenmaschinen. S. 219–221.
- Baumgartner, U.*: Abschätzung von Reserven mit spieltheoretischen Methoden. S. 223 bis 274
- Capt, Edmond*: Un aspect du problème du risque. S. 275–284.
- Schöbe, Waldemar*: Zum Lucasschen Ehepaarproblem. S. 285–292.
- Yntema, L.*: Äquivalenzrechnung. S. 293–310.
- Sumitsuji, Osa mu*: Some elementary researches in the mathematics of life insurance (III). S. 311–318.
- Ammeter, Hans*: Das zweite internationale Kolloquium der ASTIN über versicherungsmathematische Probleme der Nicht-Lebensversicherung. S. 319–329.

**Internationale Zeitschrift für versicherungsmathematische und statistische
Probleme der sozialen Sicherheit**

Nr. 5–6, 1960

- Pinto de Moura, Gastão*: Las jubilaciones y el régimen de reparto. S. 33–69.
Consaël, Robert: De l'influence de l'indexation des prestations à long terme sur les systèmes de financement à la prime moyenne. S. 71–99.
Van Klinken, J.: The classification of accident risks. S. 101–112.
Deprez, Eric: Nouvelles bases techniques pour assurances de pensions. S. 113–118.
Schuler, W.: Technische Grundlagen der Eidgenössischen Versicherungskasse. S. 119 bis 123.
Clarke, C. E.: Quinquennial reviews of the British National Insurance and industrial injuries schemes. S. 125–132.
Clarke, C. E.: Increases of benefits in the British National Insurance and industrial injuries schemes. S. 133–137.
Thullen, P. (I. L. O.): Remarks on the morbidity rate. S. 139–149.
Santini, Carlo: Sur une valeur approchée de la rente de famille. S. 151–179.
Finanzielle Gesichtspunkte der Internationalen Übereinkommen über die Soziale Sicherheit der Wanderarbeitnehmer. S. 181–209.
Wiesler, H.: Première table de mortalité pour la Turquie. S. 211–226.

Schweizerische Versicherungs-Zeitschrift

29. Jahrgang, 1961/62

- Viret, Bernard*: Quelques problèmes relatifs au suicide de l'assuré dans l'assurance sur la vie. S. 129–138.
Eine schwedische Untersuchung über die Schadenfrequenz in der Autoversicherung und die Anpassung des Tarifes an deren Ergebnisse. S. 174–176.
Wetter, H.: Die Besteuerung der Versicherungsgesellschaften. S. 226–246.
Wallinger, Willy: Doppelbesteuerungsprobleme der Versicherungsgesellschaften. S. 246–257.
Marcuard, Bernhard: Die Stempelabgaben im Versicherungswesen. S. 258–267.
Pétermann, Pierre: Faveurs accordées par le fisc de la Confédération et ceux des cantons à des œuvres de prévoyance ainsi qu'aux preneurs et bénéficiaires d'assurances. S. 267–276.
Wallinger, Willy: Sicherung der Steueransprüche bei Versicherungen. S. 285–297.
Güpfert, H.: Steuer und Sozialversicherung. S. 297–306.
Lorenz-Liburnau, Hans: Die Versicherung in der europäischen Integration unter besonderer Berücksichtigung des Liberalisierungskodex der OEEC. S. 339–349 und 380–392.

Schweizerische Zeitschrift für Sozialversicherung

5. Jahrgang, 1961

- Siegrist, Willi*: Probleme der schweizerischen Krankenversicherung. S. 35–49.
Naef, Hans: Schlussbemerkungen zur fünften AHV-Revision. S. 117–125.
Burckhardt, Eduard: Die eidgenössische Invalidenversicherung in der Praxis. S. 126 bis 136.
Wyss, Hans: Über Finanzierungssysteme für Personal-Versicherungskassen. S. 270 bis 281.

Hänggi, Eugen: Die Teilrevision des KUVG. S. 282–299.

Wenk, Erwin: Die Schweizerische Sozialversicherung in Zahlen. S. 300–303.

Schweizerische Zeitschrift für Volkswirtschaft und Statistik

97. Jahrgang, 1961

Jecklin, Heinrich: Zur Frage der Finanzierung von Personalversicherungen. S. 89–93.

Billeter, Ernst P.: Operations research und Statistik. S. 185–193.

Strecker, Heinrich: Statistische Kausalforschung in den Sozialwissenschaften. S. 309 bis 319.

Tinbergen, Jan: The spatial dispersion of production: A hypothesis. S. 412–419.

Romer, B.: Über Geldentwertungsverluste und Realwertsicherung bei Lebensversicherungen. S. 420–434.

Schubart, Hans: Annuitätentilgung und Ratentilgung. Ein Vergleich der Gesamtleistungen beider Verfahren. S. 455–460.

Bulletin de l'Association Royale des Actuaires Belges

In 1961 nicht erschienen.

Cahiers du Centre d'Etudes de Recherche opérationnelle

Vol. 3, 1961

de Ghellinck, G.: Application de la théorie des graphes: matrices de Markov et programmes dynamiques. S. 5–35.

Dhondt, A.: File d'attente à plusieurs stations en régime transitoire. S. 36–54.

Berge, C.: Les problèmes de flot et de tension. S. 69–93.

de Ghellinck, G.: Aspects de la notion de dualité en théorie des graphes. S. 94–123.

Falmagne, J. C.: Codage de l'information et temps de réaction de choix. S. 133–157.

Sonnenschein, J.: Un problème de files d'attente. S. 158–164.

Faverge, J. M.: Le principe du maximum de l'utilité attendue dans les décisions humaines. S. 165–176.

Debry, R.: Application des chaînes de Markov à certains problèmes de gestion des stocks. S. 185–201.

Beniest, W.: Le concept de point d'équilibre dans la théorie des jeux finis à deux personnes et de somme non nulle. S. 202–219.

Sonnenschein, J.: Un problème de files d'attente II. S. 220–229.

Blätter der Deutschen Gesellschaft für Versicherungsmathematik

Band 5, Hefte 2 und 3, 1961

Ausschuss für elektronische Rechenautomaten, Arbeitskreis «Elektronik»: Elektronische Datenverarbeitung in den Versicherungsbetrieben. S. 139–145.

Pinta, Claude: Note sur la méthode «Co» pour le calcul des réserves mathématiques. S. 147–154.

Boehm, Carl: Sortierprozesse auf elektronischen Rechenanlagen (I. Interne Sortierverfahren). S. 155–207.

- Hofmeister, Emmi*: Näherungsformeln zur Berechnung der Schwankungsrückstellung in der Brandversicherung. S. 209–219.
- Nebel, Rudolf*: Familienstandsverhältnisse von Ärzten, Zahnärzten und Tierärzten – Bemerkungen zur Kollektivmethode. S. 221–241.
- Härten, Hasso*: Betrachtungen über Mehrsterblichkeit und Auslese. S. 243–251.
- Münzner, Hans*: Alte und neue Extremalprobleme in der Wirtschaft. S. 275–284.
- Petrucchi, Guido*: Der jährliche Geschäftsbericht eines Lebensversicherungsbetriebes in Italien. S. 285–308.
- Schöbe, Waldemar*: Fortschreibung geschlossener Bestände von Versorgungsberechtigten mittels Kommutationszahlen. S. 309–320.
- Berger, Gottfried*: Zur Bewertung ratierlicher Renten. S. 321–326.
- Tröblinger, Alfred*: Mathematische Untersuchungen zur Beitragsermäßigung in der Kraftfahrversicherung. S. 327–348.
- Schnell, Peter* und *Stephan, Dieter*: Einige ALGOL-Programme für Sortierverfahren. S. 349–359.
- Mahn, Helmut*: Eine Bemerkung zu einem Existenzsatz für Gleichgewichtspunkte bei n-Personenspielen. S. 361–365.
- Vajda, Stefan*: Bericht über das 2. ASTIN-Kolloquium. S. 367–370.
- Schäfer, Hans-Willy*: Bericht über die 2. Ausstellung elektronischer Rechengeräte vom 3.–12. Oktober 1961 in London. S. 372–377.

Zeitschrift für die gesamte Versicherungswissenschaft

50. Band, 1961

- Grossmann, Marcel*: Besteht für die Versicherungsunternehmung die Notwendigkeit einer systematischen Forschung? S. 1–14.
- Gürtler, Max*: Der Bonus als Mittel zur Erfassung des subjektiven Risikos. S. 15–47.
- Prölss, Erich R.*: Wandlungen des Versicherungsaufsichtsrechts. S. 109–132.
- Aus der Aussprache über das Referat «Wandlungen des Versicherungsaufsichtsrechts». S. 133–139.
- Weidner, Viktor*: Zur Problematik privater und öffentlicher Daseinsvorsorge. S. 141 bis 238.
- «Assecurantia Terra Ignota?» Eine Diskussion über die Notwendigkeit und die Mittel, die Kenntnis des Versicherungsrechts zu verbreiten. S. 239–273.
- Braess, Paul*: Einige theoretische Betrachtungen zum Problem des Bonus in der Kraftfahrtversicherung. S. 275–291.
- Kimball, Spencer L.*: Insurance and the evolution of public policy. S. 293–308.
- Meyer, Heinz*: Einzelfragen aus der deutschen und schweizerischen Versicherungsaufsicht. S. 309–319.
- Weber, Werner*: Die Versicherungsaufsicht in der gegenwärtigen Rechtsentwicklung. S. 333–350.
- Krampe, Gerhard*: Die Befugnis der Aufsichtsbehörde zum Erlass von Rechnungslegungsvorschriften nach § 55 Abs. 2 VAG. S. 351–361.
- Reichert-Facilides, Fritz*: Aktienrechtsreform und Versicherungsunternehmensrecht. S. 363–372.
- Hebel, Karl*: Goethe und die Nürnberger Tontine von 1783. S. 373–394.
- Neumann, Leo*: Optimale Prämien-gestaltung. S. 395–425.

Jenkins, Edgar: The concept of "cause" in relation to insurance law, in particular in relation to state insurance. S. 427–442.

Rauschenbach, Fritz: Ärztliche Schweigepflicht im Versicherungswesen im Vergleich zum Beichtgeheimnis. S. 443–459.

Versicherungswirtschaft

16. Jahrgang, 1961

Sachs, Wolfgang: Zur Entwicklung der Gruppenlebensversicherung. S. 57–58.

Müller-Lutz, H. L.: Ansätze zur integrierten Datenverarbeitung. S. 233–236.

Tröbliger, Alfred: Die Kalkulation der festen Beitragsrückgewähr in der Kraftfahrversicherung. S. 246–247.

Sachs, Wolfgang: Der Nutzen des Bonus in der Kraftfahrversicherung. S. 470–474.

Schäfer, Hans-Willy: Das UNIVAC UCT-System. S. 514–515.

Tröbliger, Alfred: Schadenfreiheitsrabatt in lochkartentechnischer Bearbeitung. S. 672–674.

Tröbliger, Alfred: Die Kalkulation der Beitragsrückgewähr. S. 802–805.

Schwepcke, Hans-Jürgen: Probleme des Versicherungsbetriebes beim Übergang auf das Lochkartenverfahren. Nr. 2, S. I–III.

Kösters, Hermann: Mit Lochkarten durchführbare Arbeiten in der Schadenversicherung. Nr. 3, S. I–IV.

Schmitz, Hannes: Bestandserfassung mit Lochkarten und Verwaltung der Lochkartenkartei. Nr. 4, S. I–IV.

Will, Albert: Bearbeitung der Folgeprämien und der Prämienermässigung mit Lochkarten. Nr. 5, S. I–V.

Hentschel, Erich: Statistik in der Sachversicherung. Nr. 6, S. I–II.

Brüning, Julius: Statistik aus der Sicht des HUK-Verbandes. Nr. 7, S. I–III.

Schriftenreihe des Instituts für Versicherungswissenschaft an der Universität Köln

Neue Folge, Heft 17, 1961

Farny, Dieter: Die Versicherungsmärkte. Eine Studie über die Versicherungsmarkttheorie. S. 1–181.

Allgemeines Statistisches Archiv

45. Band, 1961

Gollnick, Heinz: Einige Bemerkungen zur Theorie und Technik der Korrelation monatlicher Zeitreihen. S. 2–26.

Weissker, Jürgen: Zum Problem der Konzentrationsmessung. S. 27–34.

Hamisch, Günter: Einige Bemerkungen zur Messung der Konzentration in der Wirtschaft. S. 35–45.

Fürst, Gerhard: Was soll ein «Produktionsindex» messen? S. 46–52.

Hüfner, Willi: Fünfzig Jahre Deutsche Statistische Gesellschaft (1911–1961). S. 105 bis 112.

Fürst, Gerhard: Über die Wirkungsmöglichkeiten statistischer Gesellschaften. S. 113 bis 124.

Nourney, Martin: Zum Struktureffekt bei Produktivitätsänderungen. S. 125–141.

- Wild, Hans Jochen*: Zur Methode der Konzentrationsmessung. S. 142–144.
- Grohmann, Heinz*: Die sachliche Bedeutung der Indexzerlegung bei Produktivitätsanalysen. S. 201–221.
- Gellrich, Ingeborg*: Die Bedeutung der Statistik für die Arbeiten der Industrie- und Handelskammern. S. 222–230.
- Rauterberg, Martin*: Die Landwirtschaftszählung 1960 im Rahmen der gesamten Agrarstatistik. S. 231–253.
- Werner, Kurt*: Zur Problematik eines Index der industriellen Nettoproduktion. S. 254–262.
- Weissker, Jürgen*: Zum Problem der Konzentrationsmessung. S. 263–265.
- Gleitze, Bruno*: Das Zusammenführen volkswirtschaftlicher und betriebswirtschaftlicher Aspekte in der Wirtschaftsstatistik. S. 313–323.
- Raabe, Karl-Heinz*: Das Zusammenführen volkswirtschaftlicher und betriebswirtschaftlicher Aspekte in der Wirtschaftsstatistik. S. 323–327.
- Bartels, Hildegard*: Die Aufgaben des Statistikers bei der Vorbereitung und Auswertung von Statistiken. S. 328–331.
- Hüfner, Willi*: Die Aufgaben des Statistikers bei der Erhebung und Aufbereitung von Statistiken. S. 332–335.
- Riebel, Paul*: Die Aufgaben des Betriebsstatistikers. S. 336–338.
- Kellerer, Hans*: Die statistische Grundausbildung an den Universitäten. S. 339–342.
- Blind, Adolf*: Die Grundausbildung in der sozialwissenschaftlichen Statistik. S. 342 bis 346.
- Fürst, Gerhard*: Die Weiterbildung und Anstellungsverhältnisse der Statistiker im öffentlichen Dienst. S. 346–349.
- Schäffer, Karl-August*: Planung geschichteter Stichproben bei Vorgabe einer Fehlerabstufung. S. 350–361.

Metrika

4. Band, 1961

- Stange, K.*: Verzerrte und unverzerrte Schätzwerte bei messender Prüfung. S. 1–29.
- Wette, R.*: Bemerkungen zur treffertheoretischen Analyse der Virusinaktivierung durch Formaldehyd. S. 30–36.
- Lomnicki, Z. A.*: Tests for departure from normality in the case of linear stochastic processes. S. 37–62.
- Störmer, H.*: Über einen statistischen Test zur Bestimmung der Parameter einer Lebensdauervertelung. S. 63–77.
- Sagoroff, S.*: Historical note on the application of mathematics in economics in Germany. S. 78–81.
- Bennett, B. M. and Hsu, P.*: Sampling studies on the Behrens-Fisher problem. S. 89 bis 104.
- Pfanzagl, J.*: Ergänzungen zu «Über die Existenz überall trennscharfer Tests». S. 105 bis 106.
- Jaiswal, N. K.*: The queuing system GI/M/1 with finite waiting space. S. 107–125.
- Linhardt, H.*: Zur Wahl von Variablen in der Trennanalyse. S. 126–139.
- Vogel, W.*: Sequentielle Versuchs-Pläne. S. 140–157.
- Bierlein, D.*: Simultan stärkste unverfälschte Tests. S. 158–168.
- Morgenstern, D.*: Der zentrale Grenzwertsatz für Überschreitungswahrscheinlichkeiten. S. 173–177.
- Weichselberger, K.*: Über ein graphisches Verfahren zur Trennung von Mischverteilungen. S. 178–229.

Michel, L.: Zum Problem der numerischen Bestimmung der Niveau-Eigenschaft. S. 230–236.

Wartmann, R.: Trendextrapolation bei Zeitreihen. S. 237–246.

Numerische Mathematik

3. Band, 1961

Schröder, J.: Fehlerabschätzung mit Rechenanlagen bei gewöhnlichen Differentialgleichungen erster Ordnung. S. 39–61.

Schönhage, A.: Fehlerfortpflanzung bei Interpolation. S. 62–71.

Karst, E.: Faktorenerlegung Mersennescher Zahlen mittels programmgesteuerter Rechengerate. S. 79–86.

Felsch, H.: Programmierung der Restklassenabzählung einer Gruppe nach Untergruppen. S. 250–256.

Neubüser, J.: Bestimmung der Untergruppenverbände endlicher p -Gruppen auf einer programmgesteuerten elektronischen Dualmaschine. S. 271–278.

Unternehmensforschung

Zeitschrift für die Anwendung quantitativer Methoden und neuer Techniken
in der Wirtschaftsführung und Praktischen Forschung

Band 5, 1961

Dinkelbach, W. und *Steffens, F.*: Gemischt ganzzahlige lineare Programme zur Lösung gewisser Entscheidungsprobleme. S. 3–14.

Stange, K.: Die beste Schichtung einer Gesamtheit bei optimaler Aufteilung der Probe (Zweite Mitteilung) S. 15–31.

Fersch, F.: Ein Rechenblatt für die Simplexmethode. S. 32–41.

Adam, A.: Abrechnungstableau als Hilfsalgorithmus. S. 42–48.

Knussmann, R.: Algol-Rechenprogramme statistischer Standardverfahren. S. 61–79.

Knödel, W.: Verkehrsplanung einer Großstadt. S. 80–97.

Witting, H.: Optimale Kapazität von Lagerhallen. S. 98–110.

Egert, Ph.: Über ein dynamisches Programmierungsverfahren zur Kostenminimierung bei vorgegebenen Auftragsstückzahlen. S. 111–118.

Fersch, F.: Zum Problem der optimalen Zusatzbestellung. S. 121–131.

Giesen, G.: Die kombinierte Simplex-Methode. S. 132–139.

Göldner, W.: Methoden der Industrieplanung in Entwicklungsländern. S. 140–143.

Künzi, H. P.: Abgekürzte Verfahren beim quadratischen Programmieren. S. 144 bis 165.

Wiezorke, B.: Ein weiteres Rechenschema für die Simplexmethode. S. 166–171.

Adam, A.: Anmerkungen betreffend eine «Statistische Technologie». S. 172–181.

Fersch, F.: Warteschlangen mit gruppiertem Input. S. 185–196.

Terebesi, M.: Bemerkungen zum Verfahren von Gomory zur Bestimmung ganzzahliger Lösungen von linearen Programmen. S. 197–215.

Egert, Ph.: Probleme des Produktionsausgleichs. S. 216–226.

Varga, St.: Die Operationsforschung im Sozialismus. S. 227–233.

Elektronische Rechenanlagen

3. Jahrgang, 1961

- Kreuzer, K.*: Sortieren mit datenverarbeitenden Anlagen. S. 7–13.
- Edelmann, H.*: Digitale Berechnung von Lastenverteilerkurven für optimalen Verbundbetrieb auf der Siemens-Datenverarbeitungsanlage 2002. S. 13–20.

Communications of the Association for Computing Machinery

Vol. 4, 1961

- Huskey, H. D. and Wattenburg, W. H.*: A basic compiler for arithmetic expressions. S. 3–9.
- Grau, A. A.*: Recursive processes and ALGOL translation. S. 10–15.

- Bottenbruch, H.*: Use of magnetic tape for data storage in the ORACLE-ALGOL translator. S. 15–19.
- Englund, Donald and Clark, Ellen*: The CLIP translator. S. 19–22.
- Cheatham, Jr., T. E., Collins, Jr., G. O. and Leonard, G. F.*: CL-I, an environment for a compiler. S. 23–28.
- Arden, B. W., Galler, B. A. and Graham, R. M.*: The internal organization of the MAD translator. S. 28–31.
- Wells, Mark B.*: MADCAP: A scientific compiler for a displayed formula textbook language. S. 31–36.
- Evans, Jr. A., Perlis, A. J. and Van Zoeren, H.*: The use of threaded lists in constructing a combined ALGOL and machine-like assembly processor. S. 36–41.
- Floyd, Robert W.*: An algorithm for coding efficient arithmetic operations. S. 42–51.
- Irons, Edgar T.*: A syntax directed compiler for ALGOL 60. S. 51–55.
- Ingerman, P. Z.*: Thunks. S. 55–58.
- Ingerman, P. Z.*: Dynamic declarations. S. 59–60.
- Sattley, Kirk*: Allocation of storage for arrays in ALGOL 60. S. 60–65.
- Irons, E. T. and Feurzeig, W.*: Comments on the implementation of recursive procedures and blocks in ALGOL 60. S. 65–69
- Huskey, H. D. and Wattenburg, W. H.*: Compiling techniques for Boolean expressions and conditional statements in ALGOL 60. S. 70–75.
- Sibley, R. A.*: The SLANG system. S. 75–84.
- Grems, Mandalay*: A card format for reference files in information processing. S. 90 bis 98.
- Rabinowitz, Philip*: Multiple-precision division. S. 98.
- Ryle, B. L.*: Multiple programming data processing. S. 99–101.
- Carr III, J. W. and Hanson, J. W.*: Two subroutines for symbol manipulation with an algebraic compiler. S. 102–103.
- Nekora, M. R.*: Comment on a paper on parallel processing. S. 103.
- Smith, Richard B.*: The BKS system for the Philco-2000. S. 104.
- Caldwell, Tom*: On finding minimum routes in a network with turn penalties. S. 107 bis 108.
- Bush, Norman*: Statistical programs at the University of North Carolina. S. 108–109.
- Bratman, Harvey*: An alternate form of the “UNCOL” diagram. S. 142.
- Traub, J. F.*: Comparison of iterative methods for the calculation of N th roots. S. 143–145.
- Strachey, C.*: Bitwise operations. S. 146.
- Ross, Douglas T.*: A generalized technique for symbol manipulation and numerical calculation. S. 147–150.
- Lasser, Daniel J.*: Topological ordering of a list of randomly-numbered elements of a network. S. 167–168.
- Smith, Oliver K.*: Eigenvalues of a symmetric 3×3 matrix. S. 168.
- Gray, Marion*: Bessel functions of integral order and complex argument. S. 169.
- Nather, R. E.*: On the compilation of subscripted variables. S. 169–171.
- Karst, E.*: On approximating transcendental numbers by continued fractions. S. 171.
- Sherman, P. M.*: Table look-at techniques. S. 172–173.
- Weinberg, G. M.*: Programmed error correction on a decimal computer. S. 174–175.
- Ross, H. McG.*: Further survey of punched card codes. S. 182–183.
- Kulsrud, H. E.*: A practical technique for the determination of the optimum relaxation factor of the successive over-relaxation method. S. 184–187.

- Bellman, Richard, Juncosa, Mario L. and Kalaba, Robert*: Some numerical experiments using Newton's method for nonlinear parabolic and elliptic boundary-value problems. S. 187–191.
- Nadler, Morton*: Divisions and square root in the quater-imaginary number system. S. 192–193.
- Bemer, R. W., Smith, Jr., H. J. and Williams, Jr., F. A.*: Design of an improved transmission/data processing code. S. 212–217.
- Johnson, L. R.*: An indirect chaining method for addressing on secondary keys. S. 218–222.
- Bellman, Richard*: Successive approximations and computer storage problems in ordinary differential equations. S. 222–223.
- Baker, Frank B.*: A method for evaluating the area of the normal function. S. 224–225.
- Edmundson, H. P. and Wyllys, R. E.*: Automatic abstracting and indexing – survey and recommendations. S. 226–234.
- Blachman, Nelson M.*: The state of digital computer technology in Europe. S. 256–265. Operational compatibility of systems – conventions. S. 266–267.
- Knuth, D. E. and Merner, J. N.*: ALGOL 60 confidential. S. 268–272.
- Cantrell, H. N., King, J. and King, F. E.*: Logic structure tables. S. 272–275.
- Traub, J. F.*: On a class of iteration formulas and some historical notes. S. 276–278.
- Fischer, C. M.*: Combat vehicle firing stability (active suspension). S. 279–283.
- Bellman, R.*: On the approximation of curves by line segments using dynamic programming. S. 284.
- Arden, Bruce W., Galler, Bernard A. and Graham, Robert M.*: An algorithm for equivalence declarations. S. 310–314.
- Wenrick, R. C. and Houghton, A. V.*: Solution of tridiagonal matrices. S. 314.
- Clarkson, William R. and Prince, Benjamin M.*: A divisionless method of integer conversion. S. 315–316.
- Bramhall, J. N.*: An iterative method for inversion of power series. S. 317–318.
- Olivier, Donald*: A further note on approximating e_x . S. 318.
- Gorn, Saul*: Some basic terminology connected with mechanical languages and their processors. S. 336–339.
- Makinson, Thomas N.*: COBOL: A sample problem. S. 340–346.
- Reynolds, Samuel W.*: A generalized polyphase merge algorithms. S. 347–349.
- Kuehn, Heidi G.*: A 48-bit pseudo-random number generator. S. 350–352.
- Marcus, Curt F.*: A note on fitting great circles by least squares. S. 353.
- Cox, Albert G. and Luther, H. A.*: A note on multiple precision arithmetic. S. 353.
- Clendenin, W. W.*: Note on the construction of rational approximations for the error function and for similar functions. S. 354–355.
- Richstone, Morris*: The applied mathematics laboratory of the David W. Taylor model basin. S. 372–375.
- Shapiro, Norman and Vreenegoor, Herman*: The generalized *important event* technique. S. 394–395.
- Rom, Arnold R. M.*: Manipulation of algebraic expressions. S. 396–398.
- Tornheim, Leonard*: Inversion of a complete matrix. S. 398.
- Hutchinson, G. K.*: Optimum tape-writing procedures. S. 399–401.
- Feurzeig, Wallace*: Putting a hex on e^x . S. 402–404.
- ALGOL References in *Communications of the ACM*, 1960–1961. S. 404.
- O'Neill, Robert W.*: A preplanned approach to a storage allocation compiler. S. 417.
- Sams, Burnett H.*: The case for dynamic storage allocation. S. 417–418.
- Roberts, Jr., A. E.*: A general formulation of storage allocation. S. 419–420.

- Maier, R. J.*: Problems of storage allocation in a multiprocessor multiprogrammed system. S. 421–422.
- Holt, Anatol W.*: Program organization and record keeping for dynamic storage allocation. S. 422–431.
- Sams, Burnett H.*: Dynamic storage allocation for an information retrieval system. S. 431–435.
- Fotheringham, John*: Dynamic storage allocation in the atlas computer, including an automatic use of a backing store. S. 435–436.
- Collins, Jr., George O.*: Experience in automatic storage allocation. S. 436–440.
- Jensen, J., Mandrup, P. and Naur, P.*: A storage allocation scheme for ALGOL 60. S. 441–445.
- Heising, William P. and Larner, Ray A.*: A semi-automatic storage allocation system at loading time. S. 446–449.
- Kelley, Jr., J. E.*: Techniques for storage allocation algorithms. S. 449–454.
- Riskin, Bernard N.*: Core allocation based on probability. S. 454–459.
- Cohen, Leo J.*: Stochastic evaluation of a static storage allocation. S. 460–464.
- Strachey, C. and Wilkes, M. V.*: Some proposals for improving the efficiency of ALGOL 60. S. 488–491.
- Robinson, Stephen M.*: Fitting spheres by the method of least squares. S. 491.
- Barnett, M. P.*: Low level language subroutines for use within Fortran. S. 492–495.
- Foata, Dominique C.*: On a program for Ray-Chaudhuri's algorithm for a minimum cover of an abstract complex. S. 504–506.
- Dow, James*: Programming a duplex computer system. S. 507–513.
- Archambault, Mary*: Ballistic cam design. S. 513–515.
- Nickerson, R. C.*: An engineering application of logic-structure tables. S. 516–520.
- Gorn, Saul*: Specification languages for mechanical languages and their processors, a baker's dozen. S. 532–542.
- Smith, L. Wheaton*: What is proprietary in mathematical programming? – Impressions of a panel discussion. S. 542.
- Rubinoff, Morris*: N-dimensional codes for detecting and correcting multiple errors. S. 545–551.
- Wilson, J. G.*: Notes on geometric weighted check digit verification. S. 551–552.
- Lechner, J. A.*: Machine calculation of moments of a probability distribution. S. 553 bis 554.
- Graham, J. W. and Sprott, D. A.*: Processing magnetic tape files with variable blocks. S. 555–557.
- Verhoeff, J., Goffman, W. and Belzer, Jack*: Inefficiency of the use of Boolean functions for information retrieval systems. S. 557–558.
- Garfinkel, David, Rutledge, Joseph D. and Higgins, Joseph J.*: Simulation and analysis of biochemical systems: I. Representation of chemical kinetics. S. 559–562.
- Robbins, Donald*: Computer production of Peck-A-Boo sheets. S. 562–565.
- Feigenbaum, Edward A.*: Soviet cybernetics and computer sciences, 1960. S. 566–579.

IBM Journal of Research and Development

Vol. 5, 1961

- Miranker, W. L.*: Periodic solutions of the wave equation with a nonlinear interface condition. S. 2–24.
- Kennedy, D. P.*: Theoretical current multiplication of a cylindrical hook collector. S. 25–32.

- Hellerman, L.* and *Skiko, E. J.*: Methods of analysis of circuit transient performance. S. 33–43.
- Titcomb, S. C.*: Analysis of a constant-input-flow hydraulic system. S. 44–55.
- Sorokin, P. P.* and *Stevenson, M. J.*: Solid-state optical maser using divalent samarium in calcium fluoride. S. 56–58.
- McDermid, W. L.* and *Petersen, H. E.*: A magnetic associative memory system. S. 59–62.
- Price, P. J.* and *Kao, Yi-Han*: Acoustic-mode mobilities for “split-p-silicon”, S. 63 bis 64.
- Keyes, R. W.*: Hydrogen-like impurity states in axially symmetric crystals. S. 65–66.
- Foglia, H. R.*, *McDermid, W. L.* and *Petersen, H. E.*: Card capacitor – a semipermanent, read only memory. S. 67–68.
- Chambers, F.*, *Okrasinski, M.* and *Cole, H.*: Safe X-ray shutter and filter system. S. 69–70.
- King, G. W.*: Table look-up procedures in language processing. Part 1: The raw text. S. 86–92.
- Hopner, E.*: Phase reversal data transmission system for switched and private telephone line applications. S. 93–105.
- Kiseda, J. R.*, *Petersen, H. E.*, *Seelbach, W. C.* and *Teig, M.*: A magnetic associative memory. S. 106–122.
- Tiersten, M.*: Acoustic-mode scattering of holes. S. 123–131.
- Boudreau, P. E.* and *Kac, M.*: Analysis of a basic queueing problem arising in computer systems. S. 132–140.
- Welch, P. D.*: A direct digital method of power spectrum estimation. S. 141–156.
- Lasher, G. J.*: The dynamics of a subharmonic oscillator with linear dissipation. S. 157–161.
- Rhodes, W. H.*, *Russell L. A.*, *Sakalay, F. E.* and *Whalen, R. M.*: A 0.7-microsecond ferrite core memory. S. 174–182.
- Landauer, R.*: Irreversibility and heat generation in the computing process. S. 183 bis 191.
- Craft, J. L.*, *Goldman, E. H.* and *Strohm, W. B.*: A table look-up machine for processing of natural languages. S. 192–203.
- Leibowitz, M. A.*: An approximate method for treating a class of multiqueue problems. S. 204–209.
- Swanson, John A.*: Notes on cumulative photovoltages. S. 210–217.
- Sprokel, G. J.*: The use of radioisotopes to determine the chemistry of solder flux. S. 218–225.
- Moser, J. K.*: Bistable systems of differential equations with applications to tunnel diode circuits. S. 226–240.
- Marcus, M. P.*: Minimum polarized distance codes. S. 241–248.
- Keyes, R. W.*: The electronic contribution to the elastic properties of germanium. S. 266–278.
- Dew-Hughes, D.*: Dislocations and plastic flow in germanium. S. 279–286.
- Hoagland, A. S.*: A high track-density servo-access system for magnetic recording disk storage. S. 287–296.
- Nowick, A. S.* and *Berry, B. S.*: Lognormal distribution function for describing anelastic and other relaxation processes. I. Theory and numerical computations. S. 297–311.

- Nowick, A. S.* and *Berry, B. S.*: Lognormal distribution function for describing anelastic and other relaxation processes. II. Data analysis and applications. S. 312–320.
- Fan, G. J. Y.*: A study of the playback process of a magnetic ring head. S. 321–325.
- Koehler, H., Kostyshyn, B.* and *Ku, T. C.*: A note on hall probe resolution. S. 326–327.
- Yu, H. N.*: The chargistor, a new class of semiconductor devices. S. 328–330.
- Kennedy, D. P.*: Monte Carlo analysis of transistor diffusion techniques. S. 331–334.
- Palermo, F. P.*: A network minimization problem. S. 335–337.
