Fig. 7.3. Schema delle gerarchie iconografiche della villa di Livia da CANEVA *et al.* 2005, 154: A1 = *Pinus pinea*; A2 = *Quercus robur*; A3 = *Picea excelsa*; B = *Punica granatum* + *Cydonia oblonga*.

Fig. 7.4. Struttura metamorfica degli elementi vegetali nei tralci dell'Ara Pacis, più chiara se si applica il colore, così come era all'origine da CANEVA 2010, 133.

Fig. 7.5. Schema iconografico che mostra le principali simmetrie e le alternanze delle piante legnose nel giardino dipinto dell'ambiente 32 della Casa del Bracciale d'Oro. Si noti che esiste una simmetria bilaterale di base, determinata anche dagli elementi architettonici, ma che le due pareti di destra e sinistra non sono fra di loro speculari e che anche all'interno di esse la sequenza delle piante presenta un gradiente e non una specularità, a differenza della parete di fondo in cui esiste un asse di simmetria centrale. Elaborazione di Giulia Caneva e Angelo Merante.
