In 1990 he entered the Musical Instrument Museum of the Conservatoire National Supérieur de Musique et de Danse de Paris for research into the numerical surveying of musical instruments in three dimensions. At the same time, he has restored many harpsichords of the seventeenth and eighteenth centuries in anticipation of the opening of the Musée de la Musique in 1997. Since then, in the service of the museum, he continues to study and document keyboard instruments in public collections in France.
