† Comtesse Maria von Linden.

Le 26 août succombait à Schaan (Princ. de Liechtenstein) ensuite d'une pneumonie, la comtesse Maria von Linden, ancien professeur de parasitologie à l'Université de Bonn. Son nom restera lié à l'emploi des sels de cuivre dans la prophylaxie et le traitement des strongyliases des animaux domestiques et sauvages. C'est grâce à l'utilisation de ces sels, que j'ai pu sauver les jeunes bouquetins destinés au repeuplement des alpes vaudoises. Les plaques aux sels de cuivre, préparées d'après les indications de la comtesse von Linden, rendent d'excellents services comme plaques de léchage dans les districts francs. Tous ceux qui ont personnellement connu la comtesse von Linden, garderont d'elle le souvenir d'un excellent collègue.

B. Galli-Valerio.
