### Plates 17-20

- 5-shekels (decadrachms)
- Obv. Female head with two corn-ears and leaf in hair, single drop earring, no necklace; truncation where visible seems to merge into dotted border. (O 4-truncation ends in sharply indented concavity outside dotted border.)
- Rev. Pegasus flying right; leading edge of wing has rounded corner overlapping horse's neck with strongly curved indentation below; on lower part of the wing, normally two main rows of short feathers, but on R 11, 12 three rows of feathers.

Below between front and back hooves of pegasos, legend B'RST

B'RST

There is little variation in the letter forms between one version and another; the letter *alef* alone shows slight variants.

*Alef* R 1 R 5 R 11 R 18

*Forgeries – Plates 21–23*

- F 1–4 See part 2.
- F 5 See part 2; London ex Blacas 1867, 17.31.
- F 6 Copy of 49–52; details weak, scrappy fragments of legend incorrect.  
Specimen seen in 1967 (weight?).
- F 7 Copy of the type of 61–67. A strange and disturbing item, not least on account of its provenance, the Megara Hyblaia 1949 hoard (!), in spite of which it seems impossible to regard it as genuine. The harsh forms of the head are quite at variance with O 16–17–18 and the letter *mem* behind the neck is unsatisfactory; likewise the palm-tree, whose branches and bunches are utterly feeble and whose trunk disintegrates into a mass of separate dots in a quite uncharacteristic manner. Conceivably this should be regarded, on account of its provenance, as an ancient forgery rather than a modern one; if so it is the only known example of the kind.  
Syracuse, Megara Hyblaia 1949 hoard (inv. no. 55850), 16.05.
- F 8 A crude copy of the types 88–90 which would deceive nobody.  
Specimen from Malta, cast in London 1931, 15.96; another 1937.
- F 9 A bizarre combination of a reverse copied from series 1 (no. 27) with a head from series 2 b (no. 121); the head is not so bad, but the reverse is weak and the legend peters out lacking the last letter of QRTHDST.  
Specimen seen in 1965, 16.87.
- F 10 Copy of 92: apparently a plated coin, ancient forgery (?).  
Copenhagen SNG 43, 80, 15.53 g.
- F 11–F 12 These two both derive from the same obverse die (O 46) which is the one that joins series 2 d to series 3 a. The reverse of F 11 is close to that of 136 though altered a little in detail; that of F 12 is close to the reverse of 143. In both cases the fine quality of the original work has been lost; a close comparison, especially of the heads, with the originals reveals that the actual dimensions have shrunk by a small but perceptible amount. Thus it is clear that casting was employed at some stage in the production of these forgeries.  
F 11 – specimen seen in 1962, 16.96; another 1965, 16.84.  
F 12 – specimen seen in 1956; another 1965, 17.88 (sic).
- F 13 Copy of 189; small difference and a certain hardening in detail throughout.  
Specimen seen 1971, 17.28.
- F 14 Difficult to find an exact prototype for this; a very problematic item. Though at first sight rather good, doubts supervene; many of the details have a fussy and scrappy look; a dot in front of the front dolphin. The horse's head has a strange expression quite uncharacteristic of this series. What finally settles it is surely the legend, with its scrappy disjointed and inaccurate letters.  
MMAG 43, 26.
- F 15 A peculiar and rather crude copy; since there is an attempted shell below the chin it must be the obverse O 49 which is copied. Very scrappy throughout, legend hopeless.  
London 14.61; another in Prado, Madrid.
- F 15a Types of series 3 a e. g. 148. Becker 131.
- F 16 An inferior copy of 270; loss of quality and detail evident at every point.  
Cast in London, 1962, 16.83.
- F 17 A more serious copy of 270. Obverse: many small discrepancies especially the far-side tiara flap, the locks of hair protruding behind, the exaggerated and hardened outlines of the tiara, the space between truncation and tiara side-flap and the border, which space does not exist in the original. Reverse: Numerous discrepancies especially the trunk

- of the palm-tree disintegrating; legend sketchy. Casts in London, 1939 (16.38) and 1949 (16.80). Cf. Ravel, *Falsifications* pl. IX. 40.
- F 18 Very inferior version, seen 1964.
- F 19 Apparently a mechanical reproduction of 271, somewhat shrunk from the original and weaker in every detail. Palm tree branches narrowed; front paw of lion wrong; *shin* of legend wrong.  
Specimen seen in 1974, 16.85 (bad patina); another 1965, 16.95.
- F 20 Copy of 272. At first sight plausible and close to the original; but the discrepancies are there and soon become apparent with close examination. Obverse: weak points – the ear, earring, edge of tiara behind the ear; bottom edge of back tiara flap «cut off» and wavy strand of hair above it very feeble. Modelling of the tiara itself very weak, the pleats too much separated. The lock of hair and tiara flap in front of the neck wrong. Reverse: the whole body and paws of the lion weak, the bristling mane full of small discrepancies, palm-tree very poor. Legend hardly corresponds on detail to the original (itself marred by numerous die-flaws, see catalogue).  
Naples 4280.
- F 21 A self-evident absurdity, modelled loosely and crudely on 272 but with a Greek legend  $\Lambda$ EONTINON replacing the Punic inscription.  
London.
- F 22 Types of series 5 but rev. horse's head adapted from a reverse of series 3 e.g. 183, 184 with legend 'mmhnt and in front triangle of dots suggested by 277 etc.  
Seen in 1969. 16.39 g.
- F 23 Types of series 5, very broad obv. head, rev. horse's head similar to 294, corneal symbol, legend 'MMHNT, peculiar lettering.  
Becker 130: specimens – including Brussels Hirsch 840; Egger 40.1269; Nobleman 234; MMAG list 351, 7; commerce 1968.  
Same obv. used for Becker's forgery 47 (Alexander) here pl. 22.
- F 24 Types of electrum trisater Jenkins-Lewis group VIII but in silver. 1959; 37.94 g. 1965; 38.00 g.
- F 25 Types of 6-shekels, crude version of 422.  
Seen 1976; 42.24 g.
- F 26 Obv. of 6-shekel type as F 24 combined with rev. 5-shekel type.  
Made at Cefalú 1975.
- F 27 Obv. type of 5-shekels combined with rev. type of 6-shekels. 1969; 39.28.
- F 28 5-shekels type, Becker 134; obv. based on O 2 with wrong truncation, rev. based on R 9 but with too many feathers.  
Cf. Kress Nov. 1953, 126.
- F 29 5-shekels type, based on 442. 1969; 37.84.
- F 30 5-shekel type based on 448; Milan (cast) 29.42 g. – Dr. Arslan confirms that this specimen is now regarded as a forgery.
