Profit ... ..	5,701,247	6,270,301
	379,504,346	396,022,184

The profits for 1920 amount to frs. 6,270,301 as against frs. 5,701,247 in the previous year.

Like nearly all the other leading Swiss banks the Banque Fédérale have maintained their dividend at the 1919 rate and are again paying 8%.

Having thus concluded our survey of the results of the leading Swiss banks, we may add a few remarks of a more general character.

To give our readers an idea of the progress of the banks' working, we cited not only the balance sheets for 1920, but also those for 1919, and to facilitate comparison of share capital, reserves and other items of the various banks, we endeavoured to reduce all the balance sheets into one form.

As a whole the year 1920 was favourable for banking. Almost every one of the nine banks was able to show large profits. This was, as one of the reports points out, especially due to the high rate of interest and the great demand for capital, which slackened only towards the end of the year.

The total profit of the nine banks worked out at about frs. 66,000,000; according to the balance sheets for 1920 they commanded a total share capital of frs. 600,000,000 at the end of the year, whilst the reserves at their disposal amounted to about frs. 170,000,000. The corresponding figures for 1919 are as follows: Share capital frs. 540,000,000, reserves frs. 168,000,000 and profits frs. 62,000,000.

Attention should also be called in conclusion to the advances made during 1920 in the direction of banking concentration in Switzerland.

#### A NEW FEDERAL LOAN.

A new loan of frs. 100,000,000 is proposed on behalf of the electrification of the Federal Railways. The terms agreed upon between the Federal Finance Department and the Banks are the following: The whole amount is to be taken over by the banks; the issue is to be made at par; the bonds are redeemable in ten years and bear interest at 6%. As stated above, the amount is fixed at frs. 100,000,000, subscriptions exceeding this value are also to be taken into account. The commission for the banks is 2% up to frs. 100,000,000 and 1% for subscriptions beyond this figure.

#### TWO MORATORIA.

It is a symptom of the present serious condition of most of our industries that the Federal Council empowered the Cantonal governments of Zurich and Soleure to decree a moratorium for the relief of the automobil (Zurich) and the watch-making industries (Soleure), both of which are hit most severely by the present industrial crisis. As regards the motor car industry, it was very prosperous during the war, but after the armistice all sorts of cars were imported into Switzerland not only from Germany and France, which tried to liquidate their war stocks, but also from America.

Only a few days ago a further step was taken by the Federal Government in order to protect this industry, when it passed a resolution to restrict the imports of motor cars.

#### FURTHER IMPORT RESTRICTIONS.

As from the 8th of April, the import of leather and boots is subject to license. The Federal Council have been obliged to take this step in view of the depression prevailing in the leather and boot trade, owing to which the number of unemployed has risen considerably. The import of foreign cheap boots, particularly from Italy, has risen largely during the last few months. The statistical imports show that these imports total 1,168 metric quintals for the period from January 1 to March 31, whilst during the whole year 1913 only 71 quintals of such goods were received.

#### THE RESULTS OF THE FEDERAL RAILWAYS FOR 1920.

The gross receipts amounted to frs. 394,030,775, which means an increase of frs. 52,284,020 over those of the previous year. The operating expenses increased as well and amounted including the allocation to the special funds to frs. 358,327,883 or frs. 67,435,803 more than for the preceding year. The excess of the receipts over the expenses is therefore frs. 35,702,892—frs. 15,151,783 less than for 1919. The profit and loss account for 1920 shows a debit balance of no less than frs. 92,737,762. We shall have occasion to discuss the causes of the unsatisfactory financial situation in one of our next numbers.

## THE NESTLE ISSUE.

The extraordinary General Meeting of the shareholders of the Nestlé and Anglo-Swiss Condensed Milk Co. referred to in our last number was held at Cham on the 28th April. The meeting, which was presided over by Mr. Gustave Aguet, accepted the proposal of the Board of Directors to issue £2,000,000 (45,000,000 Swiss francs) in the form of 8 per cent. cumulative preference shares.

The prospectus of the issue has just been published. It gives particulars of the company's yearly results since 1913, and indicates a yearly average profit for 1913-1919 of £839,903. The surplus of assets at book values (excluding goodwill and trade marks) over liabilities and depreciation reserve are stated to have been £7,021,250 at the end of December 1919.

Prospectuses and forms of application may be obtained from the Swiss Bank Corporation, the London Joint City and Midland Bank, the London County Westminster and Parr's Bank and their branches.

## AN ISSUE OF THE BRUSIO POWER WORKS CO.

The Brusio Power Works Co., Poschiavo (Grisons), has issued 1,000,000 frs. 7 per cent. Notes (redeemable on August 1, 1926) at par. The company supplies electric power to the Società Lombarda per Distribuzione di Energia Elettrica in Milan and to numerous users in the Canton Grisons. This emission was immediately covered, and the lists were closed on the first day.
