ZENITH

119, HIGH HOLBORN, W.C.1.
Factories: LE LOCLE (Switzerland)

WATCHES were placed top at the last official British Observatory watch tests, being awarded 96.8 points —only one-tenth of one point below the world's record. The series prize for the six best Deck and Pocket Chronometers at the last official test at Neuchatel was also awarded to Zenith watches.

Sold by leading Jewellers everywhere.

(Continued from page 756)

(Continued from page 756)

known firm of Swiss engineers is installing in a Belgian power-house a turbine designed for 50 atmost and 450 deg. C. superheating, the thermo-dynamical enticiency having been raised to 24 per cent. An intermediary turbine of standard design is arranged in series, with the high-pressure turbine running at very high speed, and the exhaust steam, previous to its entering the standard turbine, undergoes a suitable superheating. Other remarkable turbine installations are the 50,000 kw. units which, according to papers by Th. Reuter and Dr. Th. Meyer have been designed by Messrs. A.E.G. for the Goldenberg Electricity Works. A new arrangement has in this case been devised for the steam path, the exhaust steam from the auxiliary turbine fed with live steam being led into the condenser rather than into a low-pressure stage of the main turbine.

Interesting results obtained with steam boilers having convex heads, which are now being tested at the Stuttgart Engineering College, were made known by Dr. von Bach. Elliptical boiler heads were found to admit of much higher liquid pressure than the strongly curved heads so far used. Tests of the Wadurf boiler were discussed by Dr. Zwiauer, of Stuttgart. The coal in this type of boiler is burnt on the grate from the top downwards, so that the gases of incomplete combustion, being carried to the hottest layer, are burnt without any separation of soot. The grate comprises water-cooled tubes, the heated water serving to transmit the heat of the fuel to the water to be evaporated.

The cycle thus performed is similar to that obtaining In a hot-water or low-pressure steam boiler, the boiler proper being left out of contact with the fire gases. In the tests referred to, as much as 128 kgs. of steam per square meter heat-absorbing heating surface was raised, no, evidence of imperfect combustion being noted.

Revival of Basle's Industries.

The Times (11th August):—

Revival of Basle's Industries

Revival of Basle's Industries.

The Times (11th August):—

The industrial situation in Basle has improved Production is fairly normal again, although below the unusually high level of 1920.

Sales of ribbons amounted in value to 70,000,000 francs in 1922, against 60,000,000 francs in 1921 and 42,000,000 francs in 1913. This result has been attained in spite of many adverse factors. There has been a slackening of demand from the United States, due to increased home production, and from France because the mills of St. Etienne and Alsace can meet all French requirements. At the same time Swiss makers have had to face strong competition in their own market from German and Italian goods.

Great Britain has saved the situation for Basle, and in conjunction with the Dominions has absorbed three-quarters of its output of ribbon. Prices have been greatly reduced, wages slightly lowered, but quality has been, maintained and contracts have been carried out promptly.

The chemical industry of Basle specializes in dyes and drugs. Whilst the former branch has been working only five days a week, exports of coal-tar, dyes, indigo and other colours amounted in value to 68,000,000 frs. in 1921, against 67,000,000 frs. last year. The lack of orders from Germany and Russia has been balanced by larger purchases by Great Britain and China, each three millions more than last year. In the pharmaceutical branches ordinary lines are lower in price, but branded specialities keep steady. It is noteworthy that some of the leading firms have been able to declare higher dividends in spite of uncertain markets and unstable exchanges. The Société pour l'Industrie chimique is paying 12 per cent., sandoz, 20 per cent., against 10 per cent.; Schappe. 15 per cent., against 10 per cent.; Schappe. 15 per cent., against 10 per cent., sandoz, 20 per cent., against 10 per cent.; Schappe. 15 per cent., against 10 per cent.; Schappe. 15 per cent., against 10 per cent., sandoz, vari Schappe. 15 per cent., against 10 per cent.; Schappe. 15 per cent., again

Elms, in the Canton of Glaris, has been discovered at last by some English trippers, who report in the British Weekly (Aug. 9th) that, as the Ostend Express passes Ziegelbrück, only two hours' rail journey distant from Elms, the London Times can be got at Elms at 1 p.m. on the day following publication here. Some attraction, to be sure! I wonder whether the Rothermere Press have read this, and if so, what are they going to do about

Well, although most of my compatriots in London are coming back from their holidays and turn their mind, nolens volens, to work again, and although they state with some satisfaction that the real summer weather seems at last to have broken for good, "Kyburg" is thinking of going to have a good look at the old homeland, and my readers will be spared my vapourings for some weeks to come, unless I find something really worth writing about from the other side, in which case the Editor will perhaps give me leave to have my words set to print. You, dear reader, must surely have noticed lately that writing this column was beginning to be real work. How could it be otherwise, with all one's friends on holiday, with picture post-cards streaming in from all sorts of wonderful spots somewhere some hundreds of miles away from Town? Just try it yourself once to sit down and write something interesting, when you feel as if you would be much better off somewhere else! Therefore, I, too, am off! Off for the mountains, the lakes, the valleys and hills of our beloved country, and, in a few weeks' time, I know from experience, I shall have no rest until I am back in dear old London Town! Well, although most of my compatriots in Lon-

THE HOMELAND RE-VISITED.

"Wenn ich Königsglanz mit deinen Bergen mass, Wie war da der Bettler stolz auf dich.

"The Swiss Observer" of July 21st mentioned my holiday in Switzerland, and my desire has been fulfilled by a glorious Swiss tour.

From Basle to Winterthur I chose the very charming and interesting Rhine route, which was new to me passing the Waterworks of Rheinfelden and Lau-

holiday in Switzerland, and my desire has been fulfilled by a glorious Swiss tour.

From Basle to Winterthur I chose the very charming and interesting Rhine route, which was new to
me, passing the Waterworks of Rheinfelden and Laufenburg.

Winterthur is now greatly enlarged by Toess,
Wülflingen. Veltheim, Oberwinterthur, Seen, Wiesendangen and the surrounding charming villas; the old
town remains much the same. The Town Hall, in
best classic style, the new Art and Science Museum,
the Girls School on Heiligberg, the Post Office and
Railway Station are outstanding buildings.

Then comes the very picturesque old town of
Stein a.Rh. The Rathaus and some other buildings
are decorated with pictures and legends of their history
(1300—1610 A.D.).

I visited Professor Ferdinand Vetter (Berne) in his
retreat Klosters St. Georgen, and was conducted
through 20 rooms, filled with art collections from
monastic times, and his large library. I had a charming reception and two hours' conversation with him.
After this to Castle Hohenklingen and the Rhine Falls,
now in massive flow.

In Zürich my friend, A. Huber, president C.S.C.
1875 and hon, member, was my guide. The Landesmuseum, the Art Museum. Polytechnic, University,
Gottfried Keller's birthplace, his favourite Oepfelkammer, Zürichhorn Park, with monument to the writer and
composer of "Tritts im Morgenrot daher," a round
on the beautiful lake will be abiding recollections.

Lucerne, Pension Hermitage, opposite the Pilatus
came next. 1 had a glorious view of the lake and
valley behind from the top of the Bürgenstock.

Then, à tour Lucerne, Altorf, passing Brunnen,
Treib. Seelisberg, Rütil, Schillerstein, Tell's Chapel,
all gloriously historic. The Mayor of Altorf conducted
me through the Courts of Justice and the Chamber of
Deputies, containing the old banners of Sempach, Morgarten, Marignano and various trophies. I greatly
cherish that day.

In Lucerne itself the Lion Monument, the Glacier
Garden Alpina, Bourbaki Panorama are of absorbing
interest.

Berne f

There is a scene of Nicolas von der Flüh, Stans peace parley.

My last Swiss town was Basle. I visited the History and Art Museums, collections of Holbein. Boecklin, Stückelberg, the Zoological Garden in a beautiful park, the only one in Switzerland; also the Rathhaus, with best old-style council rooms, finely carved ceilings and celebrated pictures, which no visitor should omit.

I also visited an old friend, Adolf Linder (82), who was one of the 14 new members in 1866 to rejuvenate the dead and alive club of 1856. A former member here, Mr. Ernst Walter, is now active in the "Volksrecht," Zürich.

Briefly put, the great educational institutions, the care for old and young, the evident general order and comfort, the cleanliness, the up-to-date traffic and home arrangements, combined with the forests, lakes, rivers, pure air, plentiful trees and flowers, white houses and villas, make Switzerland, even apart from the everglorious mountains, an earthly Paradise, and one can only repeat with Gottfried Keller: "O mein Heimatland!"

My tour is the event of my life. The small collec-

only repeat with Gottiffied Rehief: O high Transacland!"

My tour is the event of my life. The small collection of the history, plans and views of the places visited will be a constant reminder of the same. Relations and friends outbid each other to treat me better than the Prince of Wales could have been. Aber "Die schönen Tage von Aranjuez sind nun vorüber." Now to work, rejuvenated!

I. GEILINGER.
