ETH-Bibliothek Zürich, E-Periodica, https://www.e-periodica.ch

We have witnessed a wild orgy of narrow Nationalism taking hold of many countries. We have seen international trade almost strangled by tariffs, quotas and other barriers. We have the pre-war standards of National Honesty commercial integrity thrown over-board in many lands. We have seen the currency manipulations adopted by most countries "in selflations adopted by most countries defence " in every case!

And, hand in hand with the above retrograde steps we have witnessed a gradual, if slow, conviction growing in leading circles and slowly being allowed to reach the public via the Press, that the day must come when all these barriers, etc., must be reduced, when currencies must be stabilised, when integrity individual and national

stabilised, when integrity individual and national must be the rule again as a sine qua non to the building up of confidence without which the World will gradually perish.

God's Mills mill slowly, but surely. Is it not possible to believe that Europe and the whole World have had to go through the misery of these past years in order to learn to realise some great Truth? And, as is so often the case, a Truth which is recognised as such when it applies to individuals, is learnt by terrible suffering only by multitudes, or Nations. multitudes, or Nations.

The great Truth which, to my mind, the World has been set to learn is the moral which is happily expressed by our Swiss Motto: "ONE FOR ALL AND ALL FOR ONE."

When the World has learnt that Truth and is ready to live up to it, EASTER TIDE will dawn for the World and my hope is that the leaders of all countries may soon find the necessary "formula" to make it possible for their peoples to take the road that will lead to that EASTER.

A word about our own country. On June 2nd A word about our own country. On June 2nd our people will vote on whether they will follow the lead given them by the Federal Authorities, or whether they will instruct the Federal Authorities to adopt measures in conformity with the wishes of these who have signed the Initiative.

Shorn of all trappings, the decision which will be made by our people on June 2nd, 1935, will either keep our currency on the Gold Standard, the Standard to which ALL currencies will have to return sooner or later, or make us join the Nations which have devalued their currencies.

Yow, Switzenland, how no foreign debts, and

the Nations which have devalued their currencies.

Now, Switzerland has no foreign debts and can, if the people will it, remain on the Gold Standard. It will mean that our people is strong enough to renounce the dream of temporary, but immediate, advantages, that it looks with clear eyes into the future, realises that, although temporarily it may mean a tightening of the belt and the bearing of hardships, staunch support of its 100% currency will finally mean a tremendous asset to our little country.

I believe that the act of releating the "Crisis."

I believe that the act of rejecting the "Crisis Initiative" as it is called, will in itself be a tremendous advantage and reflect not only glory on our people, but result in economic advantages.

our people, but result in common.

We live in difficult times. We are sorely tempted, individuals and Nations alike, to grasp thing which promises relief from our live to the tempted. at anything which promises relief from our troubles, even if we know that it can only be tem-porary relief.

I think Switzerland alone of all the Continental Nations is capable of rejecting dubious means of temporary help, such as would result, perhaps (?) from the acceptance of the Crisis-Initiative, and I have faith in a crisis our people at home will remember that prosperity and happiness cannot be produced except by honest means and hard

The ever new wonder of Nature's awakening from its winter-sleep, also renews our faith in the ultimate arrival of Easter and so, dear Readers, Kyburg wishes you all

A VERY HAPPY EASTER.

ENGLAND - A MODEL?

By Dr. D. Schindler.
(Continued)

3. Internal boom as a result of the depreciation of the pound.

Contrary to general expectations the depre-Contrary to general expectations the depreciation of the pound proved ineffective insofar as English exports, were concerned, but gave rise, instead, to,an,internal boom. This boom was at the same time accentuated through Englandigoing; over to,a, policy of, high tariffs. While formerly there had been very considerable imports of various classes, of, iron and steel tails goods, motor was the English market market means. cars, etc., the English market was now very nearly closed by the new tariffs in respect of these goods; closed, by the new, tariffs in respect of these goods; this naturally led, at first, to a boom in the protected, industries, by, reason of the monopoly secured in the home market. The new tariffs do not, however, seem, to have been the main cause of the economic revival in England. It is more especially, in the building industry that the boom developed, and, the "Economist." has recently asserted that the latter was undoubtedly the main-stay of the English economic variety. assay of, the English economic revival. According to the statistics of the "Economist," the industrial activity in England has, as a whole, risen by 16 points, while in the building industry there

has been a rise of 116 points. In this connection it must be pointed out that the improvement in the building industry is due exclusively to the increase in building for dwelling purposes, while the building activity for industrial purposes, in spite of certain effects of the tariff policy, has been lagging as before. It is difficult to understand why in this time of crisis there is suddenly such a large demand for new houses and the succession cannot mand for new houses and the suggestion cannot be dismissed that many people seek in the building of houses a capital investment not liable to change in value, in order to protect their savings from the depreciation of the pound. (True, the revenue from investments in Building Societies and still more direct from the cheaper class dwelling houses is, of course, more attractive than the interest from gitt-edged securities.) The same building fever as in England has set in, in other countries of the sterling Bloc, such as Denmark and South

The English motor car industry has done very well in this time of crisis, as the increase of motor ears in relation to the population is twice or three times greater than in Switzerland, so that it may be assumed that many people in England have bougth motor cars out of fear of a further currency depreciation, (or is it the search for pleasure, or the American invented insidious "payment by instalments system," that is more responsible for the desire to own a car, even by those who can ill afford one. It is admitted that commerce can also claim a substantial increase in rehieles.) Such developments are inevitable with the continued depreciation of the English currency. A boom of this description, based on a feeling of disquiet, is however only an apparent gain for the economic life of the nation. Nearly all capital investments made in order to escape well in this time of crisis, as the increase of motor gain for the economic life of the nation. Nearly all capital investments made in order to escape arr captar investments made in order to escape currency depreciation or to utilise it prove in the long run, to be bad investments, which lead to losses. Such investments are not made for reasons of suitability alone, but on the grounds of feelings, for which there is no place in economic matters. The inflation demand created artificially cannot last permanently. The industries that have been established under its influence will be backing work and will have to change over to other branches of business, with great losses, or en-tirely close down. The loss' of the many millions that were invested in Germany during the period of inflation in large manufacturing works and numberless other concerns has been keenly felt later on by the German national industries and the injurious effects arising from these bad investments have not been got over even at the present day. In other countries too, there have been a whole series of sensational collapses, after the years of inflation, which have shown what an enormous amount of capital is misdirected and destroyed under the influence of the currency de preciation state of mind.

Every depreciation of currency tends reduce, throughout the masses of the people, the reduce, throughout the masses of the people, the saving habit and we also hear from England that the amusement and luxury trades are among the trades that have profited by the crisis. The tobacco consumption, in spite of the rise in price of tobacco has increased appreciably as a result of the depreciation of the pound, while the import of necessaries have in part greatly declined. On the other hand, the present surplus of money in England is certainly no sign of greater savings, but an indication of the lesser demand for new capital by trade and industry. In spite of this surplus of money, a number of loans have recently failed to be subscribed; it may be because the people with savings to invest considered the rate of interest too low or it may also be because they have begun to doubt of the future of the English

For the thrifty middle class, which is the section of the population that is liable to suffer most injury from a depreciation of the currency, the best solution seems to be to invest savings in liouses, which can always be used by those investing the money. ing the money. If, however, this expedient is resorted to in England on too large a scale, there will finally be such an enormous surplus of houses will finally be such an enormous surplus of houses in the country, that the capital invested in houses will in great part cease to be remunerative, that is to say, it will be practically lost. This will again result in the building industry having all the less to do afterwards. Such must most certainly be the consequence all the more so as a depreciation of currency reduces in the long run the capital available for building. In all countries where inflation has taken place, the building industry as well as its subsidiary industries has been subjected somer or later to this fatal set. been subjected sooner or later to this fatal set This matter should also be pondered upon back: This matter should also be pendered upon by our Swiss house owners some of whom are viewing with favour currency depreciation. A currency depreciation would have for them the same effect as in England. All those in a position to do so would build in order to render, as he thought; their money unchangeable in value. The house owners would then lose the best tenants and, at the same time as money depreciation and viscair cost of living, they would see their rents rise in cost of living, they would see their rents drop and their houses become vacant.

4. The effect of currency depreciation on unemployment and external trade.

At the end of the Supplement referred to be At the end of the Supplement referred to before, Sir Henry Straßosch lets the cat out of the
bag, as he urges the gold countries to depreciate
their currencies, which are in his opinion too high
in value. It is strange that the value of a currency is always too high and that on the other
hand there is no currency that has been fixed too
low. Now, we should be told, in very first
place, to what extent our entrency is too high in
value; any advisor does not however, evices the value; our adviser does not, however, give us the slightest information on the matter. Those who propose depreciation for Switzerland seem to think that with a depreciation of 10 to 20 per cent, all our economic troubles would be removed. cent. all our economic troubles would be removed. This is, however, an entire delusion. A depreciation of 25 per cent, which was the amount by which the English entrency was depreciated in 1932, did not prevent the English exports from dropping further and the number of unemployed, from increasing. It is only since England has depreciated its currency by 40 per cent. that memployment has been somewhat reduced. Yet, even to-day unemployment is, on the average, much greater than in former years when the pound had its full gold value. Things have been no better in the British Dominions and in the Scandinsvian countries. Sweden had a mach vanuable boom which was alleged to be due to the depreciation of its currency; in spite of this, the number of unemployed has risen from 32,046 in September, 1931, to 54,423 in September 1934. Things have been far worse in Denmark. In September, 1931, the September, 1931, the spite of unemployed recorded was 35,798; in September, 1934, in spite of a depreciation of the Krone to lose then buff its former real to the first. September, 1934, in spite of a depreciation of the Krone to less than half its former value, the figure was 79,071, while in December, 1934, it even rose to 133,631. In the British Dominions, there has been in certain cases a drop and in certain cases an increase in unemployment. As generally known the United States, with a depreciation of the Dollar by 41 per cent. have only succeeded in the Dolar by 1 per cent. have only succeeded in reducing unemployment to a limited degree, and it is probable that this reduction is not so much due to the depreciation of the Dolkrr but rather to the artificial creation of work. At the present time, the unemployed in the United States still number more than 10 million. Strange to say, even in the case of Japan where the Yen has been depreciated by 65 per cent, there has been no considerable drop in unemployment, for the statistics of the League of Nations give, as unemployment of the League of Nations give, as intemployment figures for Japan, 422,000 at the end of 1921, and 368,000 in July, 1934. If we leave out of account Japan, in view of its special Asiatic conditions, we find that the countries of the Sterling Bloc and of the depreciated dollar, taken together have, about 65 unemployed per thousand inhabitants. On the other hand, the countries of the Gold Bloc, which are singled by Sir Henry Strakosch to abandon the gold standards in coultry to may these from don the gold standard, in order to save them from their desperate economic condition, have, taken together, only 22 memployed per thousand inhabitants.

Statistics can often be set out in this way or the other; these figures cannot, however, b turned about or tampered with. Currency de preciation has failed as a remedy for the economi pretartion has failed as a remedy for the economic-crists and meniployment. This is, in fact, easy to understand. The simple process of dropping the gold standard brings about practically no change in the economic situation. Most of the consumers have then the same income in paper money as before in gold money; they can, there-fore, spend no more and can, therefore, cause no increase in sales. The small circle of speculations in stack and asymptotic pass from the form in stocks and commodities, who benefit by any depreciation of currency do not bring grist to the mill. If the economic system is to be set in momidt. If the economic system is to be set in mo-tion, the printing press must then be brought into operation, as was done by the inflation countries during the war. The printing press mist continually turif out many hundreds of millions and flually milliards of notes for futting into circula-tion; new purchasing power must thereby be cont-stantly introduced into the economic system in order to be able to absorb over production and order to be able to absorb over production and unemployment. This is surely to cast out devil-by Beelzebub, the prince of the devils:

It cannot yet be said whether England or the other countries of the Sterling-Bloe will be able, as time goes by, to avoid this danger. It would be easy to do so, if the danger zone could be clearly seen, but this is not the case. No man can say at what points energy depreciation becomes can say at what points currency depreciation becomes inflation, as every depreciation of currency is in itself the beginning of inflation. The danger of actual inflation is all the greater, as the value of the pound drops. That'is to say, as long as England'does not stabilise the poind, there is the danger' of the losting control over the pound! They events of the last weeks have proved that they danger is not the result of imagination.

These facts contain a valuable lesson for the rnese facts contain a valuable lesson for the gold countries; this lesson is that depression and unemployment cannot be eliminated by the mere abandonment of the gold standard but that proper inflation would have to be resorted to for the purpose. In no other European country is

the note circulation so high in relation to the population as in Switzerland, except in France, and it is possible that this in itself would have an inflatory effect in the event of the abandonment of the gold standard. We must anyhow be prepared for a still greater and more rapid depreciation of our money than the English after the abandonment of the gold standard, and France, Belgium and Holland where the note circulation is also very large in relation to the population are faced with the same fate. In these countries, too, there would be, in all probability, a very great depreciation of the national paper are also so well as a summary of the gold standard. This would result in a great decrease of the purchasing power of these countries on the world market. The world depression would be accentuated. There would be fresh unrest. Prices would be forced down again on the commodity tharket, while there would be inter uncertainty on the money and credit market. The uncertainty in the money and credit market. The uncertainty is to the fate of the enrencies and of the prices of goods weighs of the world trade like a mill stone. What is to happen when in the last countries where money could take refuge, monetary safety disappears.

The gold countries can only derive apparent safety disappears.

safety disappears.

The gold countries can only derive apparent advantage from the abandonment of the gold standard, in view of the fact that they can take part better than before in dumping on the world market. Even now this exchange dumping has become nearly unbearable on the world market and no one who knows the conditions can have any doubt as to the fact that things would be much worse if the gold standard was universally abandoned. Then, all countries can start a fight in the export trade to the last extremity. They can sell lower and lower below their actual costs and saddle the unsuspecting masses of the people can sell lower and lower below their actual costs and saddle the unsuspecting masses of the people at home with the losses of this cut-throat competition. Whether the economic system of the world can recover under such impossible principles, is a matter that can be doubted, in spite of the advice given by the "Economist."

Translation of an article in the "Neue Zürcher Zeitung" of the 20th and 21st March, 1935. No's 481, 485 and 488.

NEWS FROM THE COLONY.

J. BILLETER President City Swiss Club

We have great pleasure in publishing herewith the portrait for Mr. J. Billeter, the newly elected President of the City Swiss Club.

Mr. Billeter was born in Mannedorf (Zurich) and left home at an early age.

After having spent 3 years in Geneva, and two years in Florence he came over to this country in 1900, where he has remained ever since, with the exception of two years which he spent in Germany after the war. M. Billeter has travelled quite extensively on business, he has been several times to Canada, U.S.A., also to Australia, and thrice to the Argentine, Brazil, Chili, Peru and Equador.

We are wishing him a very pleasant and suc cessful year of office.

CITY SWISS CLUB. Annual General Meeting.

The Annual General Meeting took place on Theseley: April 9th, at Pagant's Restaurant, the President, Mt. Henry Senn, being in the Chair.

Over fifty members and guests were present

After the usual toasts had been drunk, the President welcomed Mr. de Bourg, Conseiller de Legation, who, in a short speech, said that the Minister deeply regretted being unable to be present. Mr. de Bourg also referred to Colone! Obrecht, who has recently been elected Conseiller Fédéral.

Mr. Suter proposed that a telegram congratu-lating Colonel Obrecht should be sent to him, on behalf of the Members of the City Swiss Club.

The President also welcomed Pastor Hoffmann-de Visme, who is an Honorary Member of the Clifth, and congratulated Mr Pfaendler who that evening had reached the 25th anniversary of his election as an Active Member of the Club, The President then declared the Meeting formally

After the minutes of the last meeting had been read and approved; three new members were elec

ted. There were no resignations.

Donations were voted to the Fonds de Secours, and to the French and German Hospitals.

The Auditors then presented their report which was accepted unanimously.

The President read his Report which was received with acclamations.

The election of the Committee for 1935-1936 then took place and in the absence of Mr. Boeh-ringer, on account of illness, Mr. Pfaendler took the Chair during the election.

After the votes had been counted Mr. Pfaendler announced that the following members had been unanimously elected.

n mammous elected.

President: J. Billeter.

Vice-President: G. Marchand.

Tréasurér: R. de Cintra.

Vice-Tréasurer: W. Deutsch.

Secretáry: R. Ryf.

Vice-Secretáry: R. Kaiser.

Librarian: A. Stauffer.

Auditors: G. Jenne and H. Pfirter.

The Trustees and the Press Reporter were re-elected as before. -

Mr. J. Billeter was then installed as President for the coming Session amid great applause.

The arrangements for the Summer Meetings were left to the discretion of the Committee.

The meeting was closed at 10.45 p.m. ck.

SWISS GYMNASTIC SOCIETY LONDON.

The Annual General Meeting of the society took place on Wednesday, April 10th, 1935, at 74, Charlotte Street, W.I. after the usual gymnastic practice. As customary a satisfactory state of affairs and the sound position of the Society were revealed both by the Chairman's Report on the year's activities as well as by the Hon. Treasurer's balance sheet, the latter showing that the society, the same as in former years, has paid its way with a small balance on the right side, to be carried forward to new account.

The Officials and Continuities for 1935 are as

has paid its way with a small balance on the right side, to be carried forward to new account.

The Officials and Committee for 1935 are as follows:— President, J. Christen; Leader, H. Knoll; Vice-Presidents, G. Kummer and A. Isenschmidt; Vice-Leader, C. L. Schlaeppi; Hon. Secretary, C. Ferrari, 57, Whittield Street, W.1; Hon. Treasurer, C. L. Schlaeppi, 64, Thurlow Park Road, Dulwich, S.E.21; Guards of Implements, A. Deubelbeiss and W. Sterki. The Swiss Minister, Mr. C. R. Paravicini and Mr. W. De Bourg, Conseiller de Legation, were with acclamation re-elected Président d'Honneur and Vice-Président d'Honneur and Vice-Président d'Honneur respectively. After 19 years continued service as active member of the Society, Mr. C. L. Schlaeppi has been elected an Honorary Member of the Society in succession to the late Mr. C. H. Senn, and well deserves the honour for his unobtrusive and efficient work during many years, as Hon. Secretary, Hon. Treasurer, Vice-Leader, Vorturner, etc.

It was decided after some discussion to com-

It was decided after some discussion to commence training forthwith for the next Swiss Gymnastic Festival in Winterthur, July 1936, but to leave a decision as to whether participation is possible and advisable to the next Annual General Meeting at the beginning of next year. — It was further decided to give the Ladies Section — in response to numerous applications from Ladies—
a further trial and to revive it forthwith. Training evening-Friday, 7:30 p.m. at 74; Charlotte
Street, W.1. Will applicants kindly send their
names and addresses to Miss H. Deloff, 74, Charlotte Street, W.1.

The Veterans Section will also be revived and persevered with. Gentlemen wishing to join are invited to please send their applications to Mr. A. Isenschmidt, 74, Charlotte Street, W.1.

SWISS SALVATION ARMY BAND'S VISIT TO LONDON.

We are pleased to inform our readers, that the Salvation Army Zurich-Band is coming on a visit to this country.

The Zurich Band of thirty-eight members, together with a female sextet in national costume, will be at Clapton Congress Hall, on Saturday and Sunday, April 27th and 28th; Chalk Farm, on Monday, 29th; Norland Castle, on Tuesday, 30th; Salisbury, on Wednesday, May 1st; Southampton, on Thursday, 2nd; Portsmouth, on Eriday, 3rd; and Brighton I, Saturday and Sunday, 4th and 5th.

uay, 4th and oth.

The Festival at the Citadel, Chalk Farm
Road! will be under the Chairmanship of Mr. A.
Brauen, he will be supported by Monsieur de
Bourg, Counsellor of Legation and other members
of the Swiss Colony. We hope that a good many
of our readers will attend the concert of our compatriots from Zurich.

There will be yodelling too, as well as "Alphornblasem" the band is conducted by band master Ha-Hollenweger! (Price of Tickets 1/- and

SKATING.

At the World pair-skating championships for At the World pair skating championships for professionals, which were competed for at the beginning of this week in Manchester, the Swiss skater Miss Frieda Meerkämper of Davos with her partner Mr. Mikeler of Vienna, both attached to the skating rink Streatham, were placed second in competition with the elite of professional skaters. Miss Meerkämper, who is well-known to many of her compartiots in London through the exhibitions which she gave during the recent icehockey matches, is one of the leading pair-skaters in Europe, and with Mr. Mikeler was placed in the same position at last year's championships. We extend our heartiest congratulations, coupled with our best wishes for the future, to both.

MITTELHOLZER LECTURE.

A full report of the very successful lecture of Mr. Mittelholzer on the 15th inst. will appear in our next issue.

NEW HONOURS FOR SWISS.

Sir Arnold Theiler, our famous countryman, Sir Arnold Theiter, our ramous countryman, who has collected most of the academic and scientific honours which could be bestowed upon him, by America, France, Great Britain, Belgium, Switzerland and various other countries, has received the Honorary Degree of Doctor of Science, by the University of the Witwatersrand. (S. Africa).

DIE AUSLANDSCHWEIZER IN GEFAHR. Jhre Probleme — unsere Aufgaben.

Von Gerhart Schürch. ("Bund" 3. Febr. 1935).

Dreihundertdreissigtausend Schweizer leben Dreihundertdreissigtausend Schweizer leben heute im Ausland. Dreihundertdreissigtausend Inhaber des Schweizerbirgerrechts und eines Schweizerpasses. Manch ein anderer Schweizernasses. Manch ein anderer Schweizer mag ausserdem noch in diesem und jenem Erdenwinkel sich der konsularischer Immatrikulation, der Militärsteuer und der statistischen Erfassungabsichtlich oder aus Nachlässigkeit entzielten. Und viele Frauen, die durch Heirat mit einem Ausländer ihr altes Bürgerrecht verloren haben, sind ihrer Heimat im Herzen so treit geblieben wie irgend einer. — Heute lebt der zehnte Teil aller Schweizer im Auslande!

aller Schweizer im Auslande!

Es gibt wenige Völker der Erde, die zu einem so hohen Prozentsalz wie das Schweizervolk auf fremdem Staatsgebiet wohnen. Mehr als die Bevölkerung des ganzen Kantons Waadt! Die Hälfte aller Einwohner des Kantons Bern! Und doch steht das Interesse des Inlandschweizer an seinen Mitbürgern in der Fremde in keinem Verhältnis zur Bedeutung des Auslandschweizertums. Da haben schon die Italiener kommen müssen mit ihrer intensiven Fürsorge für die Angehörigen in andern Ländern und die Deutschen mit ihrer politischen, volks: und rassenkundlichen Propagierung des "Deutschtums jenseits der Reichsgrenzen," bis auch bei uns sich weitere Kreise darür erinnerten, dass für das Schweizertum im Auslande mehr getan werden sollte. werden sollte.

werden sollte.

Die hohe Zahl macht die Auslandschweizerfräge heute nicht dringender als bisher; denn diese Zahl war in trüheren Jahren noch höher. Es ist die besonders schwierige Lage, materielf und geistig; in der sich die Auslandschweizerheute befinden, was aufhörchen macht. Schweizer; passt auf: das Auslandschweizertum ist in Gefähr!

Es ist in Gefahr, im Drange

Es ist in Gefahr, im Drange
Nationalistischer Ströme
des Wohnsitzvolkes zu vergessen dass das Schweizertum nicht auf Rasse, Blut und Boden beruht, sondern auf der politischen Idee unserer Eidgenossenschaft, und dass es nur mit den Waffen des Gestes verteidigt werden kann. Es ist in Gefahr, die Grundgedanken unserer eidgenössischen Existenz aus den Augen zu verlieren. Und es ist deswegen in Gefahr, sich selbst zu verlieren in der völkischen Aufwallung eines kulturell und sprächlich verwandten Auslandes. Wir im Lande wohnenden Schweizer haben gegen alle Anmassungen von draussen den Schutz unserer politischen Grenze; der Auslandschweizer aber, der im-nationalistisch erregten Ausland selber lebt, hat ihn nicht; seine tägliche Sorge ist das Standhalten unter den Hammerschlägen einer auftidemokratischen und rassenbedingten staatlichen Propaganda Propaganda:

Der heimattreue Auslandschweizer ist aber in Der heimattreue Auslandschweizer ist aber im Gefahr, auch seine wirtschäftliche Existenz zur verlieren. Viele Auslandschweizer wollen heute zurückwandern. Viele fordern Unterstützung-Viele erliegen einer Uchermacht und verzichten auf ihr Schweizertum. Man merkt davon etwas im Schweizertum. Man merkt davon etwas im Schweizervolk. Man muss noch nicht nie kenie Gelegenheit verpassen, jeden der uns zuhören oder lesen will, darauf aufmerksam zur machen, dass die Abslandschweizerfrage als Pröblem von höchster stäatspolitischer Bedeutung des gemeineidgenössischen Interesses
