FEDERAL.

SWISS BAN ON NAZI ORGANIZATIONS.

A Note from the Swiss Government explaining the decision to prohibit Nazi organizations in Switzerland was handed to Baron von Weiszaecker, the German Minister in Berne.

The Note, it is understood, begins by recognizing that colonies of foreigners in a country have the right to meet in a friendly way to cultivate national sentiment and to safeguard the interests of the Mother Country, but it declares that it is the province of the country of residence to determine in full sovereignty the conditions and the manner in which the right shall be exercised. The Note adds:—

"The National-Socialist Party possesses the qualities and character of a corporation according to public law. The heads of the party abroad, even if regarded by the country of residence as private persons, are in the eyes of Germany persons possessing official attributes and having official duties to perform. Even without the assassination of Gustloff the Federal Council would have been obliged sooner or later to consider whether the central leadership and the branch leadership of the German National-Socialist Party in Switzerland could any longer be tolerated. The Davos tragedy caused the Federal Council to examine the question somewhat earlier, otherwise it might have been faced with a *fait accompli* by the nomination of a new central leader which would have made Switzerland's task all the more difficult."

SPORTS GROUPS FORBIDDEN.

The Swiss Federal Council have followed up their ban on organised sections of the German Nazi party in Switzerland by forbidding the activities of all organised German sporting groups in the country.

SWISS CONSULATE IN BAGDAD.

The Federal Council has decided to open a consulate in Bagdad with jurisdiction for the whole Kingdom of Iraq. M. P. Rychner, a merchant in Bagdad has been appointed Honorary Consul.

THE STOCK EXCHANGE OF ZURICH.

(By Leu & Co's Bank Limited, Zurich).

Zurich, 2nd March, 1936.

The general firmness that was the characteristic feature of our last report, continued also in February. Particularly the first half of the period was well disposed and followed its own trend. Later on, however, the market became more irregular, first because the economic situation did not justify any further rise and secondly because the influence of Wall Street made itself known again and transplanted some of its uncertainty. Nevertheless the improvement in American railway stocks is noteworthy and amounted to about 15 Fr. for Baltimore and approximately 10 Fr. for Pennsylvania. The victorious news from the Italian battle-field in Ethiopia exerted a stimulating effect for a while and 7% Soc. Meridionale as well as 6½% Soc. Idro-elettrica Piemonte advanced from 5 to 7%. With regard to stocks with interests in Italy: Motor-Columbus gained from 154 to over 170 and gave way a few points only last week. Elektrobank and Indelec showed advances from 30 to 50 Fr. Quite an outstanding development was noticed for Transportwerte that increased from 135 to 185, while Elektroanlagen and Elektrowerte improved to 10 to 15 Fr. up to 170 resp. 159. Almost as an exception some South-American electric companies were unable to maintain their new heights and dropped slightly below beginning prices, such were Hispano 960-1000-952-960, Italo-Argentia 127-133½-124-126½. Overproduction in oil and fears of new price-cutting in the U.S.A. caused Royal Dutch to be more widely offered (527-494). For the Swiss industrials this past month was extraordinary favourable and practically all shares registered further substantial gains. The reason may be looked for in the belief that same had been undervalued for a long time and that a readjustment was justified. Also the business outlook seemed to take a slightly brighter aspect as some factories have been able to secure greater foreign orders. Parallel with the improvement of the stocks, the respective bonds stiffened in price according to the following table.

Brown Boverie.

3rd Feb.	highest	29th Feb.
5% bonds	76%	83.75%
stock	92	131

Sulzer.

3rd Feb.	highest	29th Feb.
5% bonds	85½%	92%
stock	370	398

Fischerstahl.

3rd Feb.	highest	29th Feb.
5% bonds	91½%	95%
stock	288	325

Similarly well disposed markets were noticed for Aluminium, Centralschweiz, Kraftwerke, Lonza, Kraftwerk Laufenburg, while Nestlé kept fairly stable between 805 and 815. Very firmly developed insurance stocks although the amount of shares traded remained small as usual.

After the gilt-edged market enjoyed a steady rise since the beginning of the year a slight reaction lowered the quotations immaterially. The index of Federal railways and governmental issues increased since last December by approximately 5½ points and the average yield dropped in the same period from over 5% to 4.6%. This amelioration is the direct consequence of the new finance-program and a decreasing fear for currency devaluation.
