The Chairman endorsed the sentiments expressed by Mr. Vischer and his high and noble conception of emigration and the audience thanked the lecturer most heartily for his interesting and illuminating address. M.R.

CITY SWISS CLUB.

We have received very favourable comments from members who were fortunate enough to attend the last meeting which has been termed as one of the best, most interesting and amusing monthly meetings that the City Swiss Club has had for a long time. We understand from the Secretary that the committee has another little surprise in store for the November meeting, and the committee look forward to a still greater attendance. Members will be welcome with as many guests as they wish to bring.

ST. GALL FABRICS AND EMBROIDERIES. At the Swiss National Exhibition 1939 Zurich.

St. Gall has undertaken to co-operate in the Swiss National Exhibition in Zurich next year with a display of the finest products of textile industries. The display will include both materials and embroideries. A good deal has been written about the embroideries of St. Gall — the familiar "Swiss net," "Swiss embroi-dery," and so on — but while the St. Gall fabrics are well known in themselves, little has as yet appeared in print about them. The following brief notes may therefore help to make this secbrief notes may therefore help to make this sec-tion of the exhibition more interesting to the visitor.

The name of St. Gall has been associated with textiles for centures past, and as early as 1500 we find mention of linen-weaving. It might ben mentioned here that St. Gall has a very ancient tradition of fine handicraft. In the 7th century Irish monks settled there to found the great Abbey, bringing with them a superb illuminated Gospel, now in the Abbey Library, which was to flourish in St. Gall for a long time to come. The cultural life of the place was com-pletely dominated by the Abbey, and it is there-fore not surprising to find the St. Gall linen-weavers renowned far and wide for their skill. Linen-weaving remained the staple industry of the place until well into the 18th century. About 1720 the first records of the hand-The name of St. Gall has been associated

the place until well into the 18th century. About 1720 the first records of the hand-weaving of muslins make their appearance, and in the course of time this industry completely ousted the linen-weaving. By the middle of the 19th century, we find the St. Gall muslins largely replacing the superfine fabrics imported into Europe from India. The fashions both for men and women prevailing at the time promoted their use and they reached a degree of delicacy almost unknown to day. Their beauty, however, might well recommend them to the attention of our con-temporary fashion dictators. Not so very long ago connoisseurs used to take a delight in passing these muslins through their fingers simply to appreciate the fineness of their texture.

appreciate the fineness of their texture. The linen, and the later cotton fabrics were prepared for the market in the neighbourhood by bleaching and dressing, and the latter industry steadily developed and improved. The simple bleaching of the plain material yielded to more complicated methods. A process was invented in St. Gall by which ordinary cotton muslin was hardened and made translucent by dressing. This new fabric, called organdie or transparent, was produced both plain and embroidered, and is still high in favour for summer dresses. A further process was also invented here for pro-ducing artistic designs in this material; the organdie finish was applied only in parts, the resulting opaque patterns being left smooth or worked into crepon effects. The whole either re-mained in plain colours or was printed in colour-designs. These stuffs, known as *imago*, *crèpe organdie*, *organdie cloqué*, *hetex*, *crèpe bosselé*, etc., maunfactured in our neighbourhood and ex-ported all over the world, rightly go by the name of " St Gall materiale". ported all over the world, rightly go by the name of "St. Gall materials," whether they were pre-pared for the market on plain or fancy fabrics. The weaving and finishing are equally important and share equally in the beauty of the finished article article

article. As regards the development of the embroidery industry the first records in St. Gall go back to 1753. According to some accounts, St. Gall mer-chants who had settled in Lyons and employed Turkish women to embroider for them there, in-troduced the industry into their native town. One of these Turkish women is said to have been sent to Appenzell to teach the women there to embroider as a means of livelihool. Other accounts say that the art of hand-embroidery which had flourished in the local convents for centuries past inspired the linen and muslin weavers with the idea of industrialising the em-

broidery of their materials. About 1780 some 30,000 women are said to have been regularly em-ployed in hand-embroidery. It was, however, a slow and expensive process, and hence inventive spirits devised the embroidery machine which was spirits devised the embroidery machine which was destined to undergo so remarkable a develop-ment. Nowadays hand-embroidery still goes by the name of "Appenzell embroidery," and is as delicate and rich as ever. Machine embroidery and the designing connected with it are centred in St. Gall itself and its products are exported all even the world

all over the world. The simplification of women's dress due to The simplification of women's dress due to the war, the long crisis and the popularity of sports fashions led to a practical total decline of the industry. For some time past, however, girls and women have begun to realise that trim-ming adds charm to dress and that lace and em-broidery lend it a feminine note. This change in fashion-feeling has brought about a revival of the ure of the doll metric.

use of St. Gall materials. Last year, at the Paris Exhibition, we were Last year, at the Paris Exhibition, we were able to display some of the achievements of our industry. Next year, at the Zurich Exhibition, we hope again to show what St. Gall fabrics and embroideries are, not only in the pièce, but made up in dresses, blouses, collars, flowers or what-ever may then be in fashion. We even contem-plate setting up an embroidery machine, so that initions may now the films with far graving before visitors may see the filmy stuffs growing before their eyes. We hope too that a few Appenzell women, in their beautiful and becoming local costume, will let us see them at work on their exquisite hand-embroideries. There will also be a display of hand-woven materials from Appen-zell zell.
