Traffic

The report for 1946 of the Swiss Federal Railways emphasises the satisfactory development of traffic and the good financial results attained in the year under review. Passengers carried in 1946 totalled 206,450,000, exceeding the 1945 figure by 1,560,000 or 0.8 per cent. As compared with the exceptional passenger traffic during the war, the increase in 1946 is on a smaller scale. Passenger receipts totalled fr. 258,200,000, an increase of fr. 3,990,000 or 1.6 per cent. compared with 1945, and represented 44 per cent. of the total working receipts. In 1946, passenger-km. declined to 5,444,500,000 from the 5,654,900,000 attained in 1945, the highest ever recorded. This contraction, in the light of the increased number of passengers, points to an increase in short-distance season tickets, as well

as to an improvement in the yield per passenger-km. (4.74 centimes in 1946; 4.5 centimes in 1945). In addition, it testifies to greater use being made of first and second class accommodation.

The increase in the traffic has been striking. Goods conveyed, including luggage, livestock, and mails, totalled 16,880,000 tonnes in 1946, an increase of 3,550,000 tonnes or 26.6 per cent. over 1945. This increase has been due, in the main, to the great expansion of foreign trade and to the consequent greater density of home traffic. Goods receipts totalled fr. 305,590,000 in 1946, or fr. 66,880,000 (28 per cent.) more than in 1945. Merchandise and minerals represented 45.7 per cent. of the total working receipts, luggage receipts 2.8 per cent., livestock receipts 1 per cent., and receipts from the conveyance of mails 2.6 per cent.

Miscellaneous receipts in 1946 were 3.9 per cent. of the total working receipts, which amounted to fr. 586,500,000, as compared with fr. 511,600,000 in 1945, a result never attained before. Working expenditure, too, reached the record level in 1946 of fr. 387,400,000 (fr. 365,200,000 in 1945). It was made up as follows: Motive power and workshops, 29.2 per cent.; stations and train services, 37.5 per cent.; maintenance and inspection of permanent way, 21.4 per cent.; general administration, 1.9 per cent.; and miscellaneous expenditure, 10 per cent. The working surplus in 1946

amounted to fr. 199,090,000, an increase of fr. 49,470,000, or 33 per cent., as compared with 1945.

The profit and loss account for 1946 closed with a credit balance of fr. 21,400,000. These were the first accounts since the financial reconstruction of the railways which became operative on January 1st, 1946. In accordance with the Federal Railways Law, the sum of fr. 8,000,000 must first be paid from any credit balance into a fund intended to cover future deficits. Furthermore, the board proposed payment of an interest of 3 per cent. on the working capital. This will absorb a further fr. 12 million. In respect of the balance of fr. 1,400,000 the Federal Council will be called on to decide as to its use. Apart from this, fr. 4,700,000 had to be paid into the equalisation fund of the Swiss railway and steamship undertakings, in accordance with a decision of the Federal Council.
