THE STORY OF A RECORD-BREAKER

**FOR THE FIFTH TIME ... THE MOST
ACCURATE WRIST WATCH AT THE
OBSERVATORY OF GENEVA**

IF you win five first prizes in seven successive contests, you have a right to be proud! That is exactly what the world-famous Omega 30 mm has done. As production starts into the second million, the Omega 30 mm has won its fifth victory out of seven consecutive annual precision contests held at Geneva Observatory. Scoring 870.3 points, it bettered its own *precision record* for 1950 in the wrist watch category. And all the world *does* love a winner! Already over a million men have chosen the Omega 30 mm, recognising that this timepiece fulfils all requirements for highest wrist watch accuracy.

Swiss Observatories have found that in watches made to be worn on the wrist, the 30 mm diameter allows the most precise adjustment. At Geneva each watch is tested for 45 days in five standard positions, at temperatures ranging from freezing cold to tropical heat.

ACROW
STEEL PARTITIONING

A commercial interior that is planned for efficiency now will rarely remain the best possible arrangement for very long.

Expansion and re-organisation demand a fluid layout that can be adapted and constantly re-adapted to give 100% efficiency at all times.

Acrow Steel Partitioning offers you this. It can be dismantled and re-erected again and again at no more than labour cost: every unit is 100% re-usable. It compares favourably with breeze-brick walls in initial material cost and shows a heavy saving in initial erection time and labour costs.

Full details are readily available on request. Please write for our illustrated brochure SO/SP.
