Federal

The funeral of the late Federal Councillor Dr. Markus Feldmann, former head of the Federal Police and Justice Department — who died suddenly of heart failure — took place in Berne on the 7th of this month.

On the morning of the funeral the remains were transferred from the chapel of the "Burgerspital" to the *salon* of the Federal Council at the Palais Fédéral.

Large crowds, many in mourning, gathered outside the Parliament building to witness the cortège, which wended its way from the "Bundesplatz" to the Minster.

Amidst the tolling of church bells the coffin, covered by the Swiss national flag, was carried by six officers and placed on a gun-carriage drawn by six horses.

A squadron of cavalry headed the funeral procession, immediately followed by a delegation of the students corps "Zähringia" of which Dr. Feldmann was a member, and by a number of carriages with flowers and wreaths. Next came a battalion of infantry with a regimental band. The gun-carriage bearing the coffin was flanked on each side by members of the Federal Council, and behind it followed a number of cars with members of the family of the deceased.

Then followed on foot former Federal Councillors, General Guisan with high ranking army officers, Members of Parliament, delegations of the Supreme Federal Courts, close collaborators who worked with the deceased at the Federal Police and Justice Department, members of the diplomatic and consular corps, and the foreign and military attachés in full uniform. Behind them followed the "Stadtmusik" playing "Ich hatt' einen Kameraden".

The cortège ended with delegations of the cantonal Governments (headed by their beadles), the National Bank, the Swiss Federal Railways, the Churches and Universities.

The funeral service was held at the Minster, where the coffin was placed in front of the altar. After an

organ *prélude*, the members of the "Berner Liedertafel" and "Berner Männerchor" sang. Pastor Ulrich Müller referred in his funeral oration to the eminent services which the deceased had rendered to the country, and his love of justice and human rights. The sermon was followed by Händel's sonata in C minor, played by the municipal orchestra, and an address by Dr. Th. Holenstein, President of the Swiss Confederation. The latter, on behalf of the Federal Council and the entire Swiss population, paid a touching tribute to the departed for the eminent services which Dr. Feldmann in his high office had rendered to the country, concluding his address with particulars of the distinguished career of the deceased, and extending the sympathy of the Government and the Swiss people to the family.

The President of the Confederation was followed by the President of the Bernese Government, Mr. W. Siegenthaler, who spoke of the distinguished services the departed had rendered during the time when he was a member of the cantonal Government.

The two choirs in conclusion then rendered Gottfried Keller's "O mein Heimatland". The interment took place at the "Schosshalde" Cemetery, and was attended only by members of the family and the Federal Council. Federal Judge Dr. W. Stauffer, on behalf of the "Zähringia" students corps, placed the cap and ribbon of the departed on the coffin before it was lowered to its last resting place.

The "Basler Kunstmuseum" has lost one of its celebrated pictures, the "Darmstädter Madonna" by Hans Holbein the younger.

In 1947 Prince Ludwig of Hessen entrusted it to the museum for safe keeping, on condition that it would be returned when the "Kunstmuseum" in Darmstadt — which was partly destroyed during the last war — was rebuilt. This having been done, the picture was sent to Darmstadt on the 15th of this month. (A.T.S.)

CRONACA NOSTRANA.

Lo spopolamento, l'esodo rurale, l'impoverimento dell'economia montana non sono un fenomeno unicamente ticinese. Rientrano nello sviluppo e nelle modificazioni di struttura di tutte le economie moderne. La produzione agricola non è più il ramo principale d'attività che assorbe la percentuale maggiore della popolazione. La migrazione, dall'attività agricola e rurale verso l'attività degli altri settori (industria, commercio, amministrazioni, professioni liberali ecc.) risponde allo sviluppo tecnico e alle esigenze produttive del mondo moderno, e, come tale, è inarrestabile, necessaria, salutare. Però l'agricoltura non perde per questo la sua ragione di essere, come base indispensabile e come fonte di sussistenza di ogni economia nazionale. Non possiamo sacrificarla totalmente all'industrializzazione e all'urbanesimo. Un'economia rurale forte e vitale è necessaria all'equilibrio di un paese. Il suolo, le acque, i boschi, i pascoli non sono beni disprezzabili, ma rimangono una ricchezza, al servizio della quale bisogna saper mettere l'uomo e la tecnica, per valorizzare meglio la loro produttività. Non si tratta di abbandonare la terra, ma di rivalorizzarla, con tutti i procedimenti tecnici e di razionalizzazione del lavoro che la nostra epoca ci mette fortunatamente a disposizione.

DI PICCOLO TAGLIO.

LUGANO — E' apparso in questi giorni un libro dal titolo: "Sulle strade regine del Mendrisiotto". Si tratta di un'opera di Oscar Camponovo, da Pedrinate in Lugano, valente ingegnere, per molti anni residente all'estero (Parigi, Milano) da dove rimpatriò con quello amore di terra lontana che fa più tenace e profondo l'attaccamento all'oggetto della propria passione, sulla storia del Mendrisiotto (Alla ricerca dei tempi che furono — Il Baliaggio di Mendrisio — L'antica pieve di Balerna) che, pur avendo l'Autore già dato ripetuti saggi della sua valentia di studioso di materie storiche ci lascia attoniti di riverenziale ammirazione.

LOCARNO — ospite del sindaco, avv. G. R. Rusca, spirava improvvisamente sabato, 1° novembre, S.E. Egidio Reale, in età di 70 anni. Fu giornalista, scrittore, profugo, Ministro e Ambasciatore d'Italia a Berna, giudice ed insegnante, Ambasciatore politico e di cultura.

— E' entrato in funzione in questi ultimi tempi il nuovo edificio dell'Osservatorio Ticinese della Centrale Meteorologica Svizzera. La nuova costruzione dell'Osservatorio Meteorologico ha la facciata rivolta a sud e si divide in piano semisotterraneo, piano rialzato, primo piano e termina con una vasta terrazza alla cui estremità occidentale si innalza una torre. Il piano per studi sulla fisica delle nubi, la stazione emittente, la camera oscura, un piccolo locale per apparecchi di semisotterraneo ospita gli impianti del riscaldamento centrale, l'officina di meccanica fine, due laboratori

registrazione e un locale di soggiorno; il piano rialzato cinque uffici, due laboratori ed un locale per istrumenti; il primo piano un grande locale per il servizio di previsione, un locale per le telescriventi e il facsimile, rivestito in modo che il rumore delle macchine sia attutito, quattro uffici per meteorologi, l'archivio e la biblioteca. La torre serve esclusivamente a misure della radiazione. Sulla terrazza della torre, sopra tavoli in marmo di Peccia, insensibili a qualunque scossa, sono esposti diversi apparecchi. Da ultimo si è pure costruito un doppio garage. La specola solare dell'Osservatorio Astronomico federale, che sorge nell'angolo sud-est del terreno, è una costruzione ad un sol piano che contiene vari uffici, un lungo coelostato e una torre sormontata da una cupola dove è installato un moderno rifrattore solare. Il terreno circostante, che una volta era un vigneto a terrazzi, è stato appianato e trasformato in un prato dove sono ora esposti diversi istrumenti che servono a ricerche meteorologiche.

LUGANO — Sabato, 29 novembre, alla presenza del consigliere federale Giuseppe Lepori, verrà ufficialmente inaugurata la trasmittente televisiva costruita nel giro d'un anno sulla vetta del San Salvatore. La partecipazione del Capo del Dip° delle Poste e Ferrovie alla cerimonia indica la grande importanza che riveste l'entrata in esercizio della nuova trasmittente, grazie alla quale finalmente anche il Sottoceneri potrà essere collegato con la televisione svizzera.

— Il Tiro Federale 1964 non avrà luogo a Lugano come era intenzione dei tiratori luganesi in quanto quest'ultimi avevano domandato di anticipare la manifestazione di un anno per evitare la coincidenza con l'Esposizione Federale. La richiesta è stata respinta.

— Fra i numerosi lasciti fatti dal compianto avv. Carlo Censi, già consigliere nazionale e sindaco di Lugano, rileviamo quelli fatti al Comune di Lugano: a) Parte del suo ronco a Lamone vitato a Chasselas per la produzione del vino bianco destinato ai ricevimenti; b) Al Museo Caccia — da Lui inaugurato quale presidente — l'opera di "Caino dopo il delitto" dello zio Pietro Censi morto a 24 anni. Opera da gittarsi in bronzo col contributo del testatore di Fr 3,000.

PARADISO — La sera di venerdì, 7 novembre avveniva sulla strada internazionale, nella zona della Forca di San Martino una paurosa caduta in massa di pietrame, improvvisamente staccatasi dalle falde della montagna. La caduta che ha sollevato paura in chi in quell'ora si trovava nelle prossimità, per il rumore e il rotolare violento dei massi sulla camionabile, è di oltre 30 quintali di materiale.

MALVAGLIA — La cronaca degli incidenti mortali sui cantieri idroelettrici di Valle di Blenio non è purtroppo conclusa. Alla già lunga corona si è infatti aggiunto quello registratosi lunedì, 10 novembre, alla finestra di adduzione del riale Dongia, alla diga di Malvaglia e del quale è rimasto vittima l'operaio Wilhelm Karnen, nato nel 1926, coniugato e padre di 2 bambini, cittadino austriaco. Il Karnen si trovava, con altri 3 compagni, nei pressi della finestra, quando in seguito al movimento di sassi verificatosi superiormente alla stessa, un grosso masso precipitava sul Karnen, investendolo e schiacciandolo, così che l'infelice rimaneva morto all'istante.
