amounting to 13.3 million francs from public funds (40% from the Confederation, 60% from the Canton).

There is opposition to navigation on the Upper Rhine, but Aargau fishermen are in favour of the Aare being made navigable. The Oberrheingau section for the protection of the Aare demand the water purification of the rivers Aare and Oenz before the construction of the new power works of Neubannwil.

Agreement has been reached on compensation for the farmers of the Fricktal, who have been suffering fluor damage due to the aluminium industry.

Aarau citizens have launched an Initiative to create a Municipal Parliament rather than keep to the Commune Assembly. The necessary number of signatures has been surpassed by seven (855). **Baden** has shown a slight decrease in the number of visitors to the spa, but it is still one of the most frequented thermal spas in Switzerland. The regional planning group has found that some 200 million francs will be needed in the next decade to realise all the desirable projects. In February, the new "Aargauische Hochschulverein" met in Baden. The Aargau is considered one of the best regions for a fourth university in German-speaking Switzerland. Since April, a study commission has been working on the problem of how the Aargau could best contribute to the Swiss academic system. In March, the tenth federal congress for conductors took place in Baden, and in May, the "Aargauischer Apothekerverein" was 125 years old and celebrated the jubilee in the same town.

The **Frick** Commune Assembly has granted permission for an airfield between Schupfart and Hellikon to the Aeroclub Fricktal. The beautiful chapel of the **Jonental** (partly in the Canton of Zurich) has been successfully renovated and is one of the little-known treasures of the "Heimatschutz". **Koelliken** has voted Fr.1,800,000.— for sewerage and sanitary installations. At the invitation of the Institute for Strategic Studies in London, an international meeting on the problem of nuclear arms took place at the Castle of **Lenzburg**. On 25th May, 600 members of the Leutwyler family met at their place of origin **Leutwil**. There is a committee dedicated to this family dating back to the twelfth century.

The **Maegenwil** authorities regret that the "Mittelland-Raffinerie A.G." has decided to construct its refinery in the Canton of Lucerne. The working party "Clean Reuss" demanded water protection in the Reuss valley when it met at **Mellingen**. The "Klosterkirche" **Muri** is 900 years old, and the Muri district hospital is to receive 70% of the cost of a new staff home from the Canton. The Commune of **Staretschwil** wants to be separated from **Oberrohrdorf** with which it forms a political unit at present. The village of **Oberrohrdorf** also looked back on 900 years of existence last autumn. The **Safenwil** Church Parish Assembly has decided to renovate its church. **Unterentfelden** celebrated its millennium in April, and both villages, also **Oberentfelden**, have had special festivities in June.

The Commune of **Villmergen** will contribute 4.4 million francs to the cost of the new school buildings (6.4 mio). **Wettingen** has now new Commune regulations governing the activities of the new Inhabitants' Council of fifty members; the electorate accepted it, and it will become law on 1st January 1966. **Wohlen** citizens generously granted a million francs towards the realisation of old people's homes. New regulations for the Inhabitants' Council of forty members have been accepted. In order to get the citizens acquainted with the candidates for the Cantonal Government prior to the elections, the K.V.

Wynental arranged a round table conference with them, which was extremely useful and successful. At **Zeihen**, civil defence troops were used for the first time to demolish a church which was built in 1932, but never matched the surroundings and is to be replaced as part of the cultural centre planned two hundred years ago, but only to be realised now. The school building has already been erected.

Zofingen will have new buildings for its Office of Works; its Commune Assembly generously granted 9.4 million francs for the project. The temporary buildings of the branch of the Aargau teachers' training college were opened at Zofingen in April. A workman, believed to be poor, left Fr.110,000.—, most of it in gold and notes hidden in his flat at **Zufikon** near Bremgarten. At **Zurzach** a new warm water source has been discovered; a flow of 2,000 litres per minute and at 39°C, and only at a depth of 64 metres.
