A NEW "GUARD" PRODUCT

The firm of Airguard Ltd., of which Mr. W. W. Landauer, a compatriot of ours, is Chairman and Managing Director, are once again in the forefront with an entirely new "miracle" cloth which has taken years of research to produce.

This new material has been subjected to independent tests by recognised examiners. The results of the tests, which were of a drastic nature, revealed that this material is far more effective than any other Acid Resisting material used in the making of overalls.

These new "Guard" Acid Resisting warehouse coats and boiler suits are specially recommended to give positive protection to operatives in the Chemical Industry, Laboratories, Dye and Colour Works, Printers, Platers and Photographic Processors.

Here are the results of Independent Tests made by Recognised Examiners: Concentrated Hydrochloric — result showed No Penetration; Sodium Hypochlorite — result showed No Penetration; Concentrated Ammonia — result showed No Penetration; Concentrated Sulphuric — result showed Very Slow Penetration; Concentrated Nitric — result showed Very Slow Penetration.

THESE 2 SIMPLE PARTS BRIDGE A BIG SPACE PROBLEM

This revolutionary storage rack system called the Acrowrack Series 75, is economical to buy . . . and cuts time and cost of erection to a minimum. Enormous savings in space result because Series 75 makes positive use of every inch of room available. It's strong. It's versatile. It's the most advanced rack system in industry today. The secret of Series 75 is its unique LOCK, which secures instantly on erection for complete stability and safety. No nuts or bolts are needed.

ACROWRACK

The strongest and only system with a positive lock
