Save thousands of pounds on your materials flow

Receive it! Store it! Despatch it! All with the ACROW Switchcart System

For six years we worked and researched to find a solution to a world-wide problem. How to achieve an automatic, smooth, continuous multi-point materials flow system. A system that would run like clockwork without costing the earth. But which could save companies a small fortune.

Well, we won our fight. For Acrow Switchcart Conveyor is the complete answer. The simple answer. And quite capable of

returning your investment inside two years!

With this system you can programme to many destinations with as many carts as you like. It doesn't matter if your building is old. Or new. Multi or single-storey. The channel track is of low profile, penetrating no more than 3 inches of floor thus offering economical installation.

It's a fully programmed, automated system. The route as well

as spur locations are pre-designed to your optimum load requirement. Programmed carts switch automatically from the main line to reach their destinations – an ability which alone ensures smooth continuous materials flow.

With the Switchcart system Acrow have delivered the greatest thing in automated handling – ask Woolworths, ask Fibreglass, ask Michelin, ask Ford, **ask us!**

Acrow (Automation) Limited,
Moorhall Road, Harefield, Uxbridge, Middlesex
