Was your company under the weather last summer?

This issue of August 5th 1975, is reproduced by courtesy of the Editor of the Daily Mail.

Then install Acro-Kool drinking water coolers.

Remember the summer of '75? When the temperature suddenly shot up into the 80's, and stayed there for weeks?

Remember how it affected your work-force – and their output?

The more the temperature increased, the more efficiency decreased. The hotter it grew, the quicker tempers flew. And the more man-hours you lost.

Stop sweating Install an Acro-Kool free-standing water cooler before things begin to warm up this summer. Each unit supplies instant chilled water on tap, whenever it's needed; keeping your workers refreshed, their tempers cooled and their efficiency up.

There is a wide range of Acro-Kool water coolers suitable for almost every application. They are easy to install and maintain and can be positioned practically anywhere. Can you afford not to find out more about them?

Write for details.

Acro-Kool—A great liquid asset.
