Last summer was all it was cracked up to be!

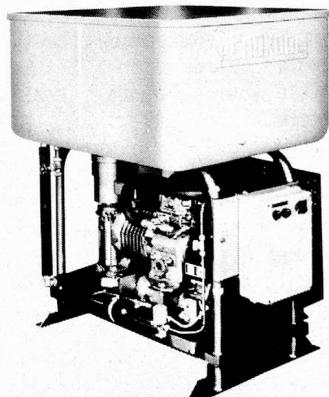

This summer be prepared—install Acro-Kool water / *and money* savers now.

The scorching and relentless sun of the summer of '76 found Industry totally unprepared for the heat.

Now the problems of overheated machinery can be relieved by installing Acro-Kool water/money savers.

Quite apart from the heat, there's the increasing cost of water to consider. But an Acro-Kool system will greatly reduce the amount you use by recirculating and returning it chilled and ready for re-use. The Acro-Kool range has also been developed to meet the demand for water and other liquids that must be maintained at constant temperatures.

Special attention has been paid to the return feed arrangement to ensure thorough mixing and uniform distribution.

P.S. Employees will be grateful for the reviving effect of a long cool drink too. Acro-Kool Chilled Water Dispensers are easy to install and maintain, and provide practical benefits for any business. Get ready now for the summer of '77! Write for full details today.
