Storage Flexibility is

holding 4200 lines of groceries;
a whole range of motor part components;
power transmission products from a few ounces to many cwts.

Acrowrack Series 88 has that flexibility.

Acrowrack Series 88 is the most adaptable idea in storage systems. For proof ask Leicester Book Services who use Series 88 for the storage of paper, paperback books and magazines or Clayton Aniline who use Acrowrack for metal storage.

The most advanced storage rack in the world was not developed overnight. Exhaustive testing over years, particularly on beam sections,

finally produced the flexibility to take anything from nylons to 15 ton steel coils, with frame capacity loads in excess of 50,000 lbs.

Acrowrack Series 88 has a range of 10 beam sections to meet your requirements economically. You buy only the material you need to suit the application. And when your needs change you simply adapt the system. This gives you the best possible advantages in terms of economy and

flexibility in design.

Constant testing ensures safety with beams of high strength-to-weight ratio. The unique beam connectors have an integral safety lock.

Extra adaptability for different storage requirements is achieved by a full range of drop-on accessories.

Ask us now for the full facts about Acrowrack Series 88 and how its adaptability can work for you.
