# They would have loved us

**THOMAS ALVA EDISON, 1847-1931.**  
American inventor, especially of electrical devices.

Araldite® epoxy resins made by Ciba-Geigy's Plastics Division and familiar to the general public as adhesives, are an essential ingredient in the production of electrical and electronic components.

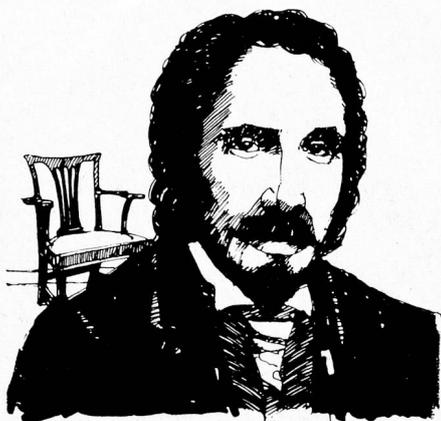

**REMBRANDT HARMENSZOOM VAN RIJN, 1606-1669.**  
Dutch painter and etcher.

Pigments Division manufactures a wide range of lightfast, durable pigments, used in the production of high quality artists' colours. The division is also a leading supplier of organic pigments and dyes to the other colour-using industries.

**ORVILLE AND WILBUR WRIGHT, 1871-1948 and 1867-1912.**

**American aeronautical inventors.** Bonded Structures Division produces high performance structural adhesives and composites for the aircraft and related industries. Other uses range from vehicle brake production to the bonding of composite skis.

**THOMAS CHIPPENDALE, 1718-1779.**  
English cabinet maker and furniture designer.

Ciba-Geigy's Plastics Division is Britain's largest manufacturer of synthetic resin adhesives. Aerolite® urea resins, long established as outstanding wood glues, find their biggest use in the manufacture of chipboard and plywood, for veneering and all types of joinery.

**ISAMBARD KINGDOM BRUNEL, 1806-1859.** English civil engineer. Foundry Chemicals Division, a subsidiary of Plastics Division, is a leading supplier of specialised chemicals for the foundry industry. The products include resins, silicates, hardeners, acid catalysts, conventional oil sand binders, facing materials and foundry paints.

**GEORGE STEPHENSON, 1781-1848.**  
English inventor and engineer.

One of the activities of Industrial Chemicals Division is to provide a full range of chemicals and auxiliary products for boilers and cooling water systems. The Belgard® range includes chemicals for the treatment and control of scale, corrosion and biological fouling in water distillation units, such as desalination plant, steam raising boilers and water recirculating systems.
