the clock that lives on air . . .

There has been a near-miracle in the craft of clock-making. Jaeger-LeCoultre, with characteristic pioneering genius, have created a clock that operates without human agency: it needs no winding, no batteries, no electricity.

Its name is the ATMOS and it derives its power from the constantly changing temperature. In short, the ATMOS runs on air. It is calculated that after 300 years the ATMOS would show no more wear than would a watch in 12 months. With arresting good looks to match mechanical perfection the ATMOS is a perpetual source of pride and satisfaction.
