VIDEO PROGRAMMES of EUROPEAN RAILWAYS

NEW

THE BERNE-LOTSCHBERG-SIMPLON RAILWAY 1hr £24.95 Pre-production offer £23.50 until 30/6/86.

The Berne-Lotschberg-Simplon Railway forms one of the main arterial routes of Europe, threading the wild and dangerous Swiss Alps through Europe's highest standard gauge tunnel. The railway is of increasing importance, its largely single line mountain section is being rapidly converted to double track to handle an even greater volume of international traffic.

Distinctive milk chocolate coloured locomotives haul smart blue and cream passenger cars intermingled with those of the SBB, Italian, French, German, Belgium and Dutch railway systems. Colourful freight trains also march through the Alps in a steady procession linking the industrial towns of northern Italy with commercial centres in the rest of Europe through the Simplon Tunnel.

The BLS and its constituent companies also run trains to Interlaken, Zweisimmen, Belp, Schwarzenberg and Neuchatel. These and the Alpine route connecting the Rhone and Kander valleys are all thoroughly covered in this exciting, action packed video programme.

NEWS: By the time you read this our crew will be in Switzerland filming the fabulous BLS. The hour long programme is being made with the full co-operation of the BLS management who have accorded us unique filming opportunities. The programme will be published in June and pre-publication orders received before the 30th June will be charged at £23.50. Thereafter our normal price of £24.95 will apply. Access and Visa orders will be charged at £23.50 but not processed until the tapes are ready.

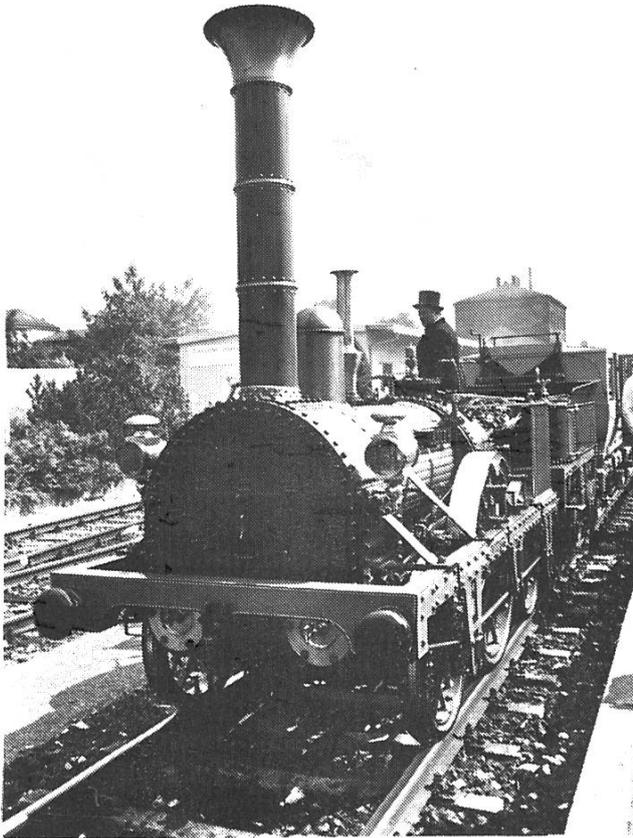

The BLS programme will be the first to be shot on our new Hitachi FP Z31 Computercam broadcast camera mastering on to new 3M UCA 20S broadcast high grade tape.

VIDEO PROGRAMMES of
EUROPEAN RAILWAYS

VIDEO FEATURE:

150 YEARS OF GERMAN RAILWAYS
 1hr £24.95

1985 was the year when Deutsch Bundesbahn and the German people celebrated 150 years of railways in Germany. Many special steam, electric and diesel hauled trains were run throughout the summer. A magnificent exhibition was staged in Nurnberg and a unique series of train parades took place in September. Our cameras were there to record the events as they occurred.

This programme also traces the history of the development of railways in Germany and takes a long look at present day railway operation in Germany. If you are at all interested in German railways this programme is a must.

All our programmes are now available in SECAM for France and NTSC for America and Japan. Prices are the same plus air mail postage.

Foreign buyers, please send for newsletter. By the end of 1986 most programmes will be available in German, French and Japanese.

YOUR COPIES

Our increasing world-wide distribution has enabled us to bulk-buy high grade tape for your copies whilst holding costs down. All copies are time base corrected and duplicated on professional, not domestic recorders.
