Bristol and Bath Area Layout

The Bristol and Bath Area decided to construct its own information stand to take to local exhibitions to create interest in the society in particular and Switzerland in general. It was found that although the stand achieved this aim, it would be better if it could be accompanied by a Swiss layout, which would attract more people to the stand.

To this end the inevitable meetings were held by a number of like-minded members to agree gauge, size of layout etc. and one of them, Roger Payne, drew up a suggested plan accompanied by an invaluable scale mock up of the proposals.

The layout is 10ft x 4ft and the single track line goes from fiddle yard to fiddle yard through three levels with a passing station. At the time of writing (July 1994) the baseboards have been built and we have started tracklaying and wiring. It is a team effort, and so far this has been one of the greatest pleasures of the project.

We have a deadline to work to, since the layout, called *Driebrücken* for obvious reasons, has been promised for the Bath exhibition on 10 December. If any member is to be in that area, they will be most welcome to call and see the results of our efforts: Roger Ellis
