A new kind of sewing-machine: The portable electrical ELNA

ELNA, the sensational product of the Swiss precision industry, is the sewing-machine of to-morrow. Made of light metal, its weight is only 6,5 kg and it can be put into its handy metal case serving at the same time as sewing-table. The ELNA is the world's first household-sewing machine with

the free arm

facilitating important work, such as the

darning of stockings. The ELNA has built-in illumination, is of an eye resting green colour and its entirely new lines express smartness. The ELNA is a masterpiece of the TAVARO Works in Geneva; owing to their accuracy, their other products have gained world fame since a long time. In Switzerland, the ELNA has stood the test splendidly since years.
