Nutzungsbedingungen

Die ETH-Bibliothek ist die Anbieterin der digitalisierten Zeitschriften auf E-Periodica. Sie besitzt keine Urheberrechte an den Zeitschriften und ist nicht verantwortlich für deren Inhalte. Die Rechte liegen in der Regel bei den Herausgebern beziehungsweise den externen Rechteinhabern. Das Veröffentlichen von Bildern in Print- und Online-Publikationen sowie auf Social Media-Kanälen oder Webseiten ist nur mit vorheriger Genehmigung der Rechteinhaber erlaubt. [Mehr erfahren](#)

Conditions d'utilisation

L'ETH Library est le fournisseur des revues numérisées. Elle ne détient aucun droit d'auteur sur les revues et n'est pas responsable de leur contenu. En règle générale, les droits sont détenus par les éditeurs ou les détenteurs de droits externes. La reproduction d'images dans des publications imprimées ou en ligne ainsi que sur des canaux de médias sociaux ou des sites web n'est autorisée qu'avec l'accord préalable des détenteurs des droits. Swiss Federal Institute of Technology Zurich

Bioengineering

The Swiss Federal Institute of Technology Zurich is establishing a new interdisciplinary program in Bioengineering. The Department of Information Technology and Electrical Engineering and the Department of Materials of ETH Zurich seek applicants for three professorships in the following areas:

Professor of Bioimaging

The Department of Information Technology and Electrical Engineering seeks applications for a professor in the area of bioimaging. Topics that are of particular interest include biomolecular and functional imaging using methods based on MRI/MRS, CT, or optics. Due to its myriad collaboration possibilities ranging from basic science and engineering to clinical applications, Zurich offers a vigorous and stimulating environment for bioimaging as well as for magnetic resonance imaging and spectroscopy. The successful candidate is expected to participate in the teaching activities of ETH Zurich in biomedical engineering.

Professor of Bioelectronics

The Department of Information Technology and Electrical Engineering seeks applications for a professor in the area of bioelectronics. Of interest are all aspects relating to the interactions of biomolecules and biomolecular assemblies with electronic structures or materials. The University of Zurich and ETH Zurich offer a stimulating environment in the field of neuroinformatics and neuroscience in general. The successful candidate is expected to participate in the teaching activities of ETH Zurich in bioelectronics and more generally in biomedical engineering.

Professor of Biomaterials

The Department of Materials seeks applicants for a professor in the area of Biomedical Engineering with a special emphasis on the synthesis and characterization of Biomaterials. It is expected that the successful candidate will have a proven track record in the field, including many years of experience at an international level. Research areas could include topics such as the synthesis, properties, and applications of new, biologically active or biocompatible materials for organ replacement, wound healing, or for targeted drug delivery to specific organs. The professor would be expected to collaborate to a significant extent with relevant groups from ETH and the University of Zurich. Teaching duties would include both lectures for materials scientists at all levels and special lectures for students with related curricula in chemistry, biology, physics, and engineering.

Applications with a curriculum vitae and a list of publications should be submitted to the **President of ETH Zurich, Prof. Dr. O. Kübler, ETH Zentrum, CH-8092 Zurich, no later than April 15, 2004**. ETH Zurich specifically encourages female candidates to apply with a view towards increasing the proportion of female professors.

Full Professor / Assistant Professor (Tenure Track) of Ecosystem Management

The professorship will promote the development and evaluation of management strategies for terrestrial ecosystems, based on a quantitative understanding of ecological interactions between soils, plants and animals, and taking account of natural and anthropogenic disturbance regimes.

The person appointed must have a strong background in the scientific study of terrestrial ecosystems, and will be expected to develop an interdisciplinary research program focused on the integration of multiple use and conservation issues of forest ecosystems in human-dominated landscapes. The successful candidate will also be responsible for teaching ecosystem management. He or she will play a key role in setting up the new master's program "Forest and Landscape Management". Courses at Master level may be taught in English.

The rank of the position (full or assistant professor) will depend on the applicant's qualification and expertise.

Please submit your application together with a curriculum vitae, a list of publications, the names of three referees, and a short statement of research and teaching to the **President of ETH Zurich, Prof. Dr. O. Kübler, ETH Zentrum, CH-8092 Zurich, no later than May 31, 2004**. With a view towards increasing the proportion of female professors, ETH Zurich specifically encourages female candidates to apply.
