Professor or Assistant Professor (Tenure Track) of Climate Geology

The Department of Earth Sciences (www.erdw.ethz.ch) at ETH Zurich invites applications for the above-mentioned position at the full, associate or assistant professor level.

The successful candidate is a leading scientist investigating climates of the geological past. He or she is expected to build a vigorous research program aimed at understanding climate and climate changes on timescales from millennia to geological epochs, using geological or geochemical approaches and modern analytical techniques. The research program may, for example, focus on the coupling between climate and terrestrial and oceanic systems, the development and exploitation of climate proxies from the marine sediment record, or climate changes during mass extinction events. Ideally, the future professor would complement existing strengths in the geosciences and climate sciences at ETH Zurich. The teaching portfolio is expected to include undergraduate classes in Earth system sciences, sedimentology and participation in our field program; more advanced graduate classes may cover aspects of Earth's climate, Earth history, and the use of proxies for inferences about past climates. The new professor will be expected to teach undergraduate level courses (German or English) and graduate level courses (English).

An assistant professorship promotes the careers of younger scientists. The initial appointment is for four years with the possibility of renewal for an additional three-year period and promotion to a permanent position.

Details regarding the application procedure and required documents can be found at www.erdw.ethz.ch/en/department/jobs/professorships. Please submit your application addressed to the **President of ETH Zurich, Prof. Dr. Lino Guzzella** online at www.facultyaffairs.ethz.ch. ETH Zurich is an equal opportunity and family friendly employer and is further responsive to the needs of dual career couples. We specifically encourage women to apply.

Professor of Public Policy

The Department of Humanities, Social and Political Sciences (www.gess.ethz.ch) at ETH Zurich invites applications for a full professorship in public policy.

The new professor demonstrates an excellent publication record in public policy analysis. Successful candidates combine strong and innovative skills in data generation and analysis with a strong empirical research agenda in public policy-making. The ability to build bridges to natural sciences and engineering disciplines at ETH Zurich is an asset. The professorship will be part of the department's governance section and will teach in the department's programs on public policy, political science, and development studies as well as in the interdisciplinary Institute of Science, Technology, and Policy (www.istp.ethz.ch). The new professor will be expected to teach undergraduate level courses (German or English) and graduate level courses (English).

Please apply online at www.facultyaffairs.ethz.ch

Applications should include a curriculum vitae, a list of publications, and a statement of future research and teaching interests. The letter of application should be addressed to the **President of ETH Zurich, Prof. Dr. Lino Guzzella**. The closing date for applications is 30 November 2015. ETH Zurich is an equal opportunity and family friendly employer and is further responsive to the needs of dual career couples. We specifically encourage women to apply.
