## Wild DI1000 DISTOMAT™

The EDM you can afford for every crew

# a b r e a k t h r o u g h

**in size**

In day-to-day work, 99% of distance measurements are less than 500 m. The need is for a small, lightweight, easy-to-use EDM that measures quickly and accurately.

**weight**

This is the DI1000, the instrument that makes a tape redundant:

- 500 m to a single prism
- 800 m to three prisms (1000 m in favourable conditions)
- 5 mm +5 ppm accuracy
- Slope, horizontal distance, height difference
- Setting-out mode
- Fits on all Wild theodolites, optical and electronic

**performance**

The ideal instrument for:

- Building and construction
- Civil engineering and setting out
- Drainage and irrigation
- Cadastral, detail and topographic surveys
- Mining and tunnelling

Ask for a brochure, demonstration and offer. ■

**price**

G 76-85

**1**  
**RESTON Pot Sliding Bearings** are highly suitable for installation in bridge structures. They feature a low-profile design, low weight and high loading capacity.

**2**  
**RESTON Linear Tilting and Sliding Bearings** are a combination of normal linear tilting bearings and PTFE sliding bearings and are suitable for installation in bridge structures.

**3**  
**LASTO-BLOCK Bearings** are suitable for building, civil engineering and bridge construction applications. Their simple form allows easy installation.

**4**  
**LASTO-STRIP Bearings for Buildings** were especially developed for building constructions. They are particularly suitable for movement compensation between concrete slabs and load-supporting walls and prevent structural cracking.

**5**  
**TENSA-ACME Roadway Construction Joints** are highly suitable for installation in traffic levels (parking lots, bridges, airport areas etc.). Dilatation up to 60 mm.

**6**  
**TENSA-LASTIC Roadway Construction Joints** meet all the requirements that can be made in bridge engineering of a modern joint design. They are rugged and watertight. Dilatation range 60 mm and bigger.
