#### FAMOUS RAILWAY JUBILEE.

Next week in Switzerland there will be celebrations to mark the jubilee of one of the most famous railways in Europe.

It is the line that runs down from Berne, past the lovely Lake of Thun, and then climbs up to the mountains of the Bernese Oberland until it tunnels its way through the Loetschberg and Simplon.

It is one of the great strategic traffic lines, oining England and France with Italy and the Balkans.

But it is probably the Jungfrau branch which interests the holiday maker, or the amateur of railways. If it cannot boast of international significance, it has the more immediately impres-sive claim of being the highest railway in Europe.

It was finished, after 16 years' work, in 1912, at the cost of 12,000,000 francs, and M. Guyer-Zeller, who designed it, probably created the most romantic railway in existence.

# The gradient is at times 1 in 4. GENEVA'S BROADCASTING HOUSE.

The studios of the Radio-Genève Broadcast-The studios of the Kadio-Geneve Broadcast-ing Company have long been inadequate. As in most other countries, it was not foreseen, when they were built in 1930, that the broadcasting service would develop so rapidly. In 1936, there-fore, the company considered the question of larger premises. Various plans were examined, but the cost proved prohibitive.

The organisation of broadcasting in Swit-zerland, being based on the principle of the decentralisation — and almost autonomy — of

the linguistic regions, is no parallel with that in other countries. For example, at Lausanne it was due to private initiative that the Société Romande de Radiodiffusion was able to have its own broadcasting house as early as 1935. Simiown broadcasting house as early as 1935. Simi-larly, in Geneva, a group of private persons formed, not a building society, but a "founda-tion," with the object of "constructing and renting a suitable building to the Radio-Genève Broadcasting Company." The construction of the building has now been decided upon, in entire agreement with the local administrative authori-ties of the Federal Administration of Posts and Railways on which Swiss broadcasting depends, and it is hoped that the Geneva Broadcasting House will be opened next spring. **TRADE PACT WITH SWITZERLAND.** 

Under a trade agreement between New Zealand and Switzerland, announced recently, Swit-zerland promises to take an annual quota of 1,500 tons of New Zealand apples and pears. In return New Zealand will admit a number of Swiss pro-ducts at the duty rates provided for in the agreements which New Zealand has concluded with Germany and Belgium.

#### IMPORTS OF MOTOR CARS.

Motor-cars imported into Switzerland last year totalled 9,858, of which 3,572 came from the United States, 3,372 from Germany, 1,427 from from Italy, 851 France, and 532 from Great Britain (against 1.019 in 1936). Increased im-ports from the United States and Germany were due partie to leave parises. due partly to lower prices.

#### PROFESSOR FRITZ DE QUERVAIN SEVENTY YEARS OLD.

YEARS OLD.
