FEDERAL.

ERNST ZAHN 70 YEARS OLD.

Ernst Zahn, one of the foremost writers in Switzerland, and for many years Manager of the Station Buffet at Goeschenen, has celebrated on the 24th of this month, his 75th birthday anniversary. Many of his h into foreign languages. Many of his books have been translated

NEW CHIEF OF STAFF OF THE 4TH DIVISION. Lieutenant Colonel J. Strauss, in Liestal, has been appointed Chief of Staff of the 4th division in succession to Colonel A. Strüby.

DIVIDENDS OF SWISS BANKS.

DIVIDENDS OF SWISS BANKS. Genossenschaftliche Zentralbank Basel: 5 per cent. (1935: 5%); Schweizerische Gesell-schaft für elektrische Industrie, Basel: 6 per cent. (1935: 6%); Ersparnis Kasse, Aeschi (Berne): 6 per cent. (1935: 6%); Genossenschaft-liche Zentralbank, Basel: 5 per cent. (1935: 5%); Ersparnisanstalt Toggenburg A.G.: 5 per cent. (1935: 5%); Gewerbekasse Baden: 5½ per cent. (1935: 5½%); Aargauische Hypothekenbank in Brugg: 5½ per cent. (1935: 5½%); Spar und Kreditkasse Suhrental in Schöftland: 5½ per cent. (1935: 5½%); Bank in Menziken: 5½ per cent. (1935: 5½%); Bank in Menziken: 5½ per cent. (1935: 5½%); Bank in Langnau: 6 per cent. (1935: 6%); Schweizerische Hypothekenbank, Solothurn: 5½ per cent. (1935: 5½%). INCREASE OF FOOD STUFF PRICES.

INCREASE OF FOOD STUFF PRICES.

As a result of the devaluation of the Franc, the Federal Council has sanctioned an increase in the price of bread from 35-40 centimes per kilo; milk will be increased by 1 centime per litre. The price of cheese has increased by 30 centimes, and for cooking butter 25 centimes per kilogr.

EMIGRATION OF SWISS.

According to statistics issued, altogether 2,010 Swiss have emigrated to oversea countries, in 1936, or 760 more than in 1935.

RHONE GLACIER PRIVATE PROPERTY.

The Rhone Glacier, one of the largest in Europe, has been confirmed as the property of a Swiss hotelier by the Swiss Supreme Federal Court in Lausanne.

The glacier is about seven miles long and forms the source of the River Rhone. Herr Seiler is proprietor of the Gletsch and Belvedere hotels near the glacier.

The Canton of Valais laid claim to the glacier but the Cantonal Court decided that the expanse of ice belonged to Herr Seiler. On appeal the Supreme Court has now upheld this finding.

PROTEST OF HAILE SELASSIE.

The Emperor Haile Sclassic. The Emperor Haile Sclassic has addressed a strong note of protest to M. Avenol (Secretary-General of the League of Nations) against the decision recently taken by the Swiss Government to recognise the sovereignty of Italy over Abyssinia. This protest has been communicated to the Gouncil and nearbox of the L to the Council and members of the League.

The Emperor states that the Swiss decision constitutes a violation of the international un-dertakings assumed by the Swiss Confederation. He remarks that, of all countries in the world, the Swiss Confederation, whose neutrality is guaranteed, should be the last to legalise conquest by force and accept infringements of League principle principles.

ATTEMPT TO SMUGGLE GOLD FROM FRANCE.

An attempt to smuggle gold ingots and coins to the value of £15,000 over the French frontier into Switzerland was discovered by the French Customs authorities at Perly.

The gold was concealed in a luxurious private car occupied by two men of Swiss nationality. The men were detained and the gold confiscated.

Under the recent devaluation legislation gold must be surrendered to the Bank of France against its pre-devaluation equivalent. An amnesty for those who failed to declare their gold

expires on January 30th. A careful watch is kept on all French frontiers.

SWISS SCIENTIST HONOURED.

M. Charles, E. Guillaume, Honorary Presi-dent of the International Office for weights and measures, and holder of the Nobel prize, has been presented with a gold medal on the occasion of a Banquet which took place in Paris last week, in honour of the great services which he has rendered.

Amongst the participants was the Swiss Minister, Monsieur Dunant, and a large number of scientists from all over the world.

LOCAL.

Colonel Fritz Meyer, for 22 years Manager of the Foundry of the firm Gebr. Sulzer, has re-tired from his post. Colonel Meyer has been con-nected with the firm of Sulzer for nearly 50 years. * *

ZURICH.

Dr. Fritz Fleiner, Professor of Law at the University of Zurich, has celebrated his 70th birthday anniversary.

Professor Fleiner studied law at the Uni versities in Zurich, Leipzig and Berlin; in 1892 he was appointed lecturer (Privat Dozent) at the University in Zurich and five years later Pro-fessor. From 1897-1906 he was Professor at the University in Basle, from 1906-1908 Professor at the University in Tübingen, 1908-1915 Professor in Heidelberg.

He then returned to his native land, where he occupied until 1936 the chair of "State, Ad-ministrative and Church Law" at the University in Zurich.

Dr. J. L. Nuelsen, Bishop of the Methodist Church in Switzerland, has celebrated his 70th birthday anniversary.

BERNE.

BENNE. National-Councillor, Konrad Ilg, President of the "Schweizerischen Metall und Uhrenar-beiterverbandes" which has a membership of 60,000 members, and therefore is one of the most is flucation. The de University of the destination influential Trade Union's in Switzerland, has celebrated his 60th birthday anniversary.

M. IIg has been a prominent personality in the Swiss Trade Union movement for the last 28 years. He has been a member of the Municipal Council of Berne since 1911, and a member of the Grand Council of the Canton of Berne since 1918. He entered Parliament (National-Council) in 1918.

The Federal Council has appointed Dr. Karl Schwarber, Librarian at the University in Basle to be a member of the Committee of the Swiss National Library, in succession to the late Professor Hoffmann-Krayer.

LUCERNE.

The net result of the Lottery "Arve" amounts to \$30,000 frs., the first prize of 250,000 frs. was amongst the unsold tickets. The amount will be used for unemployment benefits and aggrandisement of the cantonal hospital.

SCHWYZ.

The death has occurred, at the age of 83, in Schwyz, of M. Karl Benziger-von Schnüringer, a partner in the Publishing firm "Gebr. Benziger" in Einsiedeh. The deceased was at one time a member of the "Kantonsrat."

GLARUS.

Dr. Trümpi, "Ratschreiber" of the canton of Glarus has resigned from his post; he is taking over the editorship of the "Glarner Nachrichten" in succession to the late National-Councillor Rudolf Tschudy.

ZUG.

ZUG. At at extra-ordinary meeting held at Zug it was agreed to liquidate the Bank in Zug, of Zug, as the best course in order to safeguard creditors' claims as much as possible. A sugges-

tion to reorganise the bank was dismissed. Only three weeks ago the bank was granted a moratorium of fifteen months. It is hoped that by the end of this term the liquidation will be

PRICE 3d.

SOLOTHURN.

effected.

SOLUTIORN. The consecration of the newly appointed Bishop of Basle and Lugano, Franz von Streng, took place on Sunday last at the Cathedral of St. Urs in Solothurn, in the presence of high dignataries of the Roman Catholic church, and members of various cantonal governments.

M. Motta, President of the Swiss Confederation and Federal Councillor Effer were present. Msgr. Bernardini, the Papal Nuncio, conse-crated the newly appointed bishop to his high

office. BASLE.

-

BASL. Two lorries met with a head-on collision at the St. Jakobstrasse in Basle, causing the death of two persons, father and son (Htigi) another passenger was seriously injured.

* Pastor Dr. D. Gustav Benz, since 1897 preacher at "St. Matthäus" in Basle, has died at the age of 71. Dr. Benz studied at the Uni-versities of Basle, Marburg, Berlin and Zurich.

M. Fritz Meyer, a member of the Swiss "Aero-Club," section Basle, was killed at Chur when taking off for a flight to St. Moritz. Soon after starting from Chur, where he had an emer-gency landing the previous day, the machine crashed, and he was killed instantaineonsly. The deceased was a very prominent amateur pilot and his early death is greatly deplored in aviation circles. circles.

SCHAFFHAUSEN.

SCHAFFHAUSEN. On Saturday last a "hold-up" took place at the premises of the watch-making firm Schmidlin at the "Löwengässchen" in Schaff-hausen, where a certain Karl von Arx from Egerkingen (Solothurn) threatened a clerk with a revolver, demanding the contents of the safe. At the very moment, the proprietor of the shop, a well-known "National Turner," turned up, and without much trouble knocked the intrnder down. The police were called, and the assailant was arrested; it has since been found out that he was connected with recent burglaries which took place at a jeweller's shop in Zurich.

ST. GALLEN.

At the age of 82, has died at St. Gall, Dr. Johannes Geel, late States Councillor (Ständerat).

The deceased was born in 1854 at Sargans. From 1891-1897 he held the post of Public Prose-cutor of the canton of St. Gall, and for many years he presided over the cantonal Tribunal.

Dr. Geel entered politics in 1891, when he was elected a member of the Grand Council. In 1896 he entered the Federal Parliament (Ständerat), of which he was a member for over $30\ years,$ and where he played an important part many years.

THURGAU.

During the year 1936 an amount of 218,938.30 frs. (1935: 234,794.50) has been left by private individuals for charitable purposes.

TICINO.

The death is reported from Lugano, of Pro-fessor Pietro Ferrari, at the age of 61. The de-ceased was one of the leading personalities in the Conservative Party, a member of the Grand Council of the canton Ticino, and Director of the "Popolo e Libertà."

VAUD.

VAUD. The 50 years' service of Baron Pierre de Coubertin, the founder and president of the Olympic Games, as scholar, educationist, and athlete was celebrated at Lausanne last week. Speeches were made by, among others, M. Alphand, the French Ambassador in Berne; a representative of the Canton Vaud Government, and by Baron de Coubertin himself, who described the efforts he had to make with a view to reviving the Olympic Games. to reviving the Olympic Games.

*

A Swiss infantry patrol was overtaken near lake Chaconnes, above Villars, by an avalanche and gunner Hangartner of the Fortress company 1 was killed, all the other members of the patrol were saved.

BASLE-COUNTRY.

The branch office in Allschwil, of the "Basel-landschaftlichen Hypotheken-Bank," was the scene of a hold-up. Shortly after opening, two individuals eutered and brandished their revol-vers at the cashier, who shouted for help; the would be robbers then took to their heels, without baring achieved their holds. Both wave latter on having achieved their object. Both were later on arrested, one of the aggressors is a German subject.

NEUCHATEL.

On the occasion of an address on : "Why Communism is Impossible in Switzerland," given by Dr. Bourquin, a medical practitioner and founder of the "Jeunesse Nationale" in La Chaux-de-Fonds, a serious fight started between the members of the "Jeunesse Nationale" and the started between the members of the "Jeunesse Nationale" and about 300 communists in which thirty people were injured. Dr. Bourquin was singled out by the communists for a special attack and received injuries which proved fatal. The police made baton charges and finally had to use tear gas bombs to clear the streets; so far 15 arrests have been made. Dr. Bourquin, who was 50 years old leaves a widow and a son, he was for many years a mem-ber of the Grand Council of the canton of Neu-châtel.

châtel.

WILL A NEW ADAM SMITH APPEAR? By V. H. BURRASTON, B.Com., F.C.R.A. F.C.I.S.

(Continued).

The economic work of Adam Smith as a whole has a double importance. On the one side it both sums up and unifies in a remarkable manuer as much of the inquiries of his predecessors and of his own time as it was possible for one man to do. This work was accomplished with a wide human sympathy and quite remarkable insight. He not only apppreciates and understands the conditions of life and work of persons following very many different avocations, but he has the power of translating his own picture of them to the mind of the reader. It is this power which makes his book such an extraordinarily human document, book such an extraordinarily human document, showing us how men lived and worked in the second half of the eighteenth century.

Further than this, Adam Smith's influence upon the thought of succeeding generations has been profound. Adam Smith has the gift of being infinitely suggestive. Most of the debatable points in economic theory are ultimately trace-able back to him. His reticences, his uncertainable back to min. This references, his uncertainties, and his ambiguities stimulated his successors to endeavour to clear up matters which he had left vague. Arnold Toynbee said of Adam Smith: "We study him, because in him, as in Plato, we come into contact with a great original mind, which teaches us how to think and how to work.

work." The student reading the Wealth of Nations will be impressed by the frequent occurrence of the word "nature" or "natural" in Adam Smith's writings. As he reads that there is a "natural price" for commodities, or that private property is a "natural institution," or notices the emphasis Adam Smith places on "natural liberty," an impression may be produced that the writer seems to find some magic virtue in the often repeated word, and to believe that he had justified a certain institution or course of conduct when he has established it as being natural. Behind this phraseology there was a type of thought which has to be understood in relation to the commercial conditions of Adam Smith's to the commercial conditions of Adam Smith's to the commercial conditions of Adam Smith's time and also by reference to certain philosophical conceptions with which Adam Smith was familiar. As to the first of these, we must look back to the time when Europe emerged from the Middle Ages. Political, social and economic life was disorganised by the break-up of the mediæval system. A striking characteristic of the time was the feeling of metionality and the design to give system. A striking characteristic of the time was the feeling of nationality and the desire to give expression to it. But the economy of the Middle Ages had not been based on the idea of the nation as the unit, but rather on smaller terri-torial or municipal divisions, such as the manor and the towns. Trade was rather inter-communal or inter-municipal than inter-national. Accord-ingly, in order to impress the idea of national or inter-municipal main intermittation actional ingly, in order to impress the idea of national unity, it was necessary to bind together these relatively distant entities into a comprehensive system of organisation by the State, which applied in its main lines to the whole country. Not the least important aspect of this activity was in relation to trade, and this side of the whole movement is known as the Mercantile system or mercantilism, concerning which Adam Smith has so much to say. State control of the nation's necessary and inevitable and it was directed to ends which were believed to conduce to the estab-lishment and extension of the nation's wealth and power. From this central conception there followed logically in the circumstances of the seventeenth and eighteenth centuries, as these seventeenth and eighteenth centuries, as these were interpreted at the time, the regulation of

DOGS BECOME ARMY RECRUITS IN SWITZERLAND.

Man's best friend, the dog, has proven his worth in numerous ways and for many centuries dogs have been playing an important rôle in human warfare. Originally an attempt was made to press the animals into field hospital service. The experiment did not prove satisfactory and was partially given up already during the World War. The activities of the Army dog to-day are chielly confined to the dispatch service where excellent results have been obtained. Dogs have done splendid work in the most difficult and most dangerous situations, where all other means of conveying messages or reconnoitering were im-possible.

The Swiss Army owes the introduction of dogs into its activities to private initiative. A few years ago a privately organized dispatch dog service was added to the First Army Corps. It immediately gave proof of its usefulness. Based immediately gave proof of its usefulness. Based on these experiences the Swiss Federal Council decided on official training courses for Army dogs, and on the establishment of a permanent station

prices and wages, protection of home industries and particularly of manufactures, the effort to secure a "favourable" balance of trade, and the secure a "favourable" balance of trade, and the over-estimation of the precious metals. So much for the commercial policies of *Adam Smith's* time. The other factor needed to explain *Adam Smith's* use of the conception "natural" is to be found in a consideration of certain philosophical doctrines which were highly regarded by scholars of *Adam Smith's* generation. During the early part of the eighteenth century the Roman stoics, Cicero, Warens Aurelins and Sence. enjoyed a remark-Marcus Aurelius and Seneca, enjoyed a remark-able popularity. Every self-respecting publisher, so we are told, issued editions of these authors. *Adam Smith* possessed at least four editions of Cicero, and three of Seneca. For our present purpose it is enough to remember that these philosophers placed emphasis upon the distinction between what was natural as opposed to what was by convention or human arrangement. Thus the Stoic maxim "to live in accord withNature" the stole maxime to five in account with accure implied the superiority of the natural over the human order. In fact we might say: "What-ever's natural is right." A little consideration will show that this popular Philosophy of Naturalism was in opposition to Mercantilism. The one urged a reliance upon what was natural, The one urged a reliance upon what was natural, while the other deliberately aimed at the regu-lating, disciplining and developing what was already in existence by the direction of the State. Thus for Adam Smith all the elaborate devices of the State control of industry and commerce which had been laboriously built up by the Mer-cantile system were violating the necessary conditions of a healthy social life. Instead of regu-lation and constraint, the true social end was freedom, or what was called "natural liberty." It was Adam Smith who saw this relationship of contemporary practices and contemporary philosophy and so reached the central part of his system.

Adam Smith was in no sense a prover, three great things he did accomplish. The f Adam Smith was in no sense a pioneer, but we great things he did accomplish. The first three great things he did accomplish. The first was the definite substitution of income — "produce" as he called it — for the older idea of a capital aggregation of "treasure" or something akin to "treasure." He was quite aware of what he was doing here. The Introduction and Plan which he prefixed to the *Wealth of Nations* begins with two paragraphs in which the continuous attainment of a large quantity of the necessaries and computered on life is treated as the end of attainment of a large quantity of the necessaries and conveniences of life is treated as the end of economic endeavour, and it ends with the sen-tence in which the " real wealth " of a nation is taken to be " the annual produce of the land and labour of the society." Of course, this idea was not a new creation of Adam Smith's. Some inkling of the trath about this matter is to be Instang of the truth about this matter is to be found in the English political arithmeticians in the end of the seventeenth century, and the physiocrats had discussed "the annual repro-duction" and its "distribution." But Adam Smith must be given the credit of giving this conception the importance it deserved as some-thing fundamental. Bight down to his time the thing fundamental. Right down to his time the reigning school of economic thought was open to the reproach which he levels against it when he says that it represented the great object of the industry and commerce of a nation to be multiplication of gold and silver within it. be the

To change all this, to recognise that not a hoard of gold and silver, not even a store of all kinds of valuable and useful things is the end of economic endeavour, but instead a large conon economic endeavour, our instead a large con-tinuous produce or supply of consumable neces-saries and conveniences — that, in short, as Adam Smith himself put it, "Consumption is the sole end and purpose of all production," was a great service.

The second great change which Adam Smith made in general theory was to substitute wealth for these animals. The supervision of this new service was entrusted to the commander of the First Army Corps.

The dispatch dogs are chiefly assigned to officers and soldiers who volunteer for this par-ticular service. The introductory course has a duration of four weeks and upon its conclusion each participant has a trained dog assigned to him, which he has to board and teach further. The animal remains, however, property of the Confederation for a number of years.

Once a year, the master, as well as his dog, have to attend a repetition course. Present plans foresee three dispatch dog groups, consisting of two men and two dogs each, for each Infantry regiment and Artillery unit. Later on the Infantry regiments are to receive up to ten dispatch dog groups.

The main difficulty with this new Army auxiliary is that the animals, in order to be systematically trained, must be stationed closely together. For the time being the camp at Savatan near St. Maurice, is chief headquarters, and in the hands of specialists for the breeding and teaching of Army dogs.

per head for wealth in the aggregate, whatever that might be. He does this in the second sen-tence of the *Wealth of Nations* in his stride, so to speak, apparently without noticing that any-thing important was happening: "The nation," he says, "will be better or worse supplied with all the necessaries and conveniences for which it has occasion "according as the produce "bears a greater or smaller proportion to the number of these who consume it." That is, he will consider the nation wealthy or not wealthy according as its the nation wealthy or not wealthy according as its average worker is wealthy or not wealthy, and not according as the sum of all its members' wealth is great or small. By this he threw over the old idea of an entity called the State or the nation existing outside the individuals who constitute its subjects or members, and flourishing or languishing irrespective of their prosperity. To us that may seem a small thing. We are accus-tomed to think of Switzerland or of Denmark as a rich nation commerd with Russia. But it was tomed to think of Switzerland or of Denmark as a rich nation compared with Russia. But it was a great break with tradition in 1776. It was a change in accordance with the humaner spirit of the age. The "nation" was henceforth to be the whole people and not merely the King or the ruling classes, who, being themselves above the reach of want, could afford to pursue national glory and power and despise the sordid con-siderations which invade the homes of the people. No longer were the people to be regarded as mere pawns to be used as required in the outer game No longer were the people to be regarited as here pawns to be used as required in the queer game of accumulating a heard of treasures of which the only conceivable use was to be sent abroad again in time of war. They were to be a body of persons whose individual necessaries and con-veniences of life were to be the objects to be oursued.

Thirdly, Adam Smith may fairly claim to be Thirdly, Adam Smith hay tank to be the father, not of economics generally — that would be absurd, but of what in modern times has been called, with opprobrious intention, "bourgeois economics," that is, the economics of those economists who look with favour on working and trading and investing for personal gain. We are apt to forget that the idea that a wage-earner, a trader, or an investor may be, and indeed generally is, a very respectable person is very modern. Greek philosophers thought wage earners incapable of virtue, and money-lenders very monern. Oreca philosopheris though were earners incapable of virtue, and money-lenders have been objects of antipathy throughout the ages. In the Middle Ages, as we see in Chaucer, trader and pirate were often interchangeable terms. In Adam Smith's own time Dr. Johnson and Postlethwayt very seriously considered whether a trader could be a gentleman. Adam Smith came forward as the admirer and champion of the diligent man. He praised the habits of economy, industry, discretion, attention and application of thought. Far from making people inclined to cheat, he held, commerce made them honest and desirous of fulfiling their contracts. By contrast he remarked "They whom we call politicians are not the most remarkable people in the world for probity and punctuality." How wonderfully true to-day is this remark of Adam wonderfully true to-day is this remark of Adam Smith's?

All this approval of the man who wants to get on in life, succeed in business, or whatever you like to call it, would have been a very poor gospel if such success were only purchased at the cost of depressing other people. But in Adam Smith's view it was not. On the contrary, he held that commerce and investment having been held that commerce and investment having over introduced, each man by trying to help himself, in fact, not only helped himself, but all others. So, in his opinion, when "the butcher, the brewer, and the baker" provide us with our dinner, not because they love us, but because they wish to benefit themselves, they need not be ashamed of the fact. So much for the old Adam

(To be continued).
